RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained."
Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "$."

American Railroad Journal.

Saturday, November 30, 1872.

Stock Exchange and Money Market.

Money has been quite active on call throughout the week, on the basis of 7 per cent. as the minimun rate, to even the most responsible borrowers. Lenders, both through the banks and private channels, have been more exacting, in making advances, as to collaterals, and less liberal of accommodation generally. The needs of the Stock Exchange firms have been quite urgent, in part owing to the exceptional activity in Chicago and North Western Railway shares, in which the cornering movement was engineered to a head on Friday and Saturday, to the discomfiture of the operators in the Stock for lower figures. In the discount line, there has been a restricted business reported with even the best commercial paper rated as high as 12 per cent. per annum, as the rule. Mercantile affairs were injuriously affected by the continued Monetary stringency. Our city banks have been again losers in the line of their legal tender reserve, and also in the specie average. Their deposit line has likewise been reduced 4⅞ millions. They contracted their loan and discount about half a million. The U. S. Sub-Treasury reduced its coin reserve about ¼th of a million and its currency balance about half a million. At the close, Money was quoted somewhat easier to the leading street houses to 7 per cent. on call.

The U. S. Sub-Treasury office last week received $4,747,567 of currency, and $3,142,015 of gold, the latter including $2,109,000 from customs; and disbursed $5 250,762 of currency and $4,426,035 of gold, the latter embracing $1,408,139 of coin interest. The city banks reduced their loan and discount average about half a million during the week, and their outstanding circulation a trifle. The U. S. Sub-Treasury held a currency balance on Wednesday of $21,446,781, and a coin reserve of $43,688,147.

The city banks, in their latest return, show a decrease of $832,300 of legal tender notes, of $1,489,000 of specie and of $1,873,000 in their deposits, also a contraction of $468,700 in their loan and discount averages, and of $22,500 in their item of circulation. The city bank exchanges, last week, averaged 132½ millions. The banks now hold $1,193,400 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $12,101.200, against $16,222,800 same time last year. The city bank deposits are now $199,651,600 against $219,220,800, week ending Nov. 25, 1871. The legal tender reserve amounts to $45,899.300, against $55,694,900 same time last year. The circulation now stands at $27,576,800 against $30,089 500 same time last year. The loans are now $276,464 300 against $288,403,700 at this date last year.

The coin reserve of the city banks is now about 12⅛ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 45⅞ millions against about 55½ millions on the statement of June 15th; and the deposits are now down to 199¾ millions, against 217¾ millions on the 20th of July.

Government revenues have been yielding moderately, since our last. The excises yielded within the week about 2¼ millions and thus far in the current fiscal year beginning with July 1, 1872, $51,537,639. The customs at the port of New York last week were $1,927,979, and at the outports, equal to about $650,000, all in coin or coin certificates.

The Gold movement has been moderately active, in the speculative line, since our last, while the customs call has been on an average scale, and the export drain, very light. The price has shown much irregularity, the later dealings indicating weakness. The range of the price during the week has been from 112¾@113⅞, and the quotation on Wednesday was 112⅞ against 113¼ the preceding Wednesday. The specie outflow last week, was only $232,624. The Gold Exchange Bank clearances have averaged about 54 millions per day during the week.

The customs demand for Gold last week, averaged $351.500 a day. The arrivals of specie from Europe, Havana and other foreign ports since Jan. 1, 1872, were $5,347,772 against $8,409,313 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $135,652,435 against $144,309,962 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $71,711,312, against $81,020,328 during the same time in 1871.

The export drain of specie was $232,624 last week, against $416,014 same week preceding year. The shipments since January 1, 1872, have been $67,091,529 against $59,600,663 during the same portion of 1871.

Foreign Exchange has been in very moderate request at irregular prices, closing more firmly. Bankers' sixty day bills on London closed on Wednesday at 108⅛@108⅜; sight bills on London, 100@110⅛.

Government securities have been in fair demand, mostly on investment account, at generally well supported prices. The offerings of the favorite issues in the open market have been very limited.

On Tuesday, Government bought in $489,150 of of the offered Five-Twenties at from 112 69 @112 74. The aggregate offering was $1,059,100 @112 35@112 99.

On Wednesday Government sold $1,000,000 of gold at from 112 66½@112 35. The aggregate offering was $2,200,000, at from 112@112 85

U. S. sixes of 1881 at the opening on Wednesday of the current week were quoted at 116½@116¾; U. S. Five-Twenties of 1862, 112⅝@112⅞; U. S. Five-Twenties of 1864 at 112⅜@112⅝; U. S. Five Twenties of 1865, 112¾@113; U. S. Five-Twenties of 1865 consolidated, 115⅛@115¼; U. S. Five Twenties of 1867, 115¾@115⅞; U. S. Five-Twenties of 1868, 115¼@115½; U. S. Ten-forties at 108¼@108½; U. S. Fives of 1881 (Funding Loan) 109½@110; Six per cent. currency Sixes from 113½@113¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 13.	Nov. 20.	Nov. 27.
Consols	92¼	92½	92¾
U. S. 5-20s, 1865	90½	90½	91⅛
" 1867	92½	93	93⅜
" 10-40s	87	87¼	87½
New Fives of 1881	88¼	88½	88½
Erie	38¾	41½	41⅜

State bonds have been very moderately sought after and quoted unsettled in price closing rather steadier.

Railway and Miscellaneous share property has been active, excited, higher, and very variable as to values. The great feature of the week's movements was the cornering operation in North Western shares, which on Friday sent the price of this stock jumping upwards very rapidly, to the serious embarrassment and peril of many of the dealers in the property, who had been working on the *bear* side of the speculation. The adjustment of the speculative transactions was progressing very slowly, even with the intervention of the lawyers, and the courts.

Railway Mortgage Loans have been in fair investment demand and generally held with firmness The older issues were scarce in the open market. Central Pacific Sixes closed firmly at from 100@ 100¼.

The Metal trade has been unusually tame. Trade in Ingot Copper is dull, the dealings being confined to small lots, amounting, in all, to 100,000 lbs. at 31c.@31¼c., at which figures the offerings were liberal. Iron has been very dull throughout, influenced, to some extent, by the unfavorable foreign advices, and prices have been quoted weaker, with Glengarnock quoted at $49@ $50; Eglinton, to arrive, at $47; No 1 American at $52@$53; No. 2 do. at $49@51. Sales, 100 tons Eglinton Pig, here, at $48. Lead, Spelter and Zinc have been very quiet at about previous prices. Tin Plates are depressed, lower and irregular, on a limited business, the market being adversely affected by the discouraging advices from England; 300 boxes assorted Charcoal sold at $11, gold, for I. C. 10x14; 100 boxes B. C. Coke Terne at $8 50, gold, and 200 boxes S. T. P. Terne at $10 37½, gold. Of Pig-tin, 50 slabs Straits sold at 30¼c., gold, with English held at 30¾c.@31c., and Banca at 35c., gold.

General business has been comparatively quiet. Domestic produce has attracted less attention, as a rule. Cotton, shipping grades Flour, prime Wheat, Oats and Butter closed rather more firmly on lighter offerings of stock. Corn, Lard, Naval Stores and Petroleum, rather weaker in price. Middling upland cotton, closed on Wednesday at 19½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,051,933 bales, against 817,445 bales same time in the preceding year; exports 467,300 bales against 321,400 bales in the previous year; stock at the ports at latest dates, 376,000 bales against 361,100 bales same date 1871.

At the Live Stock Markets, Beeves have been in less demand at from 8½@14½ cts.; Veals at 7@11 cts.; Sheep at from 4¾@7 cts.; Lambs, 6@8¾ cts.; Swine, at 4¾@4⅞ cts. per lb., all live weight. The week's receipts were 10,769 Beeves, 1,500 Veal Calves, 28,599 Sheep and Lambs, and 45,480 Swine.

Foreign goods have been less active, but generally steady. The week's imports of foreign goods reached the amount of $6,625,579, including $126,090 of dry goods.

Ocean freights have been unusually quiet, with less demand for room which has been mostly for Flour, Grain, Cotton, Lard, Rosin, Petroleum, and Apples, checked by the scarcity of tonnage on either berth or charter, and the firmer views of owners.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere n our columns:—

The "Mogul" Engin.

The Cumberland (Md.) *News* says a trial was recently made, on the seventeen-mile grade of the Baltimore and Ohio railroad, of an "eight-wheel connected mogul" locomotive, built at the Baldwin Locomotive Works at Philadelphia, and owned by the Cumberland and Pennsylvania railroad. Its performance was highly satisfactory, if not surprising. It drew up the grade a train of thirty-eight empty coal hoppers and the private car of Mr. F. Mantz, general supervisor of trains of the Baltimore and Ohio railroad, filled with officials of the road and spectators. The camel engines used by the company pulled up the above-named grade twenty-one hoppers, and the ten-wheel engine eighteen.

☞ The value of goods exported from the port of Philadelphia during the month of October amounted to $2,234,737. Of the total shipments $1,630,079 in value were in foreign vessels and but $604,658 in American vessels. The number of vessels employed was 74, of which 19 were American, 35 British, 13 Swedish, 2 each German, Italian and Portuguese, and 1 Austrian.

☞ It is proposed to cut a canal through the narrow neck of land dividing the two provinces of New Brunswick and Nova Scotia, to connect the Bay of Fundy with the Northumberland Straits. The length of the proposed canal will be sixteen miles.

Triumph of American Skill.

The Baldwin Locomotive Works have closed a contract for supplying a Russian house with nine of their engines, to be used in Finland, on the Hungo Road. The locomotives are to be of 5 feet gauge, of the ordinary American pattern, with 15x25 inch cylinders, 62 inch driving wheels, and will burn wood. This is a high compliment paid to American skill and enterprise. Indeed, such compliments are becoming quite common, and the day is not far distant, under proper encouragement, when the products of our manufacturers will be sold in all the principal markets of the world.

☞ The Piedmont (Orange C. H.) *Virginia* says that "the work on the Fredericksburg, Orange and Culpeper Railroad is progressing finely. Messrs. M. V. B. Finch & Co. advertise for proposals for laying twenty-one miles of track —that is from its present terminus, Parker's store, to this place. A train of cars, we hear, is now running from Fredericksburg to Parkers' store, and we confidently expect to hear by the first of next March the snort of the iron-horse at this place. Major Braxton, who has the contract for this end of the road, is pushing his work through, and expects to complete it by the middle of January."

☞ The Hon. Galusha A. Grow, president of the Houston and Great Northern railroad of Texas, has been elected president of the International railroad. Both are hereafter to be operated as one road, under the management of Mr. Grow. At present the two roads have 375 miles in running order. They are mainly built by New York capitalists, and are controlled by some of the best men in New York city.

☞ It is reported that the Chicago, Clinton and Dubuque Road will commence running regular trains to Chicago, via Clinton, in a few days. This opens a second route from Dubuque to Chicago. C. A. Walcott has been appointed superintendent of the road.

☞ The Court has ordered the foreclosure of the first mortgage of the Western North Carolina Railroad and the sale of the road by auction. The State has invested four million dollars in the road, all of which will be lost.

☞ The Kingston and Pembroke (Ca.) Railway is progressing satisfactorily, the contractors having reached Verona a distance of 20 miles from Kingston.

☞ The town of Collingwood (Ca.) has voted a bonus of $40,000 in aid of the proposed Hamilton and Northwestern Railway, to run from Hamilton to some point on the Georgian Bay.

☞ M. J. Wicks has resigned the presidency of the Memphis and Charleston railroad, and John J. Rather, of Huntsville, Alabama, has been elected to fill the vacancy.

☞ The Union Freight Railway along the harbor front, at Boston, will be in full operation within a few days.

☞ Ground was broken at Dover, N. H., on the 25th of November, for the Portsmouth and Dover Railroad.

☞ Banking-House of Fisk & Hatch, No. 5 Nassau-st., New York.

We receive Deposits and allow interest on daily balances, issue interest-bearing certificates of deposit, make collections in all parts of the United States and Canadas, and execute orders at the Stock Exchange for investment stocks and bonds.

We buy and sell, as usual, Government, Central Pacific and Western Pacific Bonds, and especially recommend to the attention of investors the Six Per Cent. First Mortgage Bonds of the Chesapeake and Ohio Railroad Company, which are issued either coupon or registered, in denominations of $100, $500, and $1,000; interest is paid in gold, May and November. At their present price they yield *over seven per cent. income in gold.*

This great work is about completed; there are now nearly 400 miles finished, and only about 25 miles remain to unite the Atlantic tide-waters to the Ohio River valley by the shortest and easiest rail-route possible.

The quantities of white oak, poplar, pine, walnut, and other valuable timbers; the cannel, splint, and bituminous coals; the varieties of iron ores; the limestone, salt and other products, render the route of the Chesapeake and Ohio Railroad probably the most attractive location for coal-mining, iron-making, and kindred industries, in the United States.

The company have, at considerable expense, caused a geological survey to be made of the route of the road by Prof. Ridgway. Copies of his valuable Report, with map, and also a pamphlet containing the latest information in reference to the present condition and future prospects of the road, can be had on application at our office.

Fisk & Hatch.

☞ The Philadelphia *Ledger* of 25th inst., reports the net anthracite coal tonnage for the week ending on the 16th inst., from all sources, at 388,013 tons, and for the year 17,566,694 tons, against 13,857,688 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,709,006 tons. The production of bituminous coal for the week was 58,480 tons, and for the year 2,272,701 tons, against 1,972 537 tons to the corresponding time last year—an increase of 300,164 tons. The tota! production of all kinds of coal for the week was 446,493 tons, and for the year 19,839.392 tons, against 15 830,225 tons to corresponding time last year, showing an increase of 4,109,167 tons.

☞ The gauge of the Grand Trunk Railway between Sarina and Fort Erie opposite Buffalo has been narrowed to 4 feet 8½ inches, and this makes a complete narrow gauge line on the Grand Trunk, between Chicago and all points west, and New York and all points east. Until the gauge of the Grand Trunk is altered to Montreal, which will be done as rapidly as possible, the change from broad to narrow, will be made at Stratford, where very extensive facilities are being provided.

☞ Regular trains are now running on the Atchison, Topeka and Santa Fe Railroad to Dodge City, 851 miles from Atchison.

Journal of Railroad Law.

RAILROAD COMPANIES—NOT LIABLE FOR WILLFUL ACTS OF ITS CONDUCTORS.

The facts in the late case of Mary Isaacs *vs.* The Third Avenue Railroad Company, (47 N. Y., 122,) are fully and clearly stated in the following opinion by—

ALLEN, J.—The defendant cannot be charged for the willful acts of its conductors under the provisions of the Revised Statutes making a part of the act entitled "of the law of the road and the regulation of public stages." (1 R. S., 695.) That act, first enacted in 1824 and made a part of the revision, makes the owner of every carriage running or traveling upon any turnpike road or public highway for the conveyance of passengers, liable to the party injured, in all cases, for all injuries and damages done by any person in the employment of such owner as a driver while driving such carriage to any person or the property of any person, and that whether the act occasioning such injury or damage be willful or negligent or otherwise, in the same manner as such driver would be liable. By § 7, enacted at the time of the revision of the statutes, a "carriage" as used in the act, is declared to include stage coaches, wagons, carts, sleighs, sleds, and every other carriage or vehicle used for the transportation of persons and goods or either.

By this act, the common-law liability of one class of masters for the acts of a single class of their servants was enlarged and extended. Owners of carriages used for the transportation of persons or goods, were singled out and made liable for the willful or tortious acts of one class of their servants, to wit, the drivers of their carriages, leaving the common law, regulating the liability of masters for the acts of their servants, intact in every other case. The conductor of a street railroad car, is not the driver of a "carriage" within the statute for whose willful acts the master is liable.

Notwithstanding the comprehensiveness of the term "carriage" as defined by the statute, it is very doubtful whether it includes a car used for the carriage of passengers over a street railroad. Such a vehicle was not within the spirit of the act, and is not within the general classification and specification of vehicles mentioned. It was not known at the time of the adoption of the law as a vehicle either for the transportation of persons or goods. But that question is not before us. It is enough that a conductor is not a driver of a car. He may direct or control the driver but does not himself drive the vehicle. He controls the movements of the car, but he does not act as driver. There was a conflict of evidence as to the circumstances under which the plaintiff sustained the injury, but the jury have adopted the statements of the plaintiff and her sister-in-law, whose testimony did not differ in any essential particular, and who were the only witnesses to the transaction except the conductor of the defendant, whose testimony was disregarded by the jury. The facts proved by the plaintiff were, that she was a passenger in the defendant's car late in the evening upon a trip, and desired to stop at Spring Street, and so notified the conductor; that at or about Spring Street she rung or caused the bell to be rung as a signal for the stopping of the car and passed out on the platform and asked the conductor to stop the car, to which he replied that the car was stopped enough; that she told the conductor she would not get out until the car had come to a full stop, whereupon he took her by the shoulder by both hands and threw her out and her leg was broken by falling on the pavement. The evidence was that the push was with violence throwing the plaintiff from the platform over the step on to the pavement, and that the act was intentional on the part of the conductor. The car was in motion at the time, and one of the witnesses testified that it was going faster than a walk.

It is not denied that the act of the conductor upon the facts established by the verdict of the jury, was wrongful, for which the plaintiff may have an action against the actual wrong-doer, and also against the defendant, as his employer and master, if the act was authorized by it. It is not claimed by the plaintiff that there was express authority given by the defendant for the commission of this particular trespass. The rule, well established and recognized in all the cases, and to which there are no exceptions, is, that to charge the master for the wrongful acts of the servants, they must have been committed by the express authority of the master, or in his service, and within the scope of the employment and authority of the servant. If an act is done by the servant in the business of the master, and within the scope of his employment the master is liable to third persons for any abuse of the authority conferred, or injuries resulting from any error of judgment or mistake of facts by the servant, as well as those resulting from negligent or reckless performance of his duties. The judgment in Higgins *vs.* The Watervliet Turnpike Company recently decided by this court, was upon this ground and as fully sustained by the authorities cited in the opinion of the court, prepared by Judge Andrews, but the same authorities as well as the judgment in that case recognize and reaffirm the equally well settled principle, that for the willful, wanton or reckless acts of the servant, not committed in the service of the master, and not within the line of his duty or the scope of his employment, the master is not liable. The line separating the acts for which the master is responsible from those for which he is not answerable is not, in all cases very well defined, and in some cases it may be difficult to distinguish between the two classes of acts. The difficulty, however, is, not as to the principle but in its application to peculiar circumstances.

Whenever an injury has been caused by the conduct of a servant in the business of his master, and within the scope of his employment, the master has been held liable, although such conduct may have been tortious. The question of liability does not depend on the quality of the act, but rather upon the other question, whether it has been performed in the line of duty, and within the scope of the authority conferred by the master. When the act of a servant, whether a trespass or otherwise, is without the authority, either expressly conferred upon the servant or implied from the nature of the employment and character of the duties causes injury to others, the master is not answerable. It is said that the implied authority in the servant is limited to those acts which the master could himself do if personally present, and if, in the performance of such acts, the servant misconducts himself, the master will be liable for his acts. The case of Hubbard *vs.* New York and Erie Railroad Company (15 N. Y. 381), was well decided, and the judgment was properly reversed, for errors of the judge at the Circuit in his instructions to the jury upon the justification for the expulsion of the plaintiff from the cars by reason of his refusal to conform to the regulations of the defendant. Some of the expressions in the opinions of the judges which would exonerate a railroad company from liability for excess of force or error of judgment in the performance of an act by a conductor within his general authority, are open to criticisms as not in harmony with the later authorities, and would not, probably, be regarded as sound, although they are supported by the earlier cases and by the elementary authorities. The Supreme Court of this State, in Wright *vs.* Wilcox (19 Wend. 343), held, that for willful injury done by a servant, the master was not liable, and adopted the rule of Lord Kenyon that, "when a servant quits sight of the object for which he is employed, and without having in view his master's orders, pursues that which his own malice suggests, he no longer acts in pursuance of the authority given him." The principle is the same, whether the wrongful act of the servant is malicious or merely wanton or reckless.

In the present case an act was done by the conductor completely out of the scope of his authority, which there can be no possible ground warranted by the evidence for supposing the defendant authorized, and which it could never be right under any circumstances for the defendant to do. 1st. The car was in motion, and for no cause could the plaintiff have been thrust out into the street against her will while the car was in motion. The law forbids it, and the defendant could not lawfully have done it and therefore no authority could be implied in the conductor to do it. 2nd. There is no pretence that the conductor ejected or put the plaintiff from the car, or claimed to exercise such power for disorderly conduct, non-payment of fare, or any other cause. 3d. The act was not in aid and assistance of the plaintiff in leaving the car. She was not in the act of getting off the car, but was standing on the platform, demanding that the car should be fully stopped, and protesting as she had a right to do, that she would not attempt to leave the cars while they were in motion. 4th. The act was wanton and reckless, and was committed with great force and violence, such force as to throw the plaintiff clear off and over the step, and on the pavement. It is not in the performance of any duty to the defendant, or of any act authorized by it. It was a criminal act for which the conductor could have been punished criminally as well as made to respond in a civil action. It was a wanton and willful trespass, and was not the natural or necessary consequence of anything which the defendant had ordered to be done.

When it was found that the plaintiff's steamboat took fire in the night, while it was fastened to the defendants' wharf, upon which stood a wooden freight house, but before the freight house was endangered, and while the fire could have been extinguished, the plaintiff's cable was cut by the defendants' watchman, and the boat drifted away and was burned, no evidence being given of au-

thority for the act of the watchman, other than such as was implied from his general employment as such in the business of the defendants, the latter were held not liable for the act of the watchman. (The Thames Steamboat Co. *vs.* Housatonic R. R Co., 24 Conn., 40). The case was well considered, and is well supported by the argument of the judge, as well as by authority, and is in accord with the decisions of the courts of this State and of England. The question of liability upon the facts proved by the plaintiff was distinctly presented upon the trial and decided adversely to the defendants, and an exception taken.

Upon the case made upon the trial by the plaintiff, she should have been non suited.

The judgment must be reversed, and a new trial granted, costs to abide event.

Judgment reversed.

Shenandoah Valley Railroad.

The board of directors of this company met in Front Royal on Friday, the 8th, pursuant to a call from the president, Thomas A. Scott, the object of which, we understand, was to perfect arrangements for working the line of road between Shepherdstown and Hagerstown. A full board was present, and it is reported that work will soon be commenced on that end of the line, thus giving us a through connection to Northern cities. The work through the county of Page, or at least as far as Luray, will be given to contractors early after the 20th instant, thus assuring the friends of this enterprise that they are to have a road. Col. Spitler, one of the directors, has been for several days engaged along the road from Milford to Luray securing the right of way for the road. We understand that some parties were along the line between this place and Milford last week, with a view to becoming bidders for a portion of the work.—*Page (Va.) Courier.*

Our Southern Railroad Connections.

The interruption of the direct railroad connection through Washington, by the tearing up of the track of the Washington and Alexandria Railroad, by order of the board of public works of Washington, will not be allowed to work any special inconvenience to the Baltimore and Ohio Railroad and its Southern connections. The whole through business of the Orange and Alexandria road coming to Baltimore, and vice versa, will be passed over the Manassas line from its junction with the main line of the Orange and Alexandria road, and come down the Valley of Virginia, *via* Strasburg, Winchester and Harper's Ferry, and thence by the Main Stem of the Baltimore and Ohio road. This route has been availed of for some time past for a large traffic between the South and West, saving thus all the detour towards Baltimore, and now this line, mainly under the control of the Baltimore and Ohio Company, will do valuable service for the great through business between Baltimore, and the South, including, of course, that derived from the Virginia and Tennessee road at Lynchburg. The passenger traffic goes on through Washington as usual of both the Baltimore and Potomac and Baltimore and Ohio Railroads.—*Balt. Sun.*

☞ The survey of the Chatham Branch (Ca.) Railway has been commenced. The *Gleaner* says that this course has been taken in consideration of the assurances given that the Local Government will give the usual subsidy to the line, and it being also understood that the Dominion Government will assist by giving the rails and rolling stock.

☞ Messrs. R. H. Payson & Co., of Chicago, have the entire contract for the building and equipment of the Cairo and East St. Louis Narrow Gauge Railroad.

☞ The Lexington (Ky.) *Press* says: "The business of the Elizabethtown, Lexington and Big Sandy railroad is becoming such a feature in the railroad line as to attract considerable attention. In the freight department, no less than ten trains daily, loaded with cattle, hogs, and other stock, pass through our city, and the passenger traffic has increased nearly two-fold since the new time table went into effect. The Big Sandy is an institution in which our people take great pride, and when the eastern division is completed, giving us an unbroken line of road east, we may then realize some of the benefits which follow an enterprise so great."

☞ The York (Ca.) *Press* says that the directors of the Bachman's Valley Railroad Company have commenced running cars regularly over their road. The road intersects the Hanover railroad about a mile west of Jefferson station, running along the south branch of the Codorus creek to Klinefeltersville, through Manheim township, crossing the Manchester and Hanover turnpike, near the village of Manchester, Md., and from thence to Bachman's Valley.

☞ Preparations are making on the Union Pacific railroad for the winter snows. Five hundred men are now employed on the mountain division, of whom 225 are engaged on the snow-sheds. One hundred miles of snow-fences have been put up, and several miles of sheds. The level of the track has been raised for fifteen miles or more, and other improvements made, by which it is hoped a blockade this winter will be prevented.

☞ At the annual meeting of the stockholders of the Duxbury and Cohasset Railroad, on the 19th inst., the old board of directors was re-elected, with Hon. Onslow Stearns as President, John M. Washburn Treasurer, and S. N. Gifford Clerk.

☞ The Toronto and Nipissing (Ca.) Railway Company have resolved upon a further issue of bonds of the Company to the amount of $76,000.

Board of Engineers of the Fourth Avenue Improvement.

Office Grand Central Depot.

NEW YORK, November 23d, 1872.

Notice to Contractors.

SEALED PROPOSALS FOR WORK ON THE Fourth Avenue Improvement between 49th and 79th Streets, will be received by the undersigned at this office until 2 o'clock P. M. of December 16, 1872. Plans, Specifications and blank proposals will be ready on and after the 29th inst.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

DANVILLE, PENN.

LIGHT RAILS weighing, per lineal yard, 40 lbs., 35 lbs., 30 lbs., 28 lbs., 25 lbs., 22 lbs., 20 lbs., 18 lbs., and 14 lbs., suitable for Narrow Gauge Railroads, Collieries, Furnaces, Mills, &c.

GILEAD A. SMITH & CO.,
New York Office,
62 Broadway.

THE WHARTON

Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.

P. O. BOX, 2353, Phila.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

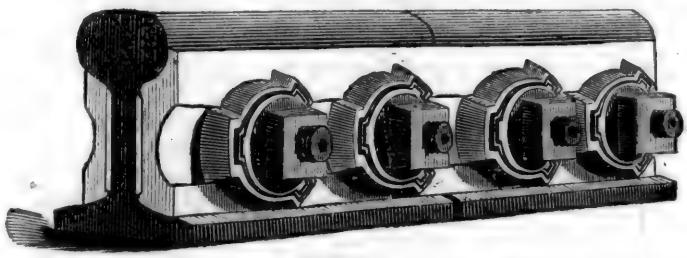
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

Baltimore and Drum Point Railroad.

The project of building a railroad by which the fine harbor of Drum Point, or, as it is sometimes called, Cove Point, can be made accessible for coal shipments and general trade, is still being pushed forward as rapidly as circumstances will permit. At Camp Parole, one and a-half miles from Annapolis, this road can be made to connect with either the Baltimore and Ohio or the Baltimore and Potomac Railroad so as to put Baltimore in connection with Cove Point. Surveys have been made at each end of the line between Camp Parole and Drum Point. The survey from Camp Parole was to Butler's Tavern, a distance of ten miles. The survey from Drum Point was to Port Republic, a distance of twelve miles. Between Butler's Tavern and Port Republic the surveys for the route are still going on. Two parties of engineers are engaged in the surveys. Advertisements are out for the grading of those portions of each end of the line on which the surveys have been completed. The ultimate construction of an independent extension of the road between Camp Parole and Baltimore probably depends on the aid received from the city and other circumstances. The road from Cove Point to Camp Parole will certainly be built. The grades will be very easy, and the expense consequently slight. Mr. Lareda, a wealthy New Yorker, who owns a large property at Drum Point, is associated with other capitalists in pushing forward the enterprise that will so largely advance the value of property at Drum Point and all through Calvert and Anne Arundel counties. Mr. Bareda has just built near Cove Point a residence that has cost over a hundred thousand dollars. He is said to own seventy thousand dollars worth of stock in the Drum Point Railroad, and to be able and determined to build it entirely himself if it is not otherwise pushed through rapidly.

Arkansas Railroads.

There are three roads or more, perhaps, that are looking now and being projected in this direction—the Kansas City and Fort Smith railroad, the Little Rock and Fort Smith railroad, and a branch of the Missouri, Kansas and Texas railroad from some point on that road between the Arkansas and Canadian rivers to this city.

We have been led to believe that the prospects of the Kansas City and Fort Smith railroad were good and becoming more bright daily, but recently we have heard but little about it. From what we know and believe of the parties, into whose hands the interests of this road have fallen, we incline to the belief that they have the desire and the means to commence and complete this road, provided the people along the route, and at each end, who are so deeply interested, will come forward and give such aid as the importance of the advantages to be derived demands.

The Little Rock and Fort Smith road is completed and the cars running for sixty miles this way from Little Rock. The road is graded to a point this side of Clarksville, and the ties are ready, and iron, sufficient for the whole road, on hand at Little Rock. But the progress of this road has been checked by a kink in the management, and by swindles too great and too gorgeous to be resisted, so that work on it has long since ceased, and the people have lost confidence in the management.

The Missouri, Kansas and Texas Railroad Company has a charter to build the branch above referred to, and now, having their main road completed nearly to Red river, which point they propose to reach in the next thirty or forty days, they could be ready to commence work on this branch, and in less than six months it could be completed to this place, and would prove a valuable feeder to the M., K. and T. road, and the company know it full well. This company has the means, the energy and the character, to put this road through in a short time, and it only needs to be induced to come this way. The M., K. and T. railroad company can build roads—it has done it—and if we can secure her pledge to complete this road we may consider it as good as built.—*Fort Smith Herald.*

Old Colony Railroad.

The annual meeting of the stockholders of this company was held in Boston on the 26th ult., Hon. Onslow Stearns, President, in the chair.

After the published call was read, President Stearns presented the ninth annual report of the directors, which was accepted.

Chas. F. Choate, Esq., solicitor for the corporation, read four articles of amendment to the By-Laws of the company, relative to the notice to be given of meetings (to include Barnstable county) of the corporation; to increase the number of directors from nine to thirteen, and to change the seal of the corporation, and the form of the certificates of stock as are required by change of name.

An amendment was offered by Mr. John Collamore of Boston which provided that not less than one thousand of the $3000 be donated to the families of the firemen killed on the 9th and 10th inst. As amended the motion passed.

On motion of Major S. D. Phinney of Barnstable, the ballot for thirteen directors of the company was taken.

Pending the report of the committee collecting the ballots, the Auditor's report was read, accepted and placed on file.

A letter was received from the sub-committee of the Fire Relief Committee, consisting of A. Firth, President of the Boston and Albany, and W. Merritt, President of the Boston and Maine Railroad, asking that the Old Colony Railroad Company contribute in the spirit that other corporations propose for the Fire Relief Fund. This was presented by Mr. Seth Turner of Randolph, who also made a motion that three thousand dollars be subscribed by the stockholders for that purpose.

It was voted to accept the 28th Chapter of the acts of 1872 relating to tracks at Weir Junction and Taunton, and also chapter 295 of the acts of the same legislative year, applying to this corporation in the construction of a bridge over Taunton Great river at Fall River.

Seth Turner of Randolph, Minot Terrill of Weymouth and Wm. P. Pierce of Middleboro' were appointed a committee to audit the accounts for the ensuing year.

Mr. Phinney reported that the whole number of votes cast for directors of the company was 13,913 and that by the vote of the stockholders the following were elected: Onslow Stearns of Boston, Uriel Crocker of Boston, Benjamin Finch of Newport, Oliver Ames of Easton, Charles F. Choate of Cambridge, Samuel L. Crocker of Taunton, Jacob H. Loud of Plymouth, Richard Borden of Fall River, Royal W. Turner of Randolph, Francis B. Hayes of Boston, Ephraim N. Winslow of Hyannis, John S. Brayton of Fall River, Prince S. Crowell of Dennis.

A resolution of thanks to the President and Directors of the company was read and adopted by the meeting, and after some pleasant allusions to the union of the Old Colony with the Cape Cod Railroad the meeting adjourned.

North Eastern (S. C.) Railroad.

The earnings of this road for the years ending February 28, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$101,710 48	$97,659 85
" freight	200,472 22	190,067 44
" express	3,768 89	7,858 51
" mails	15,600 00	13,866 64
	$321,551 59	$305,452 44
Expenses, viz:		
Maintenance of road	$61,241 78	$64,051 45
Motive power	64,462 44	60,075 27
Repairs of cars	47,606 18	22,076 62
Transportation	42,447 75	45,446 10
Salaries & general exp.	14,989 17	12,149 56
	$230,747 31	$203,799 00
Net earnings	$90,804 28	$101,653 44
Add amount to credit of profit and loss February 28, 1871		4,812 87
Added since		11 02
		$106,477 33
Charged with the following items, viz:		
Interest accrued on bonds	$77,160 00	
Interest accrued on preferred stock	8,860 00	
Interest accrued on certificates of indebtedness	7,632 99	
Interest paid on past due bonds	6,205 85	
Current interest and discount on bonds	9,999 24	
		109,858 08
Carried to debit of profit and loss		$3,380 75

Compared with the previous year the gross earnings show a decrease of $16,099 15; with a decrease in operating expenses of $26,948 31—making the increase in net earnings $10,849 16. The President in his report says:

A decrease of $16,099 15, or five per cent., will be noticed in our receipts, a result which is to be explained by the prevalence of a severe epidemic in our city, during the past summer, the general reduction of the cotton crop, and other untoward circumstances, a recurrence or continuance of which, it is hoped, will not be experienced the ensuing season.

During the year we have moved 29,793 bales of cotton, 82,770 barrels naval stores, 3,612,000 feet lumber, and 5,633 tons phosphate rock—as against 34,539 bales, 65,946 barrels, 3,387,690 feet, and 11,895 tons the previous year.

Our operating expenses show a decrease of $26,948 31, or 11 68-100 per cent., upon those of the preceding year, while the general condition of the company's property is as favorable, as was then reported. No reduction in these can be expected the ensuing year, because of certain expenditures, which, in the course of it, will be required for the proper maintenance of the road, and its appurtenances. These must be met, irrespective of our revenue; and were the latter to be found inadequate to that end, the true remedy would be, not in their avoidance or postponement, but in such a re-adjustment of the company's tariffs, extensions of its business, and other measures as would increase its revenue, and thus enable them to, satisfactorily, discharge the duties they assume to perform.

It affords us pleasure to confirm to you our previous statements of the generally good condition of the road, and its structures. From the peculiar character of the country through which it is located, the difficulty of obtaining proper drainage, and the best material for ballasting the road bed, the labor now being annually expended upon it, does not produce a proportionately permanent benefit, though its condition is certainly being, gradually, improved. The rails, are in very fair order, indeed, there are none now in the track, sufficiently worn to require immediate removal. During the past year, we have supplied 531 tons tons new rails, (56 lbs to the yard,) with the necessary complement of fish plate fastenings, as a substitute for the light lip chairs, formerly in use. The bridges, trestles, culverts, &c., have received the needful attention.

Our shops at Florence, which are wooden structures, and of a temporary character, have been somewhat enlarged, and valuable additions made to their machinery.

Of the new first mortgage bonds, ($820,000,) we have on hand $22,500, to be applied to the redemption of the old bonds and outstanding interest thereon, and to the partial liquidation of the company's real estate bonds. Of the new second mortgage bonds ($322,000) we hold $46,500 for the redemption of an equal amount of the old still outstanding.

The amount of second mortgage bonds originally issued was $300,000, of which $145,000 were sold; the remaining $155,000 were subsequently pledged and deposited with trustees as a security for a corresponding amount of preferred stock. This preferred stock is then, virtually, a substitute for, and representative of, that amount of second mortgage bonds.

Upon their maturity, the new issue of bonds, for their redemption, was increased to $320,000 (to cover accrued interest thereon;) and as the bonds and the preferred stock then bore the same rate of interest, the conversion of the one into the other, as might be desired by their respective holders, has been allowed. The preferred stock has the single advantage of being registered and transferable on the company's books, but many prefer foregoing this, for the convenience of collecting their interest by coupons, and the greater facilities of transfer, etc., afforded by the Bonds.

The total interest for which the company is annually responsible on its bonded and other obligations, is about $100,000.

The prospects of the company are much involved in the extensions of its communications, northward from Cheraw to Salisbury, in the construction of the South Carolina Central Railroad from Lane's Station to Sumter, and, especially, in the improvement of its connection with the Savannah and Charleston road. The completion of the road from Fredericksburg to Washington, and of the Tunnel at Baltimore, both now in active progress, will relieve the Atlantic Coast Line of the present transfers and delays at those points, and should render it an attractive route to the passenger.

The fact of our having passed through the year, with but few interruptions in the movement of our trains, and without any serious accident, certainly indicates a commendable degree of attention and watchfulness on the part of the company's subordinate officers and employees.

The company have 13 locomotives; 6 first-class and 7 second-class passenger cars, 4 mail and baggage, 68 box, 48 platform and 30 phosphate cars. Number of local passengers carried, 51,882; do., through do., 13,533—total, 65,415. Bales of cotton hauled, 29,793, of which 8,887 bales were from local stations, and 20,906 bales from other roads. Barrels naval stores 82,770; feet of lumber, 3,612 Number of miles run by trains 257,712. Av. receipts per mile run, $1.18; expenses do., 79 cents. Receipts per mile of road, $2,995; expenses do., $1,998.

Balance Sheet, February 29, 1872.

Construction, equipment, right of way, &c	$2,148,130 65

Superintendent.—S. S. Solomons.

Secretary.—C. Williman.

Statistics of Commerce and Navigation.

From the official synopsis of the Report of the Bureau of Statistics we learn that the imports into the United States for the year ended June 30, 1871, amounted to $541,493,708; domestic exports (specie values) for the same period, $513,044,273; foreign exports, $28,459,899. For the twelve months ended June 30, 1872, the imports amounted to $640,337,540; domestic exports, $501,164,971; foreign exports, $22,769,749. In 1871 the imports consisted of $519,593,684 worth of merchandise and $21,900,024 in specie and bullion. The domestic exports for the same period were—merchandise, $428,539,017; specie, $84,505,256; foreign exports—merchandise, $14,421,270; specie, $14,038,629. In 1872, the imports were: Merchandise, $626,593,654; specie, $13,743,886; domestic exports—merchandise, $428,266,731; specie, $72,898,240; foreign exports—merchandise, $15,690,455; specie, $7,079,294.

The value of foreign commodities remaining in warehouse June 30, 1872, was $122,211,266 as compared with $68,324,659 June 30, 1871.

Allowing for the difference in the warehouse account, the imports of the fiscal year of 1872 are in excess of the domestic and foreign exports, combined to the amount of $53,886,000, while for the fiscal year 1871 the exports exceeded the imports by $11,393,818.

The respective amounts of our foreign commerce carried in American and foreign vessels, and in cars and other land vehicles, were:

FISCAL YEAR ENDED JUNE 30, 1871.

Vessels.	Imports.	Domestic exports (mixed values.	Foreign exports.
American..	$163,285,710	$180,624,658	$9,503,804
Foreign ...	363,020,044	376,476,609	16,325,326
L'd vehicles	15,187,354	5,417,384	9,380,772

FISCAL YEAR ENDED JUNE 30, 1872.

Vessels.	Imports.	Domestic exports (mixed values.	Foreign exports.
American..	$177,285,806	$161,319,869	$6,722,462
Foreign ...	445,417,279	381,620,692	12,311,355
L'd vehicles	17,684,455	6,279,157	3,735,932

It appears from the above, that of our total foreign trade in 1872, carried in vessels, about 71 per cent. was in foreign vessels, while, in 1871 it was but little over 68 per cent.

The number and tonnage of vessels engaged in the foreign trade which entered into and cleared from the United States during the fiscal year ended June 30, 1871, were as follows:

	Entered.		Cleared.	
Vessels.	No.	Tons.	No.	Tons.
American...	10 715	3,742,740	10,573	3,746,945
Foreign	19,406	6,266,444	19,288	6,151,537
Total...	30,121	10,009,184	29,861	9,898,482

FISCAL YEAR ENDED JUNE 30, 1872.

	Entered.		Cleared.	
Vessels.	No.	Tons.	No.	Tons.
American..	10,621	3,711,283	10,488	3,681,824
Foreign....	18,647	7,091,843	18,719	7,048,691
Total..	29,268	10,803,126	29,237	10,730,515

The total number of immigrants arrived in the United States during the year ended June 30, 1872, was 404,806, of whom 240,170 were males, and 164,636 females. They represent 176 occupations, summarized as follows: Professional occupations, 2,442 males and 217 females; skilled occupations, 43,164 males and 1,091 females; miscellaneous occupations, 133,989 males and 10,844 females; occupations not specified, 2,919 males and 7,126 females; without occupation (mainly women and children) 58,566 males and 145,358 females.

These immigrants come from about one hundred different countries, of which the following are the principal: From England, 69,764; Ireland, 68,732; Scotland, 13,916; Germany, 141,109.

Richmond and Petersburg Railroad.

The annual report of this company for the year ending September 30, 1872, shows that the receipts of the road from all sources for the year amounted to $160,319 47, and the expenditures $114,374 15; the receipts being in excess $12,180 36, and the ordinary expenses $10,512 less than the previous year. In addition to the amount mentioned there has been paid out for interest on bonded debt $25,345 55, and for discounts $1,482 02--making the whole expenditure for the year $141,201 72. A comparative statement of the operations of the company for the years 1871 and 1872 shows a gain of $18,804 30 in favor of the year 1871. Mr. Thos. H. Wynne continues to be president of the company.

Wilmington and Weldon Railroad Lease.

At a meeting of the stockholders of the Wilmington and Weldon Railroad Company, in Wilmington, North Carolina, on the 20th ult., the lease of the Wilmington and Weldon Road to the Wilmington, Columbia and Augusta Railroad Company was ratified by the stockholders of the first named company under the following resolution, offered by B. F. Newcomer, and adopted by a stock vote of 10,655 for, to 125 against, to wit:

WHEREAS, At a meeting of the Board of Directors of this company, held on the 24th day of May, 1872, the preamble and resolution following was adopted, that is say:

WHEREAS, It is deemed that the interests of the stockholders of this company would be greatly promoted by effecting a lease of the road and its equipment and property to the Wilmington, Columbia and Augusta Railroad Company; therefore be it

Resolved, That a committee be appointed by the President to confer with the President and Directors of the W., C. & A. R. R. Company, or a committee of the same, to agree upon a lease of all the property of the company to said W, C. & A. R. R. Company for a term of ninety-nine years, renewable forever, upon such terms as will provide for the payment of the regular interest on all the bonded debt of this company, and the assumption of all its assets, including stock and interest in the Wilmington Railway Bridge Company, and the payment of all its liabilities other than its funded debt, and the payment to this company of five per cent. on its capital stock for the current year, and the further payment of six per cent. on its capital stock for the next year, and seven per cent. for each succeeding year during the continuance of the lease; said payment to be free or exclusive of all taxes which are now, or may at any time hereafter be imposed by the Government of the United States upon any dividend or income derived by the stockholders from capital stock in this company. Arrangements are also to be made for the lessee to provide for, and keep up the sinking fund according to the requirements of the mortgage now existing on the road, said sinking fund and all increments thereof to belong to the lessee, who is to provide for the payment and retirement of the existing mortgage debts of this company. And the lessee to obligate itself to make a consolidated mortgage bond secured by a proper mortgage on all the property and franchises of the company, to the extent of such sums as may be sufficient for the retirement of the funded debt in such sums and payable at such time after date as the lessee may elect, the same to be delivered to the lessee, who is to agree, in consideration of the delivery of said bonds, to provide for, and take care of, all the funded obligations of this company, now amounting to $1,620,000, as the same shall mature. Said lease, agreed upon on the part of the President and Directors of both companies, to be subject to the approval and ratification of the stockholders, or a majority of the stock in each company. Provision is also to be made to keep and continue the organization and charter of this company. Ample provision for a betterment clause it also to be made."

AND WHEREAS, In accordance with said resolution, after their conference between duly constituted committees, severally appointed by the respective Boards of Directors of the W., C. & A. R. R. Co. and of this company, an instrument of a lease of the property and franchises of this company, as contemplated and proposed by the said resolutions, has been carefully drawn, and after receiving the diligent scrutiny of the Board of Directors of this company, is recommended for acceptance by the stockholders of this company, and said instrument of lease having been read and considered by this meeting, in which a large majority in the interests of the stockholders of this company is represented, it is, therefore,

Resolved, That the action of the Board of Directors of this company, in the premises, is hereby approved and ratified, and that the stockholders of this company assent to the lease of the railroad and other property, effects and franchises of this company, to the W., C. & A. R. R. Company, on the terms and conditions set forth in the instrument of lease this day read to the stockholders, and the Board of Directors of this company is hereby instructed to cause said lease to be duly executed and delivered in behalf of this company.

The meeting then adjourned.

At a meeting of the stockholders of the Wilmington, Columbia and Augusta Railroad Company, pursuant to call in the same city and on the same day, in a convention of stockholders representing 2,855 shares, the whole number of the shares being 3,000, the acceptance of the lease was ratified under the following resolution, offered by B. F. Newcomer, which was adopted *nem con*:

Resolved, That the lease of the W. & W. R. R. Co. to this company, of its railroad and the property, effects and franchise, on the terms and conditions set forth in the instrument of lease this day read to the stockholders, and which has this day been ratified and confirmed by the stockholders of the W. & W. R. R. Co., be, and the same is hereby, assented to and accepted by the stockholders of this company, and the President of this company is hereby instructed to join in the execution of the same in behalf of this company.

The meeting then adjourned.

The action of these respective companies is, in effect, a consolidation of the whole railroad line from Augusta to Weldon under one management. The effects of this consolidation cannot be otherwise than favorable to the interests of Augusta—bringing her in close connection with the ports of Wilmington and Norfolk, and giving her quick and rapid transportation, both for freight and passengers, over a line of nominal grades and remarkably free from curves.

Cairo and Fulton Railroad.

Our people have so long looked upon the completion of the Cairo and Fulton railroad as a thing to be accomplished in the distant future, that it is difficult for them to realize the fact that its early completion is now as certain as any event involved in futurity. Work is now progressing on the road south of Little Rock to an extent that warrants the belief that by the middle of next summer we will hear the whistle of the locomotive at this place. We are informed that contracts for grading the entire line from Little Rock to Fulton have been let, and that hands are now at work all along the line from Little Rock to Rockport, and as fast as they can be spared from the work on the other end of the line they are transferred to this, and by the 1st of January all the hands that can be worked to advantage will be employed on the southern end of the line. On Saturday last a number of hands were in this place for the purpose of commencing work from here towards Fulton. An agent of the contractor was also in town, engaging lumber for shanties, and also hiring workmen to put them up. We learn that these hands stated that a large force would soon be at work this side of Rockport, coming this way. This looks like business, and that the early completion of the road is no longer problematical, but a fixed fact.—*Arkadelphia Standard*.

☞ The last rail has been laid of the Burlington, Cedar Rapids, and Minnesota Railroad, on the extension to the Iowa River, (south of Iowa City,) which completes the Muscatine connection. Trains are now running the entire length.

The Steam Canal Boat "Baxter."

It would seem at last that the work of the canal horse is done. The problem of steam power as a motor for canal boats has been solved. The State of New York offered a price of $100,000 to whoever should invent and construct a steam canal boat which should fulfill certain specified requirements. Many skilful inventors attacked the task, and one has succeeded. The canal boat Baxter has conquered every difficulty and claims the prize. Competent and disinterested judges say that every condition specified has been met, and that the commissioners must yield the Baxter her claim. This boat, which has been in successful operation since the first of October, makes the round trip from Buffalo to New York and return in less than fourteen days, while boats towed in the usual way consume thirty days in doing the same service. Instead of eight trips in the season the Baxter will make sixteen. Nor is this all. The cost of coal, engineer and firemen is less per mile by just one half than the cost of teams and drivers. So the steam canal boat saves at both ends, in time and in cost per mile.

It will thus be seen that the capacity of the Erie canal is more than doubled by the introduction of steam. If it could carry from Buffalo to New York in a single season 48,309,410 bushels of grain, it can be made to carry next year 100,000,000 bushels by merely converting its present tow boats into propellers. What the precise model of the Baxter engine is, what its cost and dimensions, or its susceptibility of being applied to boats already built on the old plan, we are not definitely informed. But inasmuch as all these points were to be considered by the inventor who should gain the $100,000 prize, it may be presumed that the Baxter is satisfactory in all respects. So there will be a grand rattling and thumping of workmen and boat builders from Buffalo to Albany this winter. Engine builders will be pushed to their utmost to supply machinery for the boats, and when spring shall open the Erie canal will bear upon its busy waters a fleet whose advent will be a revolution in the annals of inland transportation. So everywhere, in street railways and on canals, steam is coming to do the heavy, wearing work, and the long abused horse, beaten and overworked in the vain effort to keep pace with the requirements of modern progress, will be withdrawn from the tow paths and railway to the lighter and more humane duties of every-day life. Steam street cars and canal boats are as certain factors in the logistics of the future as are steamships and locomotives in those of the present.—*Cleveland Leader.*

Finances of the United States.

EXTRACT FROM THE ANNUAL REPORT OF THE SECRETARY OF THE TREASURY.

The moneys received and recovered into the Treasury during the fiscal year ended June 30, 1872, were:

From customs	$216,370,286 77
Sales of public lands	2,575,714 19
Internal revenue	130,642,177 72
Tax on national bank circulation, &c.	6,523,396 39
Repayment of interest by Pacific Railway companies	747,861 87
Customs, fines, &c.	1,136,442 34
Fees—Consular, patent, land, &c.	2,284,095 92
Miscellaneous sources	4,412,254 71
Total ordinary receipts	$364,694,229 91
Premium on sales of coin	9,412,637 65
Total net receipts	$374,106,867 56
Balance in Treasury, June 30, 1871, including $18,228 35 received from "unavailable"	109,935,705 59
Total available cash	$484,042,578 15

The net expenditures by warrants during the same period were:

For civil expenses	$16,187,059 20
Foreign intercourse	1,839,369 14
Indians	7,061,728 82
Pensions	28,533,402 76
Military establishment, including fortifications, river and harbor improvements, and arsenals	35,372,157 20
Naval establishment, including vessels and machinery and improvements at navy-yards	21,249,809 99
Miscellaneous civil, including public buildings, light-houses, and collecting the revenue	42,958,329 08
Interest on the public debt	117,357,839 72
Total exclusive of principal and premium on the public debt	$270,559,695 91
Premium on bonds purchased	6,958,266 76
Redemption of the public debt	99,960,253 54
Total	$106,918,520 30
Total net disbursements	$377,478,216 21
Balance in Treasury June 30, 1872	106,564,356 94
Total	$484,042,573 15

From the foregoing statement it appears that the net reduction of the principal of the debt during the fiscal year ended June 30, 1872, was $99,960,253 54. The sources of this reduction are as follows:

Net ordinary receipts during the year	$364,694,229 91
Net ordinary expeditures, including interest on the public debt.	270,559,695 91
Leaving a surplus revenue of	$94,134,534 00
Add amount received from premium on sales of gold in excess of the premium paid on bonds purchased	2,454,370 89
Add the amount of the reduction of the cash balance at the close of the year, as compared with same at commencement of year	3,371,348 65
Total	$99,960,253 54

This statement treats solely of the principal of the public debt by the monthly statement of the public debt, which includes the principal interest due and unpaid, and interest accrued to date not due, and deducts the cash in the Treasury as ascertained on the day of publication: the reduction was $100,544,491 28. The source of this reduction is as follows:

Reduction in principal account	$99,960,003 54
Reduction in unpaid interest account	3,330,952 96
Total	$103,290,956 50
Reduction in cash on hand	2,746,465 22
Total	$100,544,491 28

A comparison of the reduction in the principal account, as shown by the above tables, discloses a difference of $250, occasioned by an error recently discovered, and which is fully explained in a note on page six of the appendix to the report. On the basis of the last table, the statements show a reduction of the public debt from March 1, 1869, to the present time as follows:

March 1, 1869, to March 1, 1870.	$87,134,782 84
March 1, 1870, to March 1, 1871.	117,619,680 25
March 1, 1871, to March 1, 1872.	94,895,848 94
March 1, 1872, to Nov. 1, 1872—eight months	64,047,237 84
Total	$363,696,999 87
And a reduction in the annual interest of	$24,177,851 00

The receipts during the first quarter of the current fiscal year were;

From customs	$57,729,540 27
Sales of public lands	797,324 37
Internal revenue	34,169,047 22
Tax on circulation, &c., of national banks	3,307,238 69
Repayment of interest by Pacific railways	119,068 79
Customs, fines, &c.	103,787 30
Consular, patent, and other fees	479 306 03
Proceeds of Government property	336,801 88
Miscellaneous sources	1,346,257 47
Net ordinary receipts	98,388,397 16
Premium on sales of coin	2,426,736 91
Total receipts	$100,815,134 07
Balance in Treasury June 30, 1872, including $1,014 48 received from "unavailable	106,565,371 42
Total available	$207,380,506 49

The expenditures during the same period were as follows:

For civil and miscellaneous expenses, including public buildings, light-houses, and collecting the revenues	$18,299,891 28
Indians	3,037,343 88
Pension	9,135,389 71
Military establishment, including fortifications, river and harbor improvements, and arsenals	12,876,982 41
Naval establishment, including vessels and machinery and improvements at navy-yards	7,805,146 48
Interest on public debt, including Pacific Railway bonds	36,196,894 83
Total, exclusive of the principal and premium on public debt	$86,851,648 54
For premium on purchased bonds	1,702,568 51
For net redemption of the public debt	16,932,132 72
Total	$18,634,707 25
Total net expenditures	105,486,355 79
Balance in the Treasury Sept. 30, 1872	101,894,149 70
Total	$207,380,505 49

For the remaining three-quarters of the current fiscal year it is estimated that the receipts will be:

From customs	$135,000,000
Sales of public lands	1,500,000
Internal revenue	74,000 000
Tax on national banks	3,000,000
Pacific railways	500,000
Customs, fines, &c.	800,000
Consular, patent, and other fees	1,700 000
Sales of public property	600,000
Miscellaneous sources	1,400,000
Total	$218,500,000

For the same period it is estimated that the expenditures will be:

For civil expenses	$13,000,000
Foreign intercourse	900,000
Indians	4 000,000
Pensions	20,000,000
Military establishment	23,000,000
Naval establishment	13,500,000
Miscellaneous civil	27,800,000
Interest on the public debt	71,500,000
Total	$173,700,000

This will leave $44,800,000 surplus revenue applicable to the purchase or redemption of the public debt. The amount required for this purpose under the Sinking Fund law for the year will be about $29,200,000. It is estimated that the receipts for the fiscal year ending June 30, 1874, will be:

From customs	$200,000,000
Sales of public lands	3,000,000
Internal revenue	103,000,000
Tax on national banks	6,300,000
Pacific railways	900,000
Customs, fines, &c.	1,100,000
Consular, patent, and other fees	2,300,000
Sales of public property	1,500 000
Miscellaneous sources	2 200,500
Total	$320,300,000

The foregoing estimates are based upon the amount of revenue collected since the acts of May and June, 1872, went into operation, but the imports have been large, and considerable sums have been obtained by internal revenue officers on account of old taxes and claims, hence it will be wise to leave the source of revenues undisturbed for the present session.

It is estimated that the expenditures for the same period will be:

For civil expenses	$18,000,000
Foreign intercourse	1,325,000
Indians	5,700,000
Pensions	30,500,000
Military establishment, including fortification, river and harbor improvements and arsenals	26,000,000
Naval establishment, including vessels and machinery and improvements at navy-yards	32,500,000
Miscellaneous civil, including public buildings, light-houses, and collecting the revenues	41,500,000
Interest on the public debt	98,000,000
Interest on Pacific Railway bonds	3,875,000
Sinking fund	29,200,000
Total	$286,600,000

—leaving the estimated surplus revenue $33,700,000.

The estimates received from the several executive departments show that the following amounts will be required for the same period:

Legislative	$2,973,274 40
Executive	17,129,261 90
Judical	3,587,050 00
Foreign intercourse	1,326,754 00
Military	32,894,854 84
Naval	20,154,220 15
Indians	5,700,975 28
Pensions	30,500,000 00
Public works	29,687,345 69
Postal deficiency	6,310,602 00
Postal subsidies	1,100,000 00
Miscellaneous	9,596,974 52
Permanent	16,293,163 49
Interest on public debt	98,000,000 09
Interest on Pacific Railway stocks	3,877,410 72
Sinking fund	29,191,369 28
Total	$308,323,256 27

The reduction in taxation since the close of the war is estimated to have been:

In internal revenue—	
By the act of July 13, 1866	$65,000,000
By the act of March 2, 1867	40,000,000
By the act of Feb. 3 1868	23,000,000
By the acts of March 31, 1868, and July 20, 1868	45,000,000
By the act of July 14, 1870	55,000,000
By the act of June 6, 1872	20,651,000
Total of internal revenue	$248,651,000
In Customs—	
By the act of July 14, 1870	$29,526,410
By the acts of May 11, 1872, and June 6, 1872	31,172,761
Total of Customs	$60,699,171

—A total reduction of $309,850,171.

Since the institution of the sinking fund, in March, 1869, and in accordance with the act of Feb. 25, 1862, there has been purchased on this account up to and including June 30, 1872, $99,397,600, in bonds of the various issues known as five-twenties, at a net cost in currency of $110,997,185 89, or an estimated cost in gold, of $94,097,243 82. In addition to the purchases for the sinking fund, bonds have been purchased to the amount of $173,237,950 at a net cost in currency of $195,008 288 53, or an estimated cost in gold of $163,376,054 35. The cost of these bonds estimated in gold has varied from 82.21 per 100 to 99.99 per 100, the most recent purchases being at the rate of 98.66 per 100. The average cost in gold of the whole amount of the purchase up to and including the last day of September was 94.64 per 100.

Commerce of New York.

The foreign imports at New York for the month of October, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$17,423,743	$15,342,844
Do. for warehousing	10,315,541	8,446,254
Free goods	2,300 611	6,867,654
Specie and bullion	605,862	262,946
Total entered at port	$30,645,757	$30,919,698
Withdrawn fr. wareh'use	10,862,097	11,699,337

The foreign imports at New York for the ten months from January 1, were:

	1871.	1872.
Entered for consumpt'n.	$182,520,289	$174,634,901
Do. for warehousing	121,668,706	156,435,717
Free goods	24,884,789	44,866,612
Specie and bullion	6,192,628	5,265,429
Total entered at port	$335,266,412	$381,202,659
Withdrawn fr. wareh'se	109,487,119	139,562,819

The duties received at New York for ten months from January 1, were:

	1871.	1872.
Six months	$73,692,107 93	$73,822,709 76
In July	11,934,957 33	7,251,160 35
In August	16,932,839 65	19,835,156 81
In September	15,733,891 86	13 274,126 81
In October	12,066,671 28	10,655,390 80
Ten months	$130,360,468 05	$124,338,544 53

The exports from New York to foreign ports in the month of October, were:

	1871.	1872.
Domestic produce	$21,755,792	$24,374,195
Foreign free goods	15,092	108,660
Do. dutiable	585,343	641,894
Specie and bullion	2,086,891	4,729,143
Total exports	$24,443,118	$29,853,892
Do. exclusive of specie	22,356,227	25,124,749

The exports from New York to foreign ports for ten months from January 1, were:

	1871.	1872.
Domestic produce	$188,170,453	$182,476,854
Foreign free goods	1,011,954	1,256,003
Do. dutiable	6,479,259	8,059,904
Specie and bullion	59,706,815	63,111,513
Total exports	$255,368,481	$254,904,274
Do. exclusive of specie	195,661,966	191,792,761

☞ The Springfield *Union* says that the track of the Ware River Railroad at Palmer will probably be extended a few rods and be made to connect with the Boston and Albany Railroad, instead of the New London Northern, and that a lease of the Ware river road to the Boston and Albany will speedily be executed.

☞ Work on the Baltimore and Potomac Railroad, south of Marlboro', is being pushed forward, says the Port Tobacco *Times*, so that at least one train of cars for passengers daily between Pope's Creek and Baltimore will be run about the 10th of December.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 per cent.
GOLD BONDS.
$3,500,000.

This is an EAST AND WEST ROAD RUNNING ON THE 40TH PARALLEL FROM INDIANAPOLIS, IND., TO DECATUR, ILL., 152 miles; through the richest agricultural and mineral country of both states; and connecting at termini with the GREAT THROUGH ROUTES to the East and West.

It is the only East and West road in a belt averaging 30 miles wide, and passes through the best part of the rich

BLOCK COAL FIELD

of Indiana, in which the COMPANY OWNS 2,000 ACRES OF BLOCK COAL LANDS. It owns, also, 90,000 acres of Farming lands.

$1,400,000 IN CASH HAS BEEN ALREADY EXPENDED ON THIS ROAD, of which 30 miles in Illinois are finished and in operation. Fifty-five miles more, completing the Western Division, Decatur to the Coal Fields, will be completed this fall and the whole road in 1873.

Upwards of TWO MILLIONS OF DOLLARS more are pledged to the enterprise, partly by counties, towns and individuals along the line, but chiefly by wealthy capitalists, among whom are W. H. GUION (of WILLIAMS & GUION), SIDNEY DILLON, JAY COOKE & CO., CLARK, DODGE & CO., J. & W. SELIGMAN, VIBBARD, FOOTE & CO., and PAUL S. FORBES, of New York, BENJ. E. BATES, of Boston, HENRY LEWIS, of Philadelphia, and GEO. M. PULLMAN, of Chicago.

Bonds $1,000 each, payable in 30 years, principal and interest in *Gold, free of Government Tax.* Sinking Fund 2½ per cent. on Gross Earnings.

For sale at 90 and accrued interest by the Financial Agents of the Co. (of whom pamphlets and information may be obtained.)

Walker, Andrews & CO.,
NO. 14 WALL STREET.

☞ The Philadelphia *Ledger* of 2d inst., reports the net anthracite coal tonnage for the week ending on the 23d ult., from all sources, at 282,974 tons, and for the year 17,911,277 tons, against 14,270,578 tons to the same date last year, being an increase in the tonnage of anthracite coal of 3,640,699 tons. The production of bituminous coal for the week was 55,355 tons, and for the year 2,323,604 tons, against 2,023,712 tons to the corresponding time last year—an increase of 299,992 tons. The total production of all kinds of coal for the week was 397,963 tons, and for the year 20,244,871 tons, against 16,294,290 tons to corresponding time last year, showing an increase of 3,950,591 tons.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.
1867	38,169	51,831	60,029	81,156	95,828	121,702	174,812	181,297	200,550	212,109	128,166	75,871	1,470,663

American Railroad Journal.

Saturday, December 7, 1872.

Stock Exchange and Money Market.

Money has been in quite active request for speculative use, throughout the week, and the ruling rate to the leading street borrowers has been 7 per cent. currency and gold. Private lenders have been rather less liberal of aid. The city banks have been somewhat freer in their advances. The market throughout has been a firm one as against parties in need of aid. The discount movement has been comparatively close, though the best grades of business paper met with a freer sale within the range of from 10 @12 @15 per cent. per annum. The President's annual message, and the accompanying documents, especially the report of the Secretary of the Treasury, have been chief topics of remark in financial and business circles, and generally treated with favor. The death of Mr. GREELEY, founder and editor of the *Tribune*, elicited an unanimous expression of sorrow and sympathy. At the close, Money was working somewhat sharply against speculative borrowers. The last bank statement was deemed encouraging. Our city banks have been gainers in the line of their legal tender reserve, and also in their specie average. Their deposit line has been augmented handsomely. They enlarged their loan and discount slightly. The U. S. Sub-Treasury added to its coin reserve about ¼th of a million and reduced its currency balance about an eight of a million.

The Secretary of the Treasury calls in the three-per-cent. certificates from November 7, 1868, to November 22, 1868, of the denominations of $5,000 each, numbered from 5,178 to 5,403, inclusive, and of the denomination of $10,000 and numbered from 4,801 to 4,822, inclusive. The amount of the certificates described is $850,000, upon which the interest ceases January 31, 1873.

The aggregate of U. S. currency outstanding on the 1st, inst. was $402,607,633.

The receipts of the United States Sub Treasury, in this city, in November, from all sources, were 44,708,140, including $7,747,001 in coin from customs; payments, $55,092,365, including $6,957,-456 of coin interest.

The U. S. Sub-Treasury office last week received $4,536,859 of currency, and $3,388,149 of gold, the latter including $1,181,000 from customs; and disbursed $3,680,903 of currency and $3,182,447 of gold, the latter embracing $624,045 of coin interest. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $22,-033,955 and a coin reserve of $44,308,802.

The city banks, in their latest return, show an increase of $1,270,200 of legal tender notes, of $846,000 of specie, of $2,263,700 in their deposits, and of $95,700 in their loan and discount averages, with a decrease of $5,900 in their item of circulation. The city bank exchanges, last week, averaged 135⅝ millions. The banks now hold $2,745,150 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $12,947,200, against $18,-074,700 same time last year. The city bank deposits are now $201,915,300 against $223,514,500, week ending Dec. 2, 1871. The legal tender reserve amounts to $47,169,500, against $52,408,900 same time last year. The circulation now stands at $27,570,900 against $30,106 900 same time last year. The loans are now $276,560,000 against $292,316,900 at this date last year.

The coin reserve of the city banks is now slightly under 13 millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 47⅛ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now about 202, millions, against 247½ millions on the 20th of July.

Government revenues have been on a limited scale, since our last. The excises yielded within the week about two millions and thus far in the current fiscal year beginning with July 1, 1872, $53,289,548. The customs at the port of New York last week were $1,092,956, and at the outports, equal to about $350,000, all in coin or coin certificates.

Gold has been moderately active, through the the week, the inquiry having been mainly on speculative account and the export and customs call having been light. The price was steadier than usual of late, and the market closed firm. The range of the price during the week has been

from 112½@113⅛, and the quotation on Wednesday was 112¾ against 112⅞ the preceding Wednesday. The specie outflow last week, was only $470,171. The Gold Exchange Bank clearances have averaged about 55 million per day during the week.

The Treasury Department proposes to buy $4,000,000 of 5-20s during December and sell $4,000,000 gold, one million each week, on the usual days excepting, of course, holidays.

The customs demand for Gold last week, averaged $236 200 a day. The arrivals of specie from Europe, Havana and other foreign ports since Jan. 1, 1872, were $5,347,772 against $8,409,313 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $136,867,270 against $146,253,017 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $72,335,357, against $80,657,990 during the same time in 1871.

The export drain of specie was $470,171 last week, against $556,614 same week preceding year. The shipments since January 1, 1872, have been $67,561,700 against $60,157,277 during the same portion of 1871.

Foreign Exchange has been in rather more demand and somewhat stronger and steadier as to price. Bankers' sixty day bills on London closed on Wednesday at 108½@108¾; sight bills on London, 110@110¼. The week's exports of domestic produce were to the currency value of $4,344,898.

Government securities have been in more confident request, chiefly for investment purposes, at stronger prices, especially the later issues of the Five Twenties, which closed buoyantly. The public debt statement for Dec. 1, indicated a further liqudation of $1,198,229 in November.

On Wednesday, Government bought in $560,600 of the offered Five-Twenties at from 112 62 @112 74. The aggregate offering was only $820,300 @112 59@112 99.

U. S. sixes of 1881 at the opening on Wednesday of the current week were quoted at 117⅛@117⅜; U. S. Five-Twenties of 1862, 112⅞@113⅛; U. S. Five-Twenties of 1864 at 112⅞@113⅛; U. S. Five-Twenties of 1865, 113⅛@113⅜; U. S. Five-Twenties of 1865 consolidated, 115⅛@115¾; U. S. Five-Twenties of 1867, 116⅜@116½; U. S. Five-Twenties of 1868, 115¾@116; U. S. Ten-forties at 109¼@109⅜; U. S. Fives of 1881 (Funding Loan) 110@110⅛; Six per cent. currency Sixes from 112¼@112⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 20.	Nov. 27.	Dec. 4.
Consols	92½	92¾	91⅞
U. S. 5-20s, 1865	90½	91⅛	91⅝
" 1867	93	93⅜	94
" 10-40s	87¼	87½	88¼
New Fives of 1881	88½	88½	88⅞
Erie	41½	41⅜	42½

State bonds have been in fair investment demand and quoted somewhat steadier in price though the activity in Money was against free dealings.

Dispatches from the New River Division of the Chesapeake and Ohio Railroad state that the gap separating the Eastern from the Western Division, both of which are in operation, is now only 20 miles, and is being steadily reduced. Early in the new year, therefore, this line will be in continuous operation from the Richmond wharves to the Ohio River at Huntington, a distance of 420 miles.

Railway and Miscellaneous share property has been quite active and generally quoted stronger, though toward the close the market was variable and somewhat heavy.

Railway Mortgage Loans have been more sought after, on investment account and generally quoted firm. Central Pacific Sixes closed at from 100⅛@101½.

The Metal interests have been unusually tame, and much depressed. Copper has been dull and unchanged; 100,000 lbs. Ingot sold at 31c., cash, and 50 tons English, part to arrive, at 28½c. per lb. Iron has been very dull and quoted lower with Eglington Pig at $45@$46; Glengarnock at at $47@$46; No. 1 Lehigh Pig at $50@$52; No. 2 at $49@50; English Rails at $70@$72, (gold,) and American Rails at $82@$85. Pig lead has been more active, 200 tons ordinary foreign having been sold at 6½c.@6⅝c., gold per lb. Spelter and Zinc have been inactive and somewhat nominal as to price. Tin depressed and again quoted cheaper, with Straits and English at 29½c. @30c., gold; I. C. Charcoal Plates at $10 25@$10 50; Charcoal Terne at $9@$9 75; I. C. Coke at $8 50@$9 50, and Coke Terne at $8@8 75, gold, per box. Sales, 50 slabs Straits on private terms; 300 boxes I. C. Charcoal Plates at $10 50, gold, for 10x14, and 250 boxes Charcoal and Terne, on private terms.

General business has been much less active, outside of a few leading articles of domestic produce. Breadstuffs closed steady; Provisions weak. Middling upland cotton, left off on Wednesday at 19½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,213,574 bales, against 947,523 bales same time in the preceding year; exports 528,700 bales against 401,800 bales in the previous year; stock at the ports at latest dates, 422,200 bales against 378,900 bales same date 1871.

At the Live Stock Markets, Beeves have been in good demand at from 7@15 cts.; Veals in less request at 6@10½ cts.; Sheep more sought after at from 4@7 cts.; Lambs 6@8½ cts.; Swine, at 4⅝@4⅞ cts. per lb., all live weight. The week's receipts were 7,351 Beeves, 1,821 Veal Calves, 30,950 Sheep and Lambs, and 59,809 Swine.

Foreign goods have been moderately dealt in at about former prices as a rule. Sugars declined ¼ct. per lb. The week's imports of foreign goods reached the amount of $6,253,692, including $1,230,080 of dry goods.

Ocean freights have been more active and quoted firmer with the demand for room chiefly for Cotton, Grain, Flour, Tobacco, Provisions and Petroleum.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

A Narrow Gauge Mountain Railroad.

Work has at last begun in good earnest on a narrow gauge railroad to connect the mining district of Little Cottonwood with the Utah Southern. The practicability of such a road has elicited considerable discussion and has been doubted by many; but the report of the engineers who have been employed by the new corporation sets all doubts at rest. From the initial point at Sandy Station to the mouth of the canon the grade is 146 feet to the mile and very gradual. Up the canon to Alta it varies from 150 to 333 feet to the mile, which is to be considerably lessened by back-switching. Several miles will thus be added to the length of the line, which will be abundantly compensated by the lessened grade.

The road bed up the canon will be generally elevated above the wagon road, and will be constructed chiefly on the north side of the defile to secure the benefit of sunshine in keeping the track clear of snow in winter. Sheds will also be employed wherever necessary. By these means it is expected to keep the road open for traffic through the severest winters.

The locomotives ordered are of peculiar construction, having great steam capacity with less than the usual weight of iron. In these machines mechanical adhesion or traction takes the place of adhesion induced by the weight of the locomotive. This is effected by the application of a very simple and ingenious device, the invention of Col. James S. French, formerly president of the Washington and Alexandria railroad, running over the Long Bridge from the District of Columbia to the Virginia side of the Potomac. A third or supplementary pair of driving-wheels is swung in the rear of the ordinary drivers, and connected with the latter so as to revolve at the same rate of speed. These additional drivers have a grooved tread, and are hung in such a manner as to be lifted from contact with the track, at the will of the engineer. In climbing grades or starting trains the grooves sit astride the rail and compel advance motion with each revolution of the drivers, instead of allowing the wheels to "slip" as is ordinarily the case with heavy trains and steep grades. Numerous vexatious delays are thus avoided and greater rapidity of transit is secured. The invention has been tested on the Baltimore and Ohio railroad with very satisfactory results.—*Deseret News.*

Big Sandy Valley Railroad.

The stockholders of this company, at their meeting in Covington, Ky., on the 14th ult., completed their organization by electing the following named gentlemen Directors: James H. Laws, Cincinnati; Hon. C. H. Howland, St. Louis, Mo.; Grid. S. Shwenk, Nashville, Tenn.; D. E. Small, York, Pa.; E. Hulbert, Atlanta, Ga.; Hugh Colville, Cincinnati; O. D. Campbell, Cincinnati.

At a subsequent meeting of the Directors they organized by electing J. H. Laws, President; C. H. Howland, Vice President; Hugh Colville, Treasurer; B. F. Babcock, Secretary.

The *Railroad Record* says that this road, in connection with the Kentucky and Great Eastern, now under new management, will solve the coal question for Cincinnati.

Their engineers are already on the line, and work is being pushed energetically.

☞ The fourth instalment of $100 per share on 1,477 shares ($738,500) Boston and Lowell Railroad new stock (par $500) voted February 6, 1871, became due December 1. The fifth and last falls due July 1, 1873. Seven per cent. is paid on the instalments, or 6 per cent. on any sums anticipated.

Railroad Appointments.

Mr. Charles E. Graham has been appointed Assistant General Manager of the Western Division of the Pittsburg, Fort Wayne and Chicago Railway, from Crestline to Chicago; the Grand Rapids and Indiana Railroad; The Michigan Lake Shore Railroad, and the Cincinnati, Richmond and Fort Wayne Railroad, with his office at Fort Wayne, Indiana.

Mr. J. D. Layng has been appointed General Manager of the Eastern Division of the Pittsburg, Fort Wayne and Chicago Railway, from Pittsburg to Crestline; the Ashtabula, Youngstown and Pittsburg and the Erie and Pittsburg Railroads; and of the construction of the Mansfield and Lake Michigan and the Tiffin and Toledo Railroads, with his office at Pittsburg.

Mr. George Webb has been appointed Assistant General manager of the Pittsburg, Cincinnati and St. Louis Railroad, vice J. D. Layng, resigned, his office to be at Pittsburg. The appointments take effect December 1, 1872, by order of J. N. McCullough, General Manager.

Kentucky and St. Eastern Railroad.

This company has been organized by the election of Hon. Nathaniel Sands, president, and H. R. Hulbard, Treasurer. The Cincinnati *Railroad Record* says that this road, when constructed, will be the best and most important coal road that can be made to Cincinnati. Running up the south bank of the Ohio river to Catlettsburg, it will meet all the wants of the West Virginia and Big Sandy coal traffic, better and cheaper than any other line. Besides, with the construction of branch lines through Mason and Fleming counties to Rowan, coal can be reached within one hundred miles of the city, with a down grade all the way, from as good coal banks as can be found anywhere.

☞ The earnings of the Union Pacific Railroad for October 1872, were $980,706 11; and the expenses, $538,878 35—leaving net earnings $441,827 76. In October, 1871, the earnings were $777,362 96, the expenses, $395,322 31, and the net earnings $382,040 65—showing an increase in earnings of $203,343 15, in expenses of $143,556 04, and in net earnings of $59,787 11.

☞ W. A. Gunn, chief engineer of the Cincinnati Southern railroad, assures the Chattanooga *Times* that the road will positively be commenced by next spring, but says that the route has not yet been decided upon. He intimated, however, that the work of construction would be commenced at both ends.

☞ We understand that the railroad bridge across Lake Champlain at Ticonderoga and lease of the railroad to Port Henry, held by the Vermont Central Railroad Company (recently suspended), has been sold to the Delaware and Hudson Canal Company, and the construction of a railroad along side of that road has been discontinued.

☞ At a recent meeting of the directors of the White River Valley and Texas railroad company, at Duvall's Bluffs, Ark., J. G. Botsford was elected president of the company, vice W. C. Hazledine, resigned. We understand there is some prospect of work being resumed on this enterprise at an early day.

Journal of Railroad Law.

RAILROAD COMPANIES—RIGHT TO EJECT PASSENGER FROM CAR UPON REFUSAL TO PAY CERTAIN FARE.

The late case of Jackson *vs.* The Second Avenue Railroad Company, (47 N. Y., 274,) was an action of assault and battery brought against the defendants, the railroad company and one John Roe, who is stated in the title to be thus named because his real name was not known, the conductor being intended.

The plaintiff in the fall of 1864, got into one of the company's cars at Peck slip, intending to get out at Fifty-ninth street. The fare to Forty-second street was five cents; above that by the charter, it was ten cents. Plaintiff tendered five cents fare. The conductor asked him six cents. Plaintiff asked for an explanation, and the conductor told him the fare had been raised to six cents, and pointed out to him a placard to the effect posted in the car. Plaintiff immediately "told the conductor he was not going to pay him six cents; that his fare was five cents and that was all he could get." The conductor caught him around the waist and stopped the car th put him out. Plaintiff refused to leave the car, and resisted. Conductor told him he would put him out if he did not pay the other penny. This he refused to do, and conductor collared him. Plaintiff seized the handle of the door to prevent being put out. The conductor then struck him one blow on the nose which abrazed the skin and caused it to bleed.

The conductor proceeded no further in his attempt to eject him, and the plaintiff quietly rode to Fifty-ninth street, where he got out.

The following is the opinion of the court delivered by—

FOLGER, J.—If it be assumed as I think it may be, that the defendants' conductor had been instructed by them to demand of every passenger six cents as fare, and that he was also instructed and authorized by them to remove from the car any passenger who refused to pay that sum, then in this case the conductor was acting in the line of his duty to them and of his authority from them in attempting to remove the plaintiff from the car. The six cent fare had been demanded of the plaintiff; he had refused to pay it, he had been told that he would be removed unless he paid it and he still refused. The conductor then seized him, and attempted his removal, and while thus engaged struck the blow more particularly complained of. It cannot be doubted but that the defendants are so far responsible for the act of the conductor, their agent, that if they had not the right to demand the six cents fare, and hence had not the right to remove any passenger from their car for not paying that sum, they would have been liable for any force used by their agent upon the person of such passenger, though confined strictly within a degree necessary to effect such removal, and used solely for that purpose and with that intent. And for the reason that he was in their business, using a physical force upon another which he had no right to exert, and which they had no right to instruct and authorize him to exert, and any force was an excess of right. Does it not follow, that where they have the right to instruct and authorize to the use of force, and their agent acting in the pursuit of his duty to them, and under authority which they have given, exceeds through zeal or impetuosity of temper, the degree of force necessary and proper to accomplish the purpose, and injury and damage ensue, that they must respond? So we have held in Higgins *vs.* The Watervliet T. and R. Co. (46 N. Y. 23.) But it is said that the act of the conductor in striking the plaintiff a blow in his face was willful and malicious; that it was not done by him because he unmistakeably conceived it a necessary use of force to effect the removal of the plaintiff, but as a wanton act of rage and passion.

This it appears to us was a question to be decided. And conceding the law to be clear that the defendant would not have been liable for the act of the conductor if it was willful and malicious on his part, still it was a question of fact.

It appears from the printed case that the motion to dismiss the complaint was made on the ground, that the principal is not liable for the tort committed by the agent or servant, except it occurs in the immediate discharge of duty by the servant, or is authorized. As the motion was granted, it must have been assumed that the testimony showed that the act of the conductor was a tort, which did not occur in the immediate discharge of his duty, and was not authorized. But the testimony is not so clear as that the court could pass upon it without committing it to the jury for their consideration. From the testimony as it appears to us in print we could not so determine. On the contrary, the act of the conductor presents itself to us as one done without malice or ill feeling toward the plaintiff, but deemed by him necessary to effect the purpose with which he thought himself charged in the proper performance of his duty. It should have been left to the jury upon all the testimony, and with proper instructions. There was error in holding otherwise.

As the defendant has given stipulations for judgment absolute, there must be judgment final for the respondents, with costs.

Judgment accordingly.

Important Decision.

One of the most important lawsuits, and which has been in litigation since 1857, has at last been decided in the Court of Appeals. The parties to the suit are the Delaware and Hudson Canal Company and the Pennsylvania Coal Company. The action was founded upon an agreement made on the 31st of August, 1847, between the first named company and what was then known as the Wyoming Coal Association, owning and operating mines in Luzerne county, Pennsylvania. The contract was for the transportation of coal for the Wyoming Association over the Delaware and Hudson Canal from Hawley, Pa., to the mouth of Rondout Creek, to be brought to Hawley by a gravity road, then constructing over the mountains from the mines at Pittston and Dunmore. The canal company agreed to carry the coal of the other company to the terminus of the canal, charging and collecting a toll of so much per ton upon the coal so transported. The amount of toll annually was to be fixed on the first day of May, and to be one-half the surplus of the average selling price per ton of the coal, $2 50 always to be deducted from such selling price as the cost to the coal company of getting a ton of coal to tide-water. A provision of the contract, and upon which the controversy occurred, was that in case the Canal Company enlarged its canal, it might charge and collect an additional toll on the coal transported at a rate per ton to be established after the completion of such enlargement.

The Pennsylvania Coal Company succeeded to all the rights and interest of the Wyoming Coal Association, by an agreement made on the 29th of July, 1851.

On the 28th of July, 1853, the canal company notified the coal company that it had enlarged its canal so as to permit the passage of boats carrying from 125 to 150 tons, instead of the former capacity of boats of fifty and sixty tons, and estimated that this change saved to the coal company in carrying its coal to tide-water forty cents per ton, which must be deducted from the former allowance of $2 50 per ton. On the 1st of August, following, the coal company replied and denied the saving alleged, but declared its readiness to have the disputed point settled by arbitration. To this the canal company agreed, and Azariah C. Flagg, and Frederick Fraley, were the next May selected as arbitrators between the parties. This arbitration resulted in nothing satisfactory, and the action just decided in the Court of Appeals was brought by the Delaware and Hudson Canal Company in April, 1857. By their complaint the plaintiffs claimed to recover additional toll, at the rate of twenty cents a ton upon 207,735 tons of coal transported by the defendants over the canal from September 15 to November 24, 1856, amounting to $41,947. They also asked that the court ascertain or determine the reduction in the cost of transportation per ton on the canal between the points named—owing to the enlargement of the canal and to no other cause—and that the amount thus ascertained might be established and adjusted for the government of the parties under the contract as to all coal transported by the defendants subsequent to the completion of the enlargement on the 29th of July, 1853. They also asked that one-half of the amount of such reduction be adjudged to be thereafter permanently chargeable as additional toll under the contract, for all coal transported by the defendants.

The Coal Company answered by denying that the enlargement of the canal had occasioned any reduction in the cost of transporting coal, and that the failure of the arbitration to settle the question was owing to the choice of the plaintiffs, and the defendants being in no default as to the determining upon the reduction, and establishing the additional toll by arbitration, the plaintiffs could not proceed by action to establish such toll or determine the reduction.

By consent of the parties the cause was referred to the late Judge Henry Hogeboom for hearing and decision upon all the issues. The testimony taken before referee filled ten large printed volumes, and his fees exceeded twenty thousand dollars. The reference overruled the positions taken by the defendants, founded upon the arbitration clause of the contract and decided many important questions of law and fact. His judgment was that the reduction in the cost of transportation occasioned by the enlargement of the canal, after experiencing the full effect of all the improvements of the canal, was ten cents a ton. The plaintiffs were adjudged entitled to charge and collect as additional toll five cents a ton upon all the defendants' coal transported after the enlargement and notice thereof, from the 28th of July, 1852, and to a money judgment of $16,481 43, with interest, but without costs to either party.

Judgment was entered; but the defendants appealed from the referee's decision to the General Term. The plaintiff also appealed, insisting that from the facts found by the referee they were entitled to charge and collect as additional toll 07.59c. a ton instead of five cents, as allowed. Both appeals were heard at the same time, and the judgment was affirmed. Both parties thereupon appealed to the court of Appeals, where the case was argued in June last. On Tuesday the the court reversed the judgment on the appeal as taken by the defendant, and affirmed the judgment on the plaintiff's appeal. The decision of the Court is unanimous and in favor of the Coal Company on all points; it is not at all probable that this matter will be carried any further. The Coal Company, congratulate themselves that they have ceased to do

much business over this route, as if they did there would be no profit.—*Saward's Coal Trade Circular, Nov.* 20.

Railroads of Iowa.

Railroad facilities are a chief consideration in business enterprise; and to the present age and generation are essential to the full enjoyment of life. And whatever advantage, commercial and social, that railroad communication can give, Des Moines enjoys with special favor. About equi-distant from the two great western business and social centers—the great and rapidly growing cities of Chicago and Saint Louis, which give healthful competition for Iowa's products, her grand trunk railways necessarily make these cities initial points. And these form their angle at Des Moines, with one arm reaching by the Chicago, Rock Island and Pacific, three hundred and fifty-seven miles east, to Chicago; the other by the Des Moines Valley and North Missouri, south-east three hundred and sixty-four miles, to Saint Louis. The great central highway of iron from the Atlantic to the Pacific coast has at Des Moines a prominent midway station. These grand trunk roads, completed, are here fed by others, in active progress, reaching from Des Moines toward every point of the compass. Northward, the Des Moines Valley, crossing the Northwestern at Grand Junction, and the Dubuque and Sioux City at Fort Dodge, is already completed eighty-nine miles. Another north road forming a link in the chain from Lake Superior to the Gulf of Mexico, is already graded almost to Des Moines, and will be pushed forward to completion. To the northeast is the narrow gauge Des Moines and McGregor road, now completed and operated a considerable distance, and which it is believed will be completed to Des Moines within another year. This road has an importance to Des Moines, which will be readily understood by reference to the important improvements now in active progress, and to be pushed forward to early completion, by the Federal Government, and when completed giving ship navigation from Iowa to New York via the great lakes. By this narrow gauge road, the new ship canal, and the lakes, Des Moines will have a direct and competing connection with New York that will be for all time a guarantee of the most favorable shipping facilities. And is is not only projected, but has been entered upon, and is of the unfinished work of the General Government, to be an accomplished fact in a very brief period of time. East—we have the great Rock Island road; south-east, the Des Moines Valley and its connections; south, the Des Moines and Indianola is completed and operated twenty-two and a half miles to the county seat of Warren county, and looking to southern extension; and between this and the Des Moines Valley is the Albia, Knoxville and Des Moines, which will give a new competing line to St. Louis, and of it its President, writing under date of Oct. 11th, 1872, says: "No one has been more disappointed than I have in regard to the delay on the railroad, and I am at work now with the hope that railroad iron will go down. ** The country demands the road." South-west, already the iron horse from Des Moines has reached Winterset, the county seat of Madison county, a distance of forty-two miles, and will be pawing the ground until Kansas is reached. West—the highway of iron extends from Des Moines as nearly to the setting sun as solid foundation can be had for a road bed, and choice of routes to the Chinese Empire is given east and west, over which a tunnel through the centre of the earth alone can give shipping advantages. North-west, the Des Moines Western, narrow gauge, on which a considerable amount of grading has been done the past season, will strike the Missouri river at Sioux City, and cross an undeveloped prairie country, susceptible of an untold wealth of agriculture, by this road made tributary to Des Moines.

By these completed trunk roads and their connections, already grand shipping and traveling facilities are had. The roads unfinished have been temporarily checked by the present high price of iron, but their early completion is guaranteed by the demands of a rapidly increasing and indefatigable population. The mineral wealth of the western mountains, the luxuries of the south, the refinements of staid eastern life, all are already here of ready and easy access; and a greater enjoyment than all these, is presented by the wealth of which the fruithful and undeveloped country, immediately around Des Moines, gives sure promise. With railroads completed and in progress, stretching from Des Moines toward every point of the compass, may not a city in her teens, with beauty and promised wealth, aim high for her future? And is she not worthy the notice of the ambitious, and active, and brave, who alone can win in life's races, and reach the goal of honorable preferment?—*Des Moines Industral Motor.*

☞ The officers of the Mexico National Railway Company in Philadelphia have received a telegram from the city of Mexico, dated November 27, by way of Brownsville, saying that the Mexican Congress passed on that day, by a majority of sixty votes, a bill authorizing President Lerdo to arrange with General Rosecranz the modifications desired to their existing concession, leaving the latter in full vigor. The company ask for a subsidy in national bonds in lieu of the land grant given them in December, 1870.

☞ The December dividend on the Vermont and Canada Railroad will be "passed," because the rent then due from the Vermont Central trustees and managers will not be paid. Interest will also be passed on the Vermont Central first mortgage bonds due December 1. The New England Trust Company will pay the coupons due December 1, on the Marquette and Ontonagon Railroad 8s, 1875, and the Marquette, Houghton and Ononagon Railroad 8s, 1892.

☞ The first rail on the line of the Montpelier and Wells River Railroad was laid in Montpelier on the 28th ult., at the place of union between that road and the Vermont Central. The work of laying the track will be vigorously prosecuted.

Board of Engineers of the Fourth Avenue Improvement.

Office Grand Central Depot.

NEW YORK, November 23d, 1872.

Notice to Contractors.

SEALED PROPOSALS FOR WORK ON THE Fourth Avenue Improvement between 49th and 79th Streets, will be received by the undersigned at this office until 2 o'clock P. M. of December 16, 1872. Plans, Specifications and blank proposals will be ready on and after the 29th inst.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

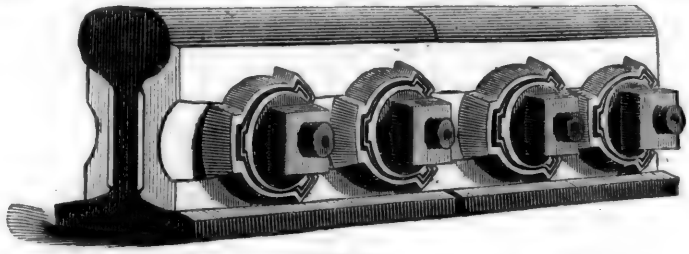
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Finances of Virginia.

The report of the second auditor of Virginia shows that on the 1st of October, 1871, there was a balance in the treasury of $1,084,486 07. The interest at four per cent. amounts to $1,207,022 15, of which amount only $502,810, 20 has been paid, leaving $704,216, 95 unpaid. The balance on hand in the treasury the 1st of October, 1871, was $1,098,499 03—with the $704,916 95 unpaid, but subject to call at any momont. That latter sum paid, there would only remain in the treasury $394,282 08 to meet the January interest. This is based on the rate of four per cent. interest. At the rate of six per cent. there would be an additional $585,188 29—which would have left the treasury with a deficit of more than two hundred thousand on the 1st of October last.

The second auditor tells us that to pay 4 per cent. Jan., 1873, and July 1873, with the balance due, will require $1,922,084. At the rate of six per cent. more than another million would be added to the amount—making a gross total of upwards of three millions to be paid in interest by the first of July, 1873. This would render necessary receipts to the amount of four and a half millions to keep the government in operation and pay the school fund, which, by the constitution, is entitled to the first dollar.

The treasurer's report shows the amount received in the treasury to the 30th of September, 1872, of $4,317,460 77. Amount disbursed, $3,218,961 74, with a balance on the 1st of October, 1872, of $1,098,499 03, as above shown.

Pittsburgh, Washington and Baltimore Railroad.

The annual meeting of the stockholders of this company was held in Pittsburgh on the 2d inst, The *Mail* says:

"The meeting was very generally attended, nearly all of the stock being represented. The financial exhibit for the year shows the gross earnings to have been $1,478,629 35, being an increase of over 50 per cent. on the previous year. Large sums of money have been expended during the year in construction and equipment, nearly the entire line from Pittsburgh to Connellsville having been relaid with a superior quality of iron, and furnished with new ties and good stone ballast. Thirteen and three-fourths miles of new sidings have been constructed and the graduation for more than five miles of double track completed. It is contemplated to finish the double track to McKeesport, during the coming spring. The company has now in use about sixty locomotives, and contracts out for the early completion of an additional number.

"The following gentlemen were elected directors for the ensuing year: Messrs. Wm. S. Bissell, G. L. B. Fetterman, Pittsburg; Cyrus Meyers, Somerset; Hugh Sisson, Hazleton G. Vickery. Wm. H. Perkins, Israel Cohen, John Donnell Smith, Wm. Keyser, Chas. Webb, Wm. Baldwin and Geo. R. Dennis, Baltimore. At a meeting of the new board of directors, Mr. Wm. Keyser was re-elected president, Mr. E. K. Hyndman, general superintendent, and Mr. C. Donnelly, treasurer.

"President Keyser made no written report, but enough was verbally submitted to show the affairs of the company are in the most prosperous condition. The receipts are almost $400,000 larger than the previous fiscal year, and one of the newly-elected directors informs us that if the receipts continue in the same ratio the ensuing year, the revenue derived will be sufficient to pay the interest of the floating debt of the company, and also to meet the current expenses of operating the road. In conversation with a gentleman whom we suppose ought to be well informed, we learn that it is the intention of the Baltimore and Ohio Company to push the Chicago extension to completion as rapidly as possible, and to that end will in the early spring begin the work of construction on the western division between Defiance and Chicago."

Coal Trade.

By an examination of the reports of the several coal carrying companies we find that the Reading Railroad returns a tonnage for the week ending on the 30th ultimo of 116,901 tons, and for its financial year to same date 6,185,708 tons, against 6,002,578 tons in corresponding time last year—an increase of 183,130 tons. The Schuylkill Canal shipped for the week 18,191 tons to same date, and for the year 838,190 tons, against 1,010,170 tons to corresponding time last year—a decrease of 171,980 tons. The Lehigh Valley Railroad reports a tonnage for the week of 49,366 tons, and for the year 8,850,118 tons, against 2,781,509 tons to same time last year—an increase of 1,068,609 tons. For the week the Delaware, Lackawanna and Western Railroad reports a tonnage of 39,642 tons, and for the year 2,686,106 tons against 1,683,295 tons to corresponding date last year—an increase of 952,810 tons. The tonnage from Shamokin for the week was 12,085 tons, and for the year 538,664 tons, against 597,143 tons to corresponding time last year, showing a decrease of 59,079 tons. The shipments by the Central Railroad of New Jersey for the week were 38 672 tons—for the year 2,426,061 tons, against 2,002,752 tons to corresponding time last year, an increase of 423,309 tons. Of the above tonnage there was sent by the Lehigh Canal 12 485 tons for the week, and for the season 766,847 tons, against 740,636 tons to same time last year—an increase of 25,711 tons. The Pennsylvania Coal Company reports a tonnage for the week of 20,950 tons and for the year 1,135,042 tons against 799,030 tons to corresponding date of last year, an increase of 406,012 tons. The Delaware and Hudson Company reports a tonnage for the week of 49,382 tons, and for the year 2,658,830 tons, against 1,728,839 tons to same time last year, showing an increase of 930,791 tons. The Huntingdon and Broad Top Mountain Railroad reports a tonnage for the week of 8,098 tons, and for the year of 284,957 tons, against 298,990 tons to same date last year, show, a decrease of 14,033 tons. The Pennsylvania and New York Railroad reports an anthracite tonnage for the week of 8 144 tons, and for the year 580,937 tons, and a bituminous coal tonnage for the week of 5,777 tons, and for the year 337,191, being a total tonnage for the week of 13,922 tons, and for the year 918,129 tons. The net anthracite coal tonnage for the week from all sources was 292,165 tons, and for the year 17,874,498 tons against 14,375,075 tons of the same date last year, being an increase in the tonnage of anthracite coal of 3,499,718 tons. The production of bituminous coal for the week was 55,770 tons, and

for the year 2,378,264 tons, against 2,064,757 tons to the corresponding time last year—an increase of 308,607 tons. The total production of all kinds of coal for the week was 344,935 tons, and for the year 20,589,816 tons, against 16,439,832 tons to corresponding time last year, showing an increase of 4,149,984 tons.—*Phila. Ledger.*

Iron Industry of the United States.

The United States Census Report gives the following information relative to the iron industry of the United States for the year ending June 1, 1870:

Pig iron, 386 establishments, 574 blast furnaces (with a daily capacity of 8,357 tons melted metal,) employing 27,543 hands, producing 2,052,821 tons of pig, of the value of $69,640,498. Bloomary forges, 82, employing 2,902 hands, producing 808 tons of blooms, of the value of $2,765,623. Foundries, 2,653, employing 51,297 hands, and producing to the value of $99,837,218. Forges, 103, employing 3,561 hands, and producing to the value of $8,147,609. Establishments producing bar, rod and railroad iron, nail, plate, etc., 309, employing 44,643 hands, and producing to the value of $120,301,158.

Nashville and Chattanooga Railroad.

The earnings of this road for the years ending June 30, 1871 and 1872, were as follows:

	1871.	1872.
From passengers ...	$418,088 62	$371,656 24
" freight.....	942,304 04	1,366,854 98
" mail.....	15 000 00	25,277 51
" rents, etc	70,740 92	86,968 97
	$1,446,133 58	$1,800,757 70
Expenses, viz:		
Maintenance of way.	$352,268 27	$380,984 75

Expenses and lawyer's fees in settling U. S. Government claim.....	27,000 00	
For new bridges.....	62,485 55	
Twenty-seven bonds (on hand) of the N. and C. R. R. Co.; twenty-two of the State of Tennessee, and three of the City of Memphis bonds on hand.	35,812 20	
Old dividends paid.....	1,068 06	
Stock in Edgefield and Kentucky R. R. Co. Cost	165 00	
Six per cent. dividend on $2,021,573 30.....	121,294 40	
		547,909 27
Amount overpaid..		$5,416 50

Compared with the previous year the gross earnings of 1871-'72 show an increase of $854,624 12; with an increase in expenses of $208,572 99—making the increase in net earning $146,051 13. The president in his report says:

The sinking fund due the State of Tennessee, on the first of January last, of four per cent. on bonds loaned to and endorsed for our company, amounting to $77,640, was promptly paid; which reduced the company's liability that much.

In addition to the foregoing expenditure and improvements, the company has created the following liabilities, to wit:

For new railroad iron	$95,745 25
For new bridges.....	72,668 74
For real estate and depot grounds ...	19,250 00
	$187,663 99

Most of which will have to be met out of the profits of the year just entered upon; besides $13,702 59 for the iron draw in Tennessee River Bridge, at Bridgeport, just completed.

The purpose of rebuilding all the old white pine bridges put up by the Government, referred to in the last report, has been fully carried out, by putting up first class iron bridges—at the first crossing of Mill Creek, over Duck River, Widow's Creek, Cove Creek, Nickajack and Look-out Creeks, and two spans at Tennessee River Bridge, to take the place of two built during the war, and left standing when that bridge was last burned, in the fall of 1863; together with an iron draw over the East slue. The balance of that bridge has been thoroughly overhauled and renewed, and the top well covered with tin, and the sides weather boarded. A first class Howe Truss Bridge has also been built over Elk River. The large amount of $60,013 79 was paid on account of repairing other bridges, including covering, new masonry, and repairs of masonry, and al are now in good order.

There was paid for new iron rails and "Fish-bar" fastenings, during the year, the large sum of $156,797 77, which is charged to operating expenses; besides which, however, we bought of English rail, and laid down, $95,745 25, which will be paid out of the profits of the year just entered upon.

You have now a road in first class order, with "Fish-bar" rail continuously, from Nashville East to Elk River, 78 miles, with eight miles across Cumberland Mountain, and from Chattanooga West to a point one mile West of Stevenson—in all, 126 miles, leaving only 25 miles of "chair" rail between Cowan and Stevenson, which will be replaced with the "Fish-bar" rail gradually, out of the amount annually appropriated to the iron account, and charged to operating expenses. Last year we laid down forty miles of new iron; but as the road is so near relaid with new iron, we hope twenty-five miles of new rails each year hereafter, will maintain the track in first-class condition. Less than this amount will not do it, while the tonnage of your road continues as heavy as it was the last year.

The through line from Louisville to Montgomery will be opened about the first of November, when we may reasonably expect a diminution in our receipts for a short time; but we expect an increase of business from St. Louis and other points, tributary to the N. and N. W. R. Road, to soon make up what we may lose by the Louisville combination, and in two or three years, to even go beyond the large receipts of last year.

The large increase of $434,828 45 in receipts from freight last year, over the year previous, is as gratifying to the directors as they trust it will be satisfactory to the stockholders.

The falling off in passenger earnings, and from rents and privileges, is explained by the superintendent. Diminution in receipts from travel during the last year, is the experience of all principal railroad companies in the South; which leads to the conclusion that scarcity of money was the principal cause of this falling off.

Soon after the last meeting of the stockholders, the compromise and settlement with the United States Government (elaborately explained in former reports), then pending, was fully consummated, by delivering to the Secretary of War one million of coupon bonds of your company, one-half due in ten, and one half in twenty years, and bearing interest at the rate of four per cent. per annum, payable semi-annually. This compromise and settlement was highly approved of by the stockholders at their last meeting. Its final consummation secures the prosperity and success of your company.

NASHVILLE AND NORTHWESTERN RAILROAD.

As hinted at in last report, this road was sold in November last, through commissioners appointed for that purpose by the Legislature. In conformity to law, these commissioners filed bills in the Chancery Court at Nashville, against all the delinquent railroads in the State, making all parties interested parties to the bill, and after a full and patient hearing of those causes, the chancellor decreed the sale of all the delinquent roads; and all of them have been sold by the commissioners.

Owing to the combination made by the Louisville and Nashville Railroad Company, in leasing the Nashville and Decatur and the South and North Alabama Railroads, giving that company a through line, under one management, from Louisville, Kentucky, to Montgomery, Alabama, is was deemed important by your directors, for your company to buy, at least, a controlling influence in the N. and N. W. Railroad, so that you might not be cut off from the trade of the great West; for, with this road in other hands, your road might have been seriously affected by the new line from Louisville to Montgomery; but with this road as a part of your line, it is believed you will hold the balance of power, and be able, through combinations with connecting and interested roads, to neutralize the influence of the new competition expected upon the opening of the South and North Railroad in November next. The directors, entertaining these views, determined to purchase an interest of two-thirds in the N. and N. W. Railroad, which was done, individnals in Tennessee and New York taking the other third, at a cost of $2,400,000, in Stateof Tennessee bonds, with January, 1871 coupons attached; the New York party agreeing to furnish the amount of money necessary to pay for the road, and finish renewing and equipping it, and to carry this amount for a time that was believed to be long enough to clear up any doubts about title, and enable combinations to be made favorable to placing bonds on the market, with which to pay for this road, its renewal and equipment—the individuals endorsing the company's notes for a certain amount.

The directors of the N. and N. W. Company appealed from the decision of the chancellor to the Supreme Court of the State of Tennessee, as did the County of Davidson, who owned three hundred thousand dollars of stock in that road. The stockholders of the company were called together, and, by a resolution, agreed to abide by the sale of their road, provided the N. and C. R. R. Company would pay to the stockholders of the N. and N. W. Railroad five per cent., in currency, upon the par value of their stock, which has been done with a majority of stockholders, and their stock transferred to your company. Their suit in the Supreme Court has been dismissed. The suit by the County of Davison, in the Supreme Court, has also been dismissed, your company having bought the stock of the county, for which ten cents on the dollar, in Tennessee bonds, was paid.

Your company now owns a large majority of stock in the old N. and N. W. R. R. Co. The only contestants now are the holders of second mortgage bonds. They appealed to the Supreme Court also, and filed a bill in the Federal Court, which bill was dismissed by the court, at its session in July, upon a demurrer. It is believed by your counsel, and counsel for the State, that there is no merit or strength in this appeal case; that they, of all other dissatisfied claimants, have the least showing of disturbing the sale, and that none ever had any chance of doing so. But a sale, under a recent decree from the Chancery Court, in accordance with the terms of the second mort-

gage, will be made soon (subject to the State's lien, amounting to about $4,870,417 15, which your company owns by purchase,) which will settle all possible questions of litigation. In making the purchase, your directors reserved the right to take the State's interest alone at the price paid, in case the Supreme Court should not confirm the Chancellor's decree, about which, however, there can be little doubt now. The purchase of the State's interest from the State's commissioners was also fully confirmed by Act of the last Legislature.

The earnings from this road, during the fiscal year just closed have been,

From passage	$159,972 24
" freight	453,545 89
" wharfage	161 00
Mail ($14,185 79 unavailable)	$613,679 13

During the same time the following payments have been made, on account of operating this road, renewing the track and bridges, and purchasing equipments, etc.:

Tracks and bridges	$198,193 87
Motive power	170,872 79
Maintenance of cars	81,083 90
Conducting transportation	132,297 61
Miscellaneous	24,703 72
New Bridges	37,880 59
New iron rails and fastenings	118,451 17
Pile driving on the road and at Hickman	13,499 38
New cars	64,925 00
New locomotives	10,647 55
Depot grounds and right of way	16,155 38
Account of purchase of road	23,370 95
Interest and exchange	18,790 58
Damages at Harpeth River	72,653 89
	$984,526 38

Besides which, the following liabilities have been created, to wit:

For depot grounds	$3 816 66
" New cars	28,850 00
" New locomotives	10,500 09
" New bridges	66,592 49
	$109,759 15

The notes of the company with interest, having been given for these amounts, falling due at different dates, in the next twelve months; to which will be added $21,240, the cost of Iron Draw in Tennessee River bridge, at Johnsonville. This work will not be completed before about the first of October, and to be paid for by contract, in three equal instalments, at six, twelve and eighteen months, from completion of work, at eight per cent. interest per annum.

The earnings of this road increased the last year, over the year previous $171,940 91; and over the year 1869-'70, $200,240 01; and over the year 1868-'69, $362,295 26, from the beginning of which year, we may date the opening of this road for business, practically, although in very bad condition at that time. As before stated, this road will now compare very favorably with most of the Southern roads. To operate this road and bring it up to its present condition, adding the amount paid for cars, and an increase in motive power, depot grounds, etc., has cost $831,927 50, over and above the earnings received from it, counting from the first of September, 1868, the date of first lease. The importance of this road to the Nashville and Chattanooga Railroad as a connection, is shown by the through freight business, amounting to $243,063 91, for the last year; while for the year previous, it amounted to only $75,178 64; and it is believed that this business will continue to increase in something like this ratio for several years.

The commissioners allowed a credit of $700,000, in Tennessee bonds, on the purchase, for expenditures made, and losses sustained by your company in operating the road, under the two agreements of lease to date of sale; and while this did not fully cover the amount claimed by us, this compromise and settlement was deemed better than litigation with the State.

We have spent in improving and equipping the road since the purchase, $375,000. To finish putting the track in first class order, and fully equip the road, will require about $500,000 more. If we are correct in our estimate of the amount necessary to finish renewing and equipping the road, and putting everything in good order, the cost will stand about as follows:

Average cost of $2,400,000 of Tennessee State bonds, at 67 cents	$1,608,000 00
Amount already expended since purchase	375,000 00
Amount requisite to complete and equip	500,000 00
Interest for one and a half years, say	217,000 00
Cost in money	$2,700,000 00

or $15,789 per mile, which finished and equipped will certainly be a very cheap road.

The construction of the branch between Huntingdon and Jackson was postponed, until our title to the purchase of the Nashville and Northwestern Road could be clearly established, about which there can be no doubt. The construction of this short road will give the shortest route, via the Nashville and Northwestern Road to Mobile and New Orleans; and much the shortest route to Memphis, as soon as the road from Jackson to Memphis is built, about which so much feeling is now exhibited in that section. It will also open up a rich section of country to the trade of Nashville, which now goes to other rival cites.

It may become necessary to build a short road from opposite Hickman to Charleston, in Missouri, or to some point near that place, on the St. Louis and Iron Mountain Railroad, which will reduce the distance to St. Louis fifteen miles or from a point near where the Nashville and Northwestern Road crosses the line of the State of Kentucky, to Columbus, Ky.; as we are not satisfied that the managers of the Mobile and Ohio Railroad, will give us such facilities, as the growing importance of our line will demand.

All of the bridges on this road, are now new, and in excellent condition. Four "Howe Truss" bridges over Harpeth, and one of like character over Turnbull, with iron bridge upon combination plan, over Tennessee River and Trace Creek, were built in the last year, at a cost of $104,473,-08. Besides this, the amount of $58,176 71, was expended in building small bridges and renewing the trestles.

The road bed has been greatly improved, and about twelve miles of new rails put in the track. There is in the track at present about 55 miles of "T" rail, five miles of old "U" rail, and 111 miles of fish bar rail. Most of the latter is in good order. About 23 miles of new iron will be required on this road, for repairs and renewal during the year just entered upon. We expect to reduce the grade ascending the ridge, from Hurricane Creek to the maximum of the road this fall; which will cost about $50,000.

Six acres of ground, including the wharf at Johnsville, has been bought at a cost of $2,371 08, which was necessary, in order to cultivate the traffic coming from and going to points on the Tennessee River. In order to afford necessary facilities for the transaction of business at Hickman, we have purchased at that place, about four acres of additional ground, including about one thousand feet of river or wharf front, at a cost of $8,000 making at the same time, a contract with the City Council of Hickman, by which your company is to receive perpetually, one-half of the wharfage collected at that wharf.

To afford greater facilities for the movement of freight over your roads, the directors have contracted for seven new freight locomotives—six wheel drivers, to be delivered between the first of October and first of January, at a cost of $110,000—and have arranged for building three hundred box cars, in the company's shops during the year, which will cost about $225,000. These cars and engines will all be required for the Nashville and Northwestern Railroad. And as not more than 150 of the cars can be finished by the company's force by the first of November, about which time the heavy business will set in, it is in contemplation to order one hundred box cars in addition, which, if done, will cost about $80,000. It certainly would be economy to do so; for during the last year, the large sum of $70,000 was paid out for the use of cars belonging to other roads, running over the Nashville and Chattanooga, and Nashville and Northwestern Railroads, which amount might have been saved, if our roads had been fully equipped.

On the first day of May last, a contract was entered into, between the Louisville and Nashville and Nashville and Chattanooga Railroad Companies, for connecting the Louisville and Nashville, and Nashville and Decatur Railroad tracks through the depot grounds of your company, and for the building of a Union Passenger House, towards the erection of which, the Louisville and Nashville Railroad Company agrees to furnish fifty thousand dollars, and pay an annuity of eighteen thousand dollars, perpetually, besides paying for the right of way, and connecting trestle (to improve the present connection between the Louisville and Nashville and Nashville and Chattanooga Railroad Depots.) Which connecting trestle and use of Union Passenger House, the Nashville and Chattanooga Railroad Company is to have the right of farming out to other roads, upon such terms as may be agreed upon, between such other roads and the Nashville and Chattanooga Railroad Company; but such use is not to interfere with the prompt transaction of the business of the Louisville and Nashville Railroad. This contract will be read in full, and made a part of the proceedings of this meeting of the Stockholders. Our negotiations in this important matter with the Louisville and Nashville Railroad Company were conducted pleasantly and satisfactorily, through Col. Albert Fink, the just and able representative of that Company, with whom it is always pleasant to transact business.

Our relations and arrangements with connecting roads are of the most satisfactory character, extending from Louisville, Ky., and St. Louis to the sea at Charleston and Savannah, and from Nashville, via the East Tennessee and Virginia lines to the sea at Norfolk, Va. Through cars ("Green Line" and "Virginia and Tennessee Air Line"), belonging to about twenty roads, are run over your road between the points named, and all intermediate points of importance. This saves largely in expenses, in transferring freight at the terminus of each road, as was done before the war. There is no private interest in these lines, as is the case with many of the fast freight lines in the country, but are operated exclusively in the interest of the Railroad Companies represented in the lines. Each Company is expected to furnish its quota of cars, in proportion to the through business done over the respective roads, with such a system of checks and reports, as to do exact justice to each Company in the use of these cars; those having less than their quota pay, and those having more, receive pay for the use of cars. The earnings from these through cars are divided daily between the roads, precisely pro rata per mile, in the same way as if the freight was transferred at the terminus of each road. The system has given eminent satisfaction to both roads and shippers, and must continue to grow in favor as the saving to both is so manifest.

It will be seen by the report of the Superintendent, that the average income from freight during the past year, was $2 78 per ton, against $3 40 per ton the year previous. This reduction of 62 cents per ton is partially explained by him, in the increase of tonnage from coal, upon which we get less than $1 00 per ton for freight. Much of this reduction however, may be explained in the fact, that the tariffs on through freight being regulated by competing lines, it is not under the control of this Company.

The reports for the past four years business, show a steady and very satisfactory increase in the volume of the business over your road; but at the same time there is a steady decrease in the rate at which freight is carried. In the past year

there has been an increase of 75 per cent. in the tonnage, and an increase of only 45 per cent. in the gross earnings from freight. Had the company been able to realize the same pay for the work done, as the previous year, the net earnings would have been increased about $100,000. It is believed that this state of things may possibly be improved, by a better understanding with competing lines, when they are made familiar with the fact of the damaging character of this competition to all the roads interested. A faithful effort in this direction, will be made by the Managers of your road.

During the last twelve months, through tonnage South was 289,769 tons, against 39,660 tons North. Of course, if our business was more equally divided in direction, North and South, the net profits, in proportion to gross earnings, would be much more, as empty cars are returned from the South at almost the cost of hauling loaded ones. We hope to remedy this evil to some extent, by insisting upon loading with coal, our empty box cars returning from Chattanaoga, instead of using coal cars for that trade, and returning them empty from Nashville to the mines, along the line of road.

The company have 58 locomotives, 23 passenger, 5 mail, 5 baggage, 515 box, 153 flat, 1 wrecker and 50 stock cars. The mileage of locomotives was 1,262,937 miles, (an increase of 360,078 miles) at an average cost of 30 cents per mile run. Repairs, 8½; fuel, 11; stores, 1; enginemen, etc., 9½. The mileage of cars was 13,805,752 (an increase of 5,180,325 miles.) Tons of freight transported, 491,765. Passengers carried North, 86,017; do. South, 69,988—total, 156,005; of these 103,218 were local, and 52,787, through.

President.—E. W. COLE.

Directors.—By the stockholders, E. W. Cole, Thos. C. Whiteside, G. M. Fogg, E. L. Jordan, V. K. Stevenson, John F. Anderson, A. E. Patton, Ben. May, Thos. Lipscomb, John M. Bass, John Frizzell, John W. Childress, W. S. Huggins, John B. Hawkins, Jackson Pryor. By the Georgia Railroad and Banking Company, John P King. By the State of Tennessee, Albert Frierson, W. R. Butler.

Secretary and Treasurer.—W. A. GLEAVES.

General Superintendent.—J. W. THOMAS.

Resident Engineer.—R. C. MORRIS.

☞ The Knoxville *Chroniele* says: "Major General Hooker and Messrs. Burt and Barrett, of New York, returned yesterday from an excursion to Coal creek, where they went to examine our coal fields. We learn from Mr. Burt, who has visited the celebrated coal mines of Nova Scotia, that the upper veins of the Coal creek formation are equal for gas purposes to the famous Nova Scotia coal heretofore considered the best in this country. He says there is no limit to the coal in the Coal creek basin, and lying so near good iron must prove of untold value. Gen Hooker is surprised at the quality and extent of our coal fields, and expresses confidently the opinion that Knoxville, and not Chattanooga, must be the Pittsburgh of the South."

Canon City, Oil Creek, and Fairplay R. R.

A new narrow gauge railroad company, with the above title, was organized at Canon City, Colorado, on the 25th ult., with a capital of $1,000,000. Length of line, 74 miles. The incorporators are: Hon. Thos. Macon, Hon. J. Marshall Paul, Anson Rudd, B. F. Rockafellow and W. H. Greenwood. Col. Greenwood was elected president. The Cannon City *Times* says:

This is the most feasible and important movement for the advancement of the interests of Park and Fremont counties yet devised. Park is the crown of the mountains in precious minerals, and Fremont the motive power for crushing the ores at a nominal cost, and granary of untold agricultural wealth. This is the shortest possible route from the Park, to the best water power in the territory to crush the ores, and the only coal in the territory that can smelt them.

The road will have a liberal local traffic in the oil, marble, iron, lumber, stock, and farming interest on the route. The company have secured an interest here in the most valuable coal and iron mines in Colorado, and it only remains for the people of these counties, with a comprehensive foresight, to give that material aid which shall form a basis for bonding, and secure speedily a railroad from Mt. Lincoln through our county to the east.

The grades are easy, by far the easiest into the Park. The combined interests of the D. & R. G., K. P., and the A. T. roads can be united to assist in marketing the bonds of the road.

There is no question as to its paying, with an assured freight in ores down, and returns with supplies from our fertile valley, coupled with the passenger traffic.

The immense tracts being opened up by the Colorado Central Improvement Co., will here find a ready market, and our counties will team with a busy population, engaged in every vocation that can conduce to the welfare of man.

Corn as Fuel.

The cost of marketing the product of the western cornfields enables the Council Bluffs (Iowa) *Nonpareil* to make the following statement:

We are glad to see that many of our citizens are taking advantage of the low price of corn to lay in heavy supplies of it for fuel. We have experimented with it the last week, and find that it is an admirable substitute for both wood and coal, and that at present prices there is both economy and comfort in its use.

A ton of corn, 33 bushels, at 17 cents per bushel, is $5 60. We consider this equal to a cord of hard wood, as supplied and measured in our market, at $7; the cutting of this cord, $1 50; total, $8 50. Thus making a saving of nearly three dollars a cord.

For kitchen fuel it is superior to wood, except hickory, and cheaper than that. It makes a very hot fire with a great deal of blaze. We judge that three tons of corn are equal to the heat of one ton of hard coal, while in economy of its use it is equal to one and a half tons of coal. In small families and small houses there is always great waste of hard coal, while there is none in the use of corn.

☞ At a meeting of the stockholders of the Queen Anne's and Kent railroad, held in Centreville, Md., on the 4th inst., Lloyd Tilghman, Esq., was re-elected president, and Mordecai Price, Esq., treasurer of the company, and Wm. H. Jacobs, Esq., secretary of the board of directors. The business of the road is reported to have increased a hundred per cent. during the past year.

☞ Work on the Cobourg and Peterboro Railway is progressing satisfactorily. Operations on the Rice Lake bridge will be carried on through the winter.

Progress of the Hoosac Tunnel.

The following progress is reported for the month of November. East End, 145 feet; Central Shaft Eastward, 148 feet; West End 136 feet; total, 429 feet. Lengths opened to Dec. 1st, 1872: East End, 11,205 feet; Central Shaft, East, 1,513 feet; West, 339 feet; West End, 8,574 feet; total, 21,731 feet. Lengths remaining to be opened Nov. 1st, between East End and Central Shaft, 119 feet; between West End and Central Shaft, 2,281 feet, being 641 feet more than half a mile. The meeting of the two headings between Central Shaft and the East End will do away with the immense expense of raising debris and water 1,000 feet in the Shaft, which necessitates the burning of 20,000 cords of wood per year, at a cost of $100,000, and also insure the speedy completion of that gigantic work;

Interest paid by United States, $16,570,575 54; interest repaid by transportation of mails, &c., $3,953,450 61; balance of interest paid by United States, $12,617,124 93.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Nov. 30, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

Debt of Virginia.

Upon the subject of the public debt of Virginia the Governor in his message says:

"First, our public debt has not been increased one dollar since 1861, except from the accretions of interest, which we have not been able to pay. Second, the total old debt (authorized to be funded under the act of March 30, 1871) on the 1st of July, 1871, after deducting payments by railroads then or since made, was $45,718,112 23, two-thirds of which is $30,478,741 49, on which amount you authorized the payment of interest during your last session, thus forever silencing the question of our liability for two-thirds of the original debt with accumulated interest.

"Under the funding act the amount of annual interest on $26,000,000 would be $1,560,000, the available assets for the reduction of which amounted in stocks to $6,769,849 50; deduct this sum from the total debt, as given by the auditor, and it leaves a balance of only $38,948,262 73, two-thirds of which is $25,965,508 48, the annual interest upon which would be but $1,557,930 50. But the General Assembly having repealed the law authorizing the sale of these assets, the State does not derive any interest from them, except from the Richmond and Danville Company, yet the amount they represent in State bonds is accumulating interest against the State. There is no reason why this should not be stopped, and the assets converted into State bonds."

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 per cent.
GOLD BONDS.
$3,500,000.

This is an EAST AND WEST ROAD RUNNING ON THE 40TH PARALLEL FROM INDIANAPOLIS, IND., TO DECATUR, ILL., 152 miles; through the richest agricultural and mineral country of both states; and connecting at termini with the GREAT THROUGH ROUTES to the East and West.

It is the only East and West road in a belt averaging 30 miles wide, and passes through the best part of the rich

BLOCK COAL FIELD

of Indiana, in which the COMPANY OWNS 2,000 ACRES OF BLOCK COAL LANDS. It owns, also, 90,000 acres of Farming lands.

$1,400,000 IN CASH HAS BEEN ALREADY EXPENDED ON THIS ROAD, of which 30 miles in Illinois are finished and in operation. Fifty-five miles more, completing the Western Division, Decatur to the Coal Fields, will be completed this fall and the whole road in 1873.

Upwards of TWO MILLIONS OF DOLLARS more are pledged to the enterprise, partly by counties, towns and individuals along the line, but chiefly by wealthy capitalists, among whom are W. H. GUION (of WILLIAMS & GUION), SIDNEY DILLON, JAY COOKE & CO., CLARK, DODGE & CO., J. & W. SELIGMAN, VIBBARD, FOOTE & CO., and PAUL S. FORBES, of New York, BENJ. E. BATES, of Boston, HENRY LEWIS, of Philadelphia, and GEO. M. PULLMAN, of Chicago.

Bonds $1,000 each, payable in 30 years, principal and interest in *Gold, free of Government Tax.* Sinking Fund 2½ per cent. on Gross Earnings.

For sale at 90 and accrued interest by the Financial Agents of the Co. (of whom pamphlets and information may be obtained.)

Walker, Andrews & CO.,
NO. 14 WALL STREET.

☞ At a meeting of the stockholders of the Atlantic and Great Western Railroad Company, held on the 9th inst., the following Board of Directors were elected for the ensuing year: General George B. McClellan, W. W. McFarland, Lloyd Aspinwall, Abram S. Hewitt, Lawrence Wells, Edward Cooper, James B. Hodgskin, James H. Fay, all of New York; and George B. Wright, John Tod, H. E. Parsons, and Reuben Hitchcock, of Cleveland, and G. Ross, of Coudersport. At a subsequent meeting of the directors, the following officers were elected for the ensuing year: President, General George B. McClellan; Vice-President, General George B. Wright; Treasurer, James B. Hodgskin; Secretary, Charles Day.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

American Railroad Journal.

Saturday, December 14, 1872.

Stock Exchange and Money Market.

Money has been quoted generally firm as to price, with call loans to even the most responsible of street borrowers rated at full 7 per cent., with, however, exceptional negotiations at lower figures, and choice to very good mercantile credits, at from 10@15 per cent. per annum. On this basis, the offerings of funds have been somewhat reserved, and lenders have been exacting as to other Government collaterals, in the instances of temporary advances. The city banks have been losers, in their legal tender reserve line, while having had liberal additions made to their deposit averages, and reporting some enlargement of their specie reserve. They increased their loan and discount averages about 1⅞ millions. The latest dealings in Money showed a brisk market at from 7 per cent. currency to 7 per cent. gold, on call loans.

The cash balances in the U. S. Treasury at Washington on Tuesday were as follows: Currency, $6,201,382; coin, $69,087,357; coin certificates are outstanding for $19,812,500; special deposits of legal tenders for redemption of currency certificates of deposit, $25 670,000.

The U. S. Sub-Treasury office last week received $4,268,427 of currency, and $3,128,157 of gold, the latter including $1,940,000 from customs; and disbursed $4,268,431 of currency and $2,898,799 of gold, the latter embracing $699,632 of coin interest. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $22,540,537 and a coin reserve of $45,350,483.

The city banks, in their latest return, show a falling off of $768,300 of legal tender notes, with an increase of $262,300 of specie, of $3,104,500 in their deposits, and of $1,828,600 in their loan and discount averages, with a decrease of $1,800 in their item of circulation. The city bank exchanges, last week, averaged 134¼ millions. The banks now hold $1,422,675 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $13,209,500, against $23,185,100 same time last year. The city bank deposits are now $205,019,800 against $222,406,300, week ending Dec. 9, 1871: The legal tender reserve amounts to $46,401,200, against $45,667,400 same time last year. The circulation now stands at $27,569,100 against $30,122 800 same time last year. The loans are now $278,388 600 against $294,088,400 at this date last year.

The coin reserve of the city banks is now about 13¼ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 46⅛ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now a little over 205, millions, against 247¼ millions on the 20th of July.

The earnings of the Central Pacific Railroad in November showed a gain of $402,757 over the earnings for November 1871; and thus far in 1872, a gain of $3,265,677 over those for the corresponding period of last year.

Government revenues were comparatively moderate during the week. The excises yielded within the week about 2¼ millions and thus far in the current fiscal year beginning with July 1, 1872, $55,589,641. The customs at the port of New York last week were $1,812,931, and at the outports, equal to about $600,000, all in coin or coin certificates.

Gold has been quoted firmer as to price, on a more confident movement, chiefly speculative, the customs and export drain having been comparatively moderate. The range of the price during the week has been from 112½@113½, and the quotation on Wednesday was 112¾ against 112¾ the preceding Wednesday. The specie outflow last week, was $699,632. The Gold Exchange Bank clearances have averaged about 55 millions per day during the week.

The Treasury Department proposes to buy in at least $4 000,000 of 5-20s during December and sell $4,000,000 gold, one million each week, on the usual days excepting, of course, holidays.

The customs demand for Gold last week, averaged $323.400 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $23,373 and since Jan. 1, 1872, were $5,468,096 against $8,461,330 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1,

has been $138,807,085 against $148,415,085 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $72,801,661, against $81,579,039 during the same time in 1871.

The export drain of specie was $699,632 last week, against $345,224 same week preceding year. The shipments since January 1, 1872, have been $68,262,332 against $60,502,501 during the same portion of 1871.

Foreign Exchange has been generally quiet, but quoted about steady as to rates. Bankers' sixty day bills on London closed on Wednesday at 108⅜@108⅝; sight bills on London, 110@110⅛. The week's exports of domestic produce were to the currency value of $4,586,084.

Government securities have been in good demand at firmer prices, on quite limited offerings of the gold bearing issues.

On Wednesday, Government bought in none of the offered Five-Twenties, as the price, was not satisfactory. The aggregate offering was $669,950@112 46@112 99 net.

U. S. sixes of 1881 at the opening on Wednesday of the current week were quoted at 117⅜@117¾; U. S. Five-Twenties of 1862, 113⅛@113¼; U. S. Five-Twenties of 1864 at 113⅛@118¼; U. S. Five-Twenties of 1865, 113⅜@113⅝; U. S. Five-Twenties of 1865 consolidated, 115⅛@115¾; U. S. Five-Twenties of 1867, 116⅛@116⅝; U. S. Five-Twenties of 1868, 116@116⅛; U. S. Ten-forties at 109⅜@109¾; U. S. Fives of 1881 (Funding Loan) 110⅛@110⅝; Six per cent. currency Sixes from 112⅛@112¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 27.	Dec. 4.	Dec. 11.
Consols	92¾	91⅞	91⅜
U. S. 5-20s, 1865	91⅛	91⅝	91⅜
" 1867	93⅜	94	94
" 10-40s	87½	88¼	88
New Fives of 1881	88½	88⅞	89
Erie	41⅜	42½	42⅜

State bonds have been in moderate demand chiefly on investment account the favorite issues have been steadier in price.

Railway and Miscellaneous share property has been active but variable, closing, however, rather more firmly. The Money pressure was against a buoyant movement.

Railway Mortgage Loans have been in better demand on investment account at generally well supported prices. Central Pacific Sixes closed at from 101½@101¾.

Some show of animation has been apparent in the Metal line. Ingot Copper has been in active demand, chiefly on speculation, at steadier prices. Sales foot up 1,500,000 lbs., at 30¾c., up to 32c. for Spring deliveries, closing at 31c.@31¼c., cash, and 32c. for forward; English at 28½. Regulus Antimony active, with sales of 100 casks at 14c., gold. Iron has been very dull and weak, with sales of 100 tons Eglinton on private terms, and 25 tons Glengarnock at $48; also, 3,000 tons English Rails, at Pittsburg, on private terms. Eglinton has been quoted at $44@$45; Glengarnock at $46@$47. Tin has been dull and in the buyer's favor. We quote at 29½c.@29¾c., gold, for Straits and English; Charcoal Plates, $10 25@$10 50, gold.

General business has been on a moderate scale, in most lines, with Cotton, Wheat, Corn and Hops quoted firmer; and Oats, Pork, Bacon, Lard and Naval Stores, cheaper. Middling upland cotton left off on Wednesday at 19⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,342,724 bales, against 1,077,900 bales same time in the preceding year; exports 604,900 bales against 457,000 bales in the previous year; stock at the ports at latest dates, 470,000 bales against 410,500 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair demand but less firm at from 6@14½ cts.; Veals in moderate request at 6@10½ cts.; Sheep in fair request at from 4@7 cts.; Lambs 6@8½ cts.; Swine, at 4⅝@4⅞ cts. per lb., all live weight. The week's receipts were 9,073 Beeves, 1,780 Veal Calves, 22,533 Sheep and Lambs, and 51,016 Swine.

Business in foreign merchandise has been comparatively limited, but prices have not varied materially. The week's imports of foreign goods reached the amount of $3,943,566, including $891,318 of dry goods.

Ocean freights have been less active owing mainly to the scarcity of room, rates have been quite strong.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

TO INVESTORS.

We are selling at par and interest, and recommend to careful investors, the First Mortgage Seven Thirty Gold Bonds of the Northern Pacific Railroad Company. Special attention is called to the ample Land security on which these bonds rest, in addition to the usual guarantee of a first mortgage on the Road, its equipments, and earnings. The lands of the Company thus far sold have realized $5 66 per acre. The grant averages about 23,000 acres per mile of road.

JAY COOKE & CO.

Krupp's Steel Works.

The extensive Steel Works of FRIED. KRUPP, at Essen, Westphalia, employ 8,810 workmen and and have in use engines of an aggregate force of 9,595 horse power. In 1871, at this immense establishment, there were manufactured one hundred and fifty million pounds of cast steel, being an increase of twenty million pounds over the product of 1870. The establishment uses five hundred and twenty-eight melting, heating and converting furnaces, two hundred and sixty welding and puddling furnaces, two hundred and forty-five ecke furnaces, one hundred and thirty furnaces of various kinds, and one hundred and sixty-nine forges. It also uses three hundred and forty-two turning lathes, one hundred and thirty planing machines, one-hundred and seventy-two boring machines, ninety-four grinding benches and two hundred and nine machines of various kinds. It employs one hundred and seventy-four steam boilers, two hundred and sixty-five steam engines, from one thousand horse-power down, and fifty-eight steam hammers, weighing from thirty tons down. Messrs. THOMAS PROSSER & SON, 15 Gold St., New York, are the sole representatives in America.

New York and Queens County Bridge Co.

As is generally known, an act was passed by the last Legislature incorporating a company to build a bridge over the East River and Blackwell's Island. The company organized under the name of the New York and Queens County Bridge Company, and the first meeting was held on the 20th ult., at the office of Hon. L. Bradford Prince, No. 67 Wall street, and the following gentlemen were elected officers: George F. Carman, President; L. Bradford Prince, Vice-President; Benjamin W. Hitchcock, Secretary, and Blaize L. Harsell, Treasurer. An Executive Committee was appointed, consisting of Hon. L. B. Prince, Chairman; Aaron A. De Grauw, R. M. C. Graham, B. L. Harsell, and B. W. Hitchcock. The following resolution was adopted by the board:

Resolved, That all moneys received from sales of stock, to persons other than the incorporators, shall be deposited in trust with a reliable banking company, to be designated by this board, and shall not be used for any purpose until one-half of the entire capital stock shall have been sold.

When so much of the stock has been disposed of, the company will feel warranted in commencing the construction of the bridge. The capital will be $2,000,000, divided into shares of $20 each, and, if necessary, it may be increased to $4,000,000, by consent, in writing, of the stockholders.

☞ The Baltimore and Swann Lake Narrow-Gauge Passenger Railway Company have awarded the contract for the construction of their road of about six miles to F. Crowley & Co., for the sum of $90,000, and have appointed Mr. W. S. Shoemaker their engineer and superintendent, and Mr. W. S. G. Baker, consulting engineer. Satisfactory arrangements have been made with the Towsontown Company to build that end of the road simultaneously with this one.

☞ The earnings of the Central Pacific Railroad Company for the month of November, 1872, were $1,299,990, against $897,283 in November, 1871, and $777,513 in November, 1870—increase this year over 1871, $402,757, increase this year over 1870, $522,477. Earnings first eleven months 1872, $12,060,390; do. 1871, $8,794,713; do. 1870, $6,411,424—increase this year over 1871, $3,265,677; do. over 1870, $4,648,966.

☞ Estimated earnings of the Kansas Pacific Railway 4th week November: freight, $55,254 12; passenger, $22,314 22—total, $77,568 34. Total for month of November, $310,344 94.

☞ The estimated earnings of the Erie Railway Co. for the month of November, 1872, were $1,704,374; in November, 1871, they were $1,483,454—an increase of $220,920.

☞ The Lake Erie, Wooster and Muskingum Valley Railway Co. has been organized by the election of a board of directors, with Martin Welker, of Wooster, Ohio, as President, and L. Flattery Secretary and Treasurer.

☞ James Roosevelt, Esq., of New York, has been elected President of the Southern Security Railway Company, in place of Gen. G. W. Cass, resigned.

☞ BANKING-HOUSE OF
FISK & HATCH,
No. 5 Nassau-st.,
NEW YORK, Dec. 9, 1872.

The total amount of the FIRST MORTGAGE SIX PER CENT. BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY is $15,000,000, secured upon a property whose intrinsic value cannot be less than $25,000,000 to $40,000,000, and the location and advantages of which are such as to render a profitable traffic and a large revenue certain. This entire amount had been sold, and the original negotiation of the Loan was formally closed in September last.

In order to more thoroughly complete the road with *Iron Bridges, Solid Embankments, Permanent Masonry and Steel Rails* on portions of the route; provide extensive improvements and facilities for the transaction of a large business at both termini, and to furnish a more liberal equipment—all of which are demanded by recent indications as to the immediate business of the road upon completion—the Directors authorized the issue of $5,000,000 in seven per cent. Debenture Bonds, *i. e.*, Bonds not secured by Mortgage.

In the negotiation of the SEVEN PER CENT. BONDS, a moderate amount of the SIX PER CENT. FIRST MORTGAGE BONDS of the Company previously sold have been received in part payment, a portion of which remains to be disposed of.

The Bonds are in denominations of $100, $500, and $1,000, either coupon or registered; interest at the rate of six per cent. per annum, payable May and November; both Principal and Interest payable in Gold Coin in the City of New York.

At the present price, they yield over SEVEN PER CENT. IN GOLD *on their cost.*

First Mortgage Bonds upon first class *completed roads* are notably scarce, and command comparatively high prices; and as the Chesapeake and Ohio Bonds may now be practically ranked among the best of that class of securities, the present opportunity for investment in them is peculiarly favorable to Capitalists and Investors seeking investments on advantageous terms, with the prospect of an early advance in market value.

The completion of the road; a renewal of the demand for American securities in Europe; returning ease in our money markets, and the large amounts usually seeking investment in the early part of the year, must lead to the rapid absorption of these Bonds.

We receive deposits and allow interest on balances, issue certificates of deposit available in all parts of the country, make collections, buy and sell Stocks and Bonds at the Stock Exchange, on Commission, for cash, and deal in Government Securities, Central Pacific Bonds, &c.

FISK & HATCH.

☞ The Baltimore *American* says that Messrs. A. Shumacher & Co., agents for the North German Lloyds line of steamers touching at the West India Islands, are dispatching full supplies of Cumberland coal to the West Indies for the use of the steamers of that line. The brig Daphne sailed some days since with a full cargo, the schooner Eva May sails to day, and the schooner Charlotte Jamison will follow in a few days, loaded to their utmost capacity. Other vessels are to follow as the wants for the coals arise.

Journal of Railroad Law.

RAILROAD COMPANIES—A TRAVELER ON A CROSSING MUST USE HIS EYES AND EARS.

The facts in the recent case of Davis and others *vs.* The New York Central and Hudson River Railroad Company, (47 N. Y., 400,) are fully and clearly stated in the following opinion by—

GROVER, J.—To entitle the plaintiffs to go to the jury, the evidence must have been such as to make the questions, whether the injury received by their testator was the result of the negligence of the defendant, and whether he was free from any negligence contributing thereto, proper for their determination. No question is made by the counsel for the appellant, but that the first was such. The point made relates to the second. Upon this the difference between the counsel is not as to the law respecting the degree of care incumbent upon the testator to protect himself from injury in crossing the defendant's track, but in its application to the testimony, given in the case. The law required of the testator the exercise of such a degree of care as prudent persons knowing the danger to be encountered and attentive to their safety, would take to shield themselves from injury therefrom; it is settled that this requires a vigilant use of the eyes in looking, and of the ears in listening, upon approaching a highway crossing to ascertain whether there is a train approaching and that if by the vigilant use of these faculties while approaching the crossing, the vicinity of such a train may be discovered by the traveler in time to avoid a collision therewith, the omission so to exercise them, and thus avoid an injury is such negligence as will bar a recovery therefor, although the railroad company may have been guilty of negligence contributing thereto. It is likewise settled that, if the evidence is such that it would be the duty of the court to set aside a verdict finding the traveler free from negligence as against evidence, it is error to deny a motion for non-suit. The present case requires a further remark. The law requires of the traveler the exercise of this care while approaching the crossing. It does not require him to stop for the purpose of listening. If with a team it does not require that he should get out of the vehicle in which he is riding, leave his team, and go to the track for the purpose of looking, or to rise up in his vehicle and go upon the track in a standing position, to enable him to obtain a better view of the track. This would be requiring extraordinary care, such as is rarely, if ever, exercised by the most prudent. In applying the law to the present case the inquiry is whether a verdict finding that the testator could not by this use of his eyes and ears while approaching the crossing, have discovered the train, by a collision with which he was killed, in time to have avoided it, should have been set aside by the Court as against the evidence. If it should the nonsuit was right, and the order of the General Term setting it aside should be reversed: but, if not, the order of that court was right, and should be affirmed. An examination of the case shows that the testator approached the crossing upon a road crossing the track at an angle of forty-five degrees, with a slight wind blowing from him toward the approaching cars; that the train approached the crossing from the east, running through a cut. The testimony shows that these and some other circumstances prevented the hearing of the noise made by the train, and rendered it highly probable that the testator, if attentive and listening for the sound, could not have heard it while riding in his wagon, which he was driving upon a slow trot or walk until he got upon or so near the track as to prevent him from extricating himself from the danger. Against this there was nothing in conflict except the fact that the noise made by a train while running at the rate of speed of the one in question, can usually be heard a considerable distance. The injury occurred in August. The plaintiff introduced witnesses who testified that at this time the view of the track, upon which the train was approaching the crossing, was obscured from the road upon which the plaintiff's testator was approaching, by corn growing upon the land adjacent to the road. The foliage in an orchard, rank weeds upon the banks of the land of the defendant, in addition to the fences, the cutting for the track, and the hilly surface in the vicinity of the crossing; and that, in fact, a train could not be seen by one approaching the crossing as the testator did, until his horses were nearly upon the track. In answer to this, the defendant proved, by a large number of witnesses, that in February they went there and examined for the purpose of determining how far a train could be seen by a person approaching the crossing sitting in a wagon; and that when the person so sitting was about thirty feet from the crossing, he could see the train eight or nine rods from the crossing, and that the distance at which it could so be seen, rapidly increased upon going nearer to the railroad track. At this time there was no growing corn, foliage or weeds growing there to obscure the view; consequently, this testimony did not establish that a train could be so seen in August, while such obstruction to the view existed. It did not show that in August the testator could, by looking have seen the train in time to have avoided the collision. It could not, therefore, be held as a question of law that his failure sooner to discover the train was the result of his inattention to the danger of his situation, or of his failure to use his senses to guard ugainst it. These questions upon the evidence should have been submitted to the jury. There was no pretence of any negligence of the testator after his discovery of the train. It was so near, and running at each speed, that the collision occurred almost immediately thereafter.

The order of the General Term directing a new trial must be affirmed, and judgment given for the plaintiff upon the stipulation.

Judgment affirmed.

☞ The financial condition of the State of West Virginia on the 1st of October, 1872, was as follows: Balance in the treasury, October 1, 1871, $128,677 77; received during the fiscal year ending September 30, 1872, $741,556 16; total, $870,233 93; expenses during the fiscal year, $586,781 90; balance in treasury, October 1, 1872, $283,452 03; amount due school fund and general school fund, October 1, 1871, $273,180 66; leaving in the State treasury, October 1, 1872, $10,271 37.

☞ Another branch of the Wellington, Grey & Bruce Railway is talked of to run from Clifford to Durham.

☞ The Menominee extension of the Chicago and Northwestern Railway, supplying the link necessary to form a direct all-rail line between Chicago and Lake Superior, was completed on the 2d inst. The extensions and new lines projected and already completed this year add 400 miles to the Northwestern, giving it a total of about 2,000 miles of road.

The Railways of the Globe.

According to Dr. Sturmer's *History of Railways*, lately published, the total length of railways open for traffic at the end of 1871 was 233,988 kilometres, or, reckoning the kilometre at ⅝ English mile, 146,243 English miles—a length which would go round the equator nearly six times. Of this total, 111,909 kilometres (69,943 miles) belong to Europe; 109,961 kilometres (68,716 miles) to America; 8,533 kilometres (5,333 miles) to Asia; 1,812 kilometres (1,333 miles) to Australia; and 1,733 kilometres (1, 083 miles) to Africa. In Europe the length of railway is divided as follows:—Great Britain possesses the greatest number of miles, 15,427; next comes the German Empire, with 13,113 miles. The other European countries follow in this order:—France, 11,041 miles; Russia, 8,719; Austria, 7,437; Italy, 3,986; Spain and Portugal, 3,818; Belgium, 1,901; Sweden and Norway, 1,411; Holland, 1,010; Switzerland, 910; Turkey and Greece, 664; and Denmark, 548 miles.

☞ The Annapolis correspondent of the Baltimore *Sun* says that the Treasury Department and the Governor have accepted bids and sold a sufficient amount of the new loan, known as "The Maryland State Loan," (all of which was disposed of above par,) to redeem all of the overdue currency bonds of 1865 and 1870. The controller has given public notice that this class of overdue stock is now redeemable at the treasurer's office, Annapolis, Md., and that the interest thereon will cease after the first day of January, 1873. This concludes, for the present, and, probably for some time, any transactions in "The Maryland State Loan," which loan is soley designed to take the place of the overdue stock and bonds of the State now outstanding, and is not a loan to increase the indebtedness of the State.

☞ At the annual meeting of the New York City Rapid Transit Company, held at the office, No. 25 West Fourth street, the following were elected directors for the ensuing year: Cornelius Vanderbilt, Augustus Schell, Horace F. Clark, William H. Vanderbilt, James H. Banker, Harvey Allen, William Butler Duncan, Edwin D. Worcester, Nicholas B. La Bau, William K. Thorn, Joseph Harker, Allan Campbell and Francis P. Freeman. At a subsequent meeting of the directors, Cornelius Vanderbilt was elected president and Edwin D. Worcester secretary.

☞ The Columbus (Ga.) *Sun* hears that the Bainbridge, Cuthbert, and Columbus railroad will soon be sold, and it is intimated the North and South road will be the purchaser and complete it. This it can do with the State aid and the liberal charter granted. At the late session of the Superior Court of Decatur county, a decree was taken by consent, settling the rights of parties in the case of creditors against the road.

☞ The Chicago and Northwestern Railroad Company have declared a dividend of 3½ per cent. cash on both common and preferred stock, payable December 28.

☞ The New York, New Haven and Hartford Railroad Company have declared a dividend of $5 per share payable Jan. 2.

Illinois Central Railroad.

The statement of this Company for the month of November, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	6,100.79 for	$38,844 23
Acres Inter't Fund Lands Sold	998.80 for	5,154 00
Acres Free Lands Sold	593.87 for	3,769 35
Total sales during the m'th of November, 1872	7,693.46 for	$47,767 58
To which add Town Lot Sales	for	
Total of all	7,693.46 for	$47,767 58
Cash collected in November, 1872		$62,587 93

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$378,368 00	$71.277 00	$449.645 00

Mails	6,375 00	3,059 33	9,434 33
Other sources	73,625 00	2,640 67	76,265 67
Tot'l Nov.'72.	$566,778 55	$114,553 40	$681,331 95
Total actual earn'gs, Nov., 1871	$631,199 35	$124,236 65	$755,436 00

Nashville and Decatur Railroad.

At the recent annual meeting of the stockholders of this company, it was shown that the total earnings of the road for the year had been $349,640 08, and the total expenses $227,339 64; net earnings $122,300 44. When the Louisville and Nashville road took possession, September 23, they receipted for material and supplies, in cash, $45,479 34; rolling stock, machinery and movable property, $190,844 23. President Sloss stated that when the amount due the road from the Government was paid, and the $2,450,000 assumed by the Louisville and Nashville Company, that the greater amount, if not all, the debts of the road would be settled. He thought its affairs could be adjusted and settled nearly, if not wholly, within the next year. J. W. Sloss was unanimously re-elected President, and G. W. Seay, Secretary and Treasurer.

☞ The Kansas and Colorado Railroad Company was recently organized with a capital stock of $1,000,000. The incorporators are: Thos. Nickerson, Joseph Nickerson, Isaac T. Burr, F. H. Peabody, Alden Speare, C. W. Pierce, C. K. Halliday, D. L. Lakin, and Thomas J. Peter. The articles of incorporation assert the object of the company to be, to build a railroad connecting with the A. & T. R. R., at the east line of the Territory, and running up the valley of the Arkansas by the most feasible route to Pueblo, and thence up the valley to the mouth of the South Arkansas.

☞ The annual meeting of the stockholders of the Chesapeake and Ohio Railroad company was held in Richmond, Va., on the 5th inst. The report shows that the remainder of the $15,000,000 mortgage bonds have been sold, the proceeds of which have been applied to the construction of the road, which is nearly completed. The receipts of the road for the year ending September 30, 1872, from Richmond to the White Sulphur Springs amount to $777,632 70, and the expenes $488,687 84, leaving the net earnings $288,945 86.

STREET RAILROAD CARS FOR SALE.

THE undersigned offers for sale ten Two-horse cars which have been in use a few months on a street road. They are nearly as good as new cars, and will be sold cheap for cash.

JOHN R. CONNOR,
Greenpoint, N. Y.

Locomotives and Cars for Sale.

New Locomotives of best build.
Second hand Do., various gauge, 10@40 Tons, now running, in good order.
New and Second hand Passenger and Freight Cars. Also Steel and Iron Rails, Fastenings, &c.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**
PLAINFIELD, N. J.

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern Painesville and Youngstown, Ripley R. R. of Miss., Ulen and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

78 BROADWAY,

NEW YORK.

American & English Rails,

LOCOMOTIVES and CARS,

FISH PLATES, SPIKES, &c., &c.,

SOLE AGENT FOR

Atkins Bros' Pottsville Rolling Mills.

Special attention given to filling orders for Small *T and Street Rails*, of every weight and description.

Old Rails Bought or Re-Rolled, as Desired.

P. O. Box 5222.

EDWARD J. ETTING,

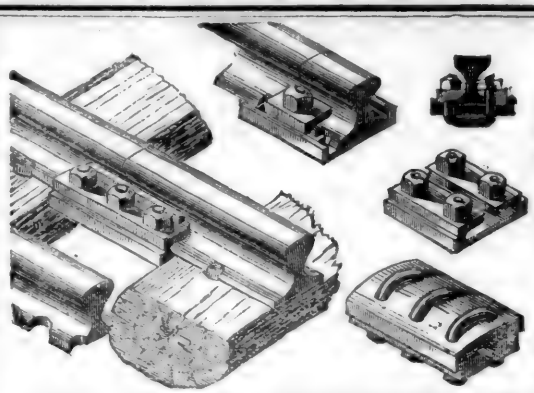
105 Walnut St., Philadelphia,

MANUFACTURERS' AGENT FOR THE SALE OF

AMERICAN AND FOREIGN

RAILROAD IRON

Of every Size, Weight and Pattern,



For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

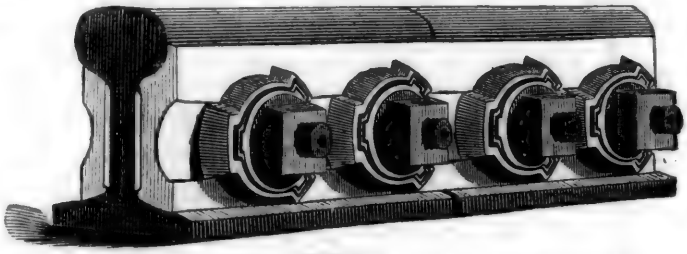
☞ Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

The Decision in the Virginia Funding Bill.

As heretofore stated, the Court of Appeals of the State of Virginia, at its recent term at Wytheville, decided the act known as the funding bill to be constitutional, and the State bound by its obligations. The court took the position that it was a fair and equitable executed contract, by which the State of Virginia had offered and the creditors of the State had accepted certain bonds in lieu of bonds held by them, on condition that one-third of the original amount of said bonds be remitted for a final settlement with West Virginia, with the additional provision that the interest coupons of the new bonds should be receivable for taxes. The case came up on the last mentioned provision, and was decided in the lower court adverse to the State, upon which the attorney general took an appeal. The Richmond *Dispatch* says:

Judge Bouldin delivered the opinion in the case, and Judge Christian and Anderson concurred in it. Judge Staples dissented. Judge Moncure, who considered himself excluded from sitting in the case by reason of his owning some of the bonds issued under the funding bill, declared that he would have concurred with the majority if he had set in the case. The *Dispatch* adds.

Judge Bouldin compresses the case into a nutshell in its statement and illustration. He says: "A large portion of the creditors accepted the terms proposed, surrendered their old bonds to be cancelled and received the new bonds and certificates issued as aforesaid under the funding act; and the question is whether the undertaking set forth in the coupons issued under the act, that they should be 'receivable at and after maturity for all taxes, debts, dues and demands due the State,' is a valid legislative contract upon sufficient consideration.

Were it a transaction between individuals, the mere statement of the case would suggest the answer. To illustrate: A and B owe to C a joint debt, but in equal proportions as between themselves. B leaves the country, and the condition of A and the circumstances of the case make it reasonable, in A's judgment, that he should propose a separate adjustment of the amount due from him as between himself and B, and, as a part of the argument, proposes, as agent, to collect B's portion of the debt. C accepts the proposition—takes A's individual note for his part of the debt, with extended credit—takes his undertaking, in writing, to collect, if practicable, B's part, and surrenders to A, for cancellation, the joint note of A and B. Is there an intelligent judicial tribunal on earth that would tolerate the defense by A that his separate note was without consideration? We think not.

The effect of this decision is that the act passed by the Virginia Legislature, in March, 1872, repealing the funding act, is unconstitutional.

New Style of Testing Machine.

A new machine for testing the strength of metals, manufactured by Riehle Brothers, of the Philadelphia Scale Works, has been exhibited during the last few days to a number of scientific and practical mechanics and engineers. Some years ago the United States Government made experiments which have served as the base for estimates of the strength that an iron beam may be expected to possess. It was found that an iron beam of a uniform thickness of one inch fixed horizontally, with one end only supported, would break at a weight of from 507 to 980 pounds for American iron, and from 472 to 770 for English iron, the weight being applied one foot from the supported end. If both ends of the beam are supported, it will bear six times the weight that can placed upon it with only one end fixed, and the strength of beams is in direct ratio with their width, in inverse ratio with their length and in the ratio of the square of their depths. From the experiments thus made with perfect iron, the strength of materials was formulated; but practical experience showed that large forgings and castings were subject to blow-holes and honey combs, which the most vigilant inspection would fail to discover—and these defects would lead to breakage at points of strain where theory said that the metal should bear the given pressure. The matter became of so much importance in view of the large number of iron girders used in modern buildings, that, in New York, a law was passed requiring an actual test of beams, girders, &c. The machine exhibited by Riehle Brothers is designed for testing practically the tensile strength of bridge bolts, wire and hemp rope, chains, &c., in any lengths, besides boiler plate and other materials, and also to test specimens of any substance by compression. It can be so arranged as to test the resistance of iron and stone columns by crushing, girders by transverse strain and any material by any strain, including torsion. The parts of this ingenious contrivance are so arranged that the weighing levers are at one end, and the power, which consists of a hydraulic pump and jack that run upon wheels along a horizontal track, is at the other end. The strain is applied by the pump and jack which are used to take up the slack, and not to determine the amount of tension, as in most other machines of this kind. The tension is found by means of the weights which are placed on the disk suspended from the beam, and an ordinary one-pound weight will apply a strain of 1000. Accurate results can be obtained from seventy-five pounds to seventy-five tons. The machine is in equipoise before the specimen is in place, and is so nicely adjusted that when a strain of fifty or seventy-five tons is being made, a half-ounce weight will instantly turn the beam and break the specimen if the necessary strain has been reached. The machine now on exhibition is capable of almost indefinite extension, and will be made ninety feet long. It is intended for E. B. Wood, Esq., of Detroit, Michigan. About twenty machines have thus far been manufactured, (one for the United States Government), and they have been sent to Cleveland, Cincinnati, Canada, and other places.—*Phila. Ledger, Dec.* 14.

☞ The contractors of the Grand Rapids and Indiana Railroad expect to lay some eight miles more of track this winter beyond the present terminus at the North Boardman River. This will complete the road to Rapid River, 143 miles north of Grand Rapids. The iron is now laid for 10 miles north of Fyfe Lake, the late terminus. The track on the Traverse City Branch is all laid, and trains will soon be running.

☞ A critical examination of the Suspension Bridge at Niagara was recently made, and the cables and anchorage were found to be perfectly sound, although twenty years have elapsed since they were put in position.

Boston and Maine Railroad.

The following is a comparative statement of the earnings and expenses of this road for the sixteen months ending September 30, 1871, and for the twelve months ending September 30, 1872:

	Sixteen months, 1870-'71.	Twelve months, 1871-'72.
Earnings:		
From passengers	$1,562,613 41	$1,092,600 49
" freight	1,031,497 76	813,204 26
" rents	41,577 23	43,423 35
" mails	19,410 00	14,525 83
" interest	26,940 81	41,470 36
" expresses	39,456 56	40,917 90
	$2,721,495 77	$2,046,142 19
Expenses, viz:		
Repairs of road	$243,984 78	199,019 83
" bridges	73,548 35	47,277 92
" fences, etc	22,111 80	15,793 15
" stations, etc.	150,813 06	99,345 87

Switch, gatemen, etc	73,435 56	60,938 31
Passenger expenses	216,280 79	195,721 87
Freight expenses	174,339 86	165,679 80
Wood	78,385 34	60,988 34
Water	7 862 20	8,461 77
Oil and waste	26,377 80	21,031 49
Gratuities & damages	21,206 05	21,641 86
General expenses	47,163 34	39,924 19
Taxes	99,092 15	81,525 04
Insurance	11,236 94	8,027 14
Danvers R. R. rent	10,000 00	7,500 00
Coal for locomotives	158,893 14	146,315 58
Renewals of rails	159,950 66	137,324 77
Interest paid	25,916 08	
Telegraph	3,087 83	4,793 27
	$1,888,151 97	$1,538,823 11
Earnings less exp	$833,343 80	$507,319 08
Deduct tax on dividends and surplus	15,752 28	3,202 89
Net revenue	$817,591 52	$504,116 19
Add balance September 30, 1871		1,012,570 29
Total		$1,516,686 48
Deduct two dividends of five per cent. each		500,000 00
Balance September 30, 1872		$1,016,686 48

The above balance of $1,016,686 48, is invested as follows: in Newburyport Railroad bonds, $303,768; in Danvers Railroad bonds (guaranteed by this corporation) $73,000; in the Danvers Railroad contract and stock, $27,430; in the Dover and Winnipiseogee Railroad stock, $263,144 48—and the remainder in expenditures on the road, rolling stock, etc., in addition to the capital received from the sale of stock. It is therefore only an element indicating, in some measure, the value of the stock above par; but it is not available for the payment of debts or dividends. The president in his report says:

Our last Annual Report embraced the doings, receipts, and expenditures of the road for the term of sixteen months, viz., from May 31, 1870, to September 30, 1871, at which last named time our financial year was made to close to correspond with the time for making the return required by the recent act of the legislature of Massachusetts. Any comparison made between this year and the year preceding should be made with the twelve months prior to September 30, 1871.

The gross earnings of the year, ending September, 30, 1872, were $2,046,142 19; and the expenses for the same time were $1,542,026. The gross earnings of the twelve months ending September 30, 1871, were $1,994,689 23; and the expenses for the same time were $1,420,572 29—showing an increase in the receipts of the present year over the previous year of $51,452,96; and in the expenses of $121,453 71. The net income of this year is $504,116 19; the net income of the twelve months ending September 30, 1871, was $574,116 94—showing a decrease of net income of this year over the twelve months ending September 30, 1871, of $70,000 75.

This result is accounted for by the very large advance in the price of everything that enters into the proper and successful management of a first-class road, the large amount of work and heavy outlay for renewals of both iron and ties, the substitution to a considerable extent of steel for iron rails, and other necessary and heavy expenditures which may not have been as equally distributed over the past as they should have been.

On the seventeenth day of February, 1871, an act authorizing the extension of this road to Portland, in the, State of Maine, was approved by the governor of that State. On the sixteenth day of March, 1871, the act authorizing such extension was accepted by the stockholders at a meeting called for that purpose, and on the first day of April, then next, an engineering party was put into the field; surveys having been carefully made, and the line adopted during the summer, contracts were entered into during the months of October, November, and December for the graduation and masonry, and the work was commenced at various points on the line soon after October 1st, 1871. A most severe winter ensued, greatly impeding the prosecution of the work. The frosts of the winter, extending well into the spring; the excessive heat and extensive rain fall of the past summer, have rendered the prosecution of the work much more difficult, and have greatly extended the time of its completion. We have, however, notwithstanding these unexpected detentions, nearly completed our road to the temporary depot at the Walker House in the city of Portland. The balance of the work, extending from the Walker House to Maple Street, the point designed for the location of a permanent depot, being very heavy earth and rock cutting, will require some months yet to complete. The work on the whole line has been urged forward with all possible energy. Divided as it was into some thirty different sections, and contracted for by some fifteen different contractors, it would be strange, indeed, did we not find some among this large number who were not up to time. Such in fact was the case, and we were obliged to terminate their contracts, which was done with their consent, and others more energetic were put in their places.

The work done is believed to be of the most substantial character. The masonry, first-class in almost every particular, was (owing to great competition at the time of awarding our contracts) secured at but little above prices for second-class work, and must on inspection commend itself to every stockholder.

Eighteen iron bridges of the most improved pattern have been erected over rivers and highways, which have added considerably to the expense of your extension; but it is the first cost, and the first only, that we are to look at in this expenditure. A good iron bridge once constructed, is constructed for a long time, requiring neither repairs or renewals like other bridges, either from decay, loss, or damage by fire. The whole roadbed has been laid with the best iron rail that could be obtained, weighing sixty pounds to the yard, and most thoroughly ballasted, under the immediate supervision of our experienced roadmaster, Mr. Edward A. Smith. It is confidently believed that when this new addition to your road is fully completed, you will have a piece of road as good in every particular as any other of equal length in New England. The expense of the work will exceed the estimates originally made. It is believed, however, that $3,000,000 will cover all expenses, $2,000,000 of which amount will be charged to capital stock, and the balance will be a debt on your road.

Our land damages, which the people on the line of the route, at the time of making our preliminary survey, would have us believe were of no consequence, have proved in many cases excessive. The entrance into the city of Portland has been very expensive, and necessarily so, from the natural formation of the city itself. The western approach is blockaded by an extremely high bluff, made up of clay and solid rock; to penetrate through such a barrier has required much time and expense. By the laws of the State of Maine, we are required to purchase every dwelling-house before a road can be located through it. This compelled you to purchase a much larger amount of real estate, not only in the city of Portland, but also in the cities of Saco and Biddeford, than we should have felt the necessity of doing, had we possessed the same right in the State of Maine to condemn real estate for railroad uses, that we have under the laws of Massachusetts. This extra real estate is not all loss, as the location of your road has always enhanced the value thereof. We can, it is believed, dispose of so much as we do not want for railroad purposes, at a good advance on the prices paid.

On the thirteenth day of December, 1871, at a meeting of the stockholders, it was voted to increase the capital stock of the corporation two millions of dollars, making twenty thousand additional shares. Of this number nineteen thousand seven hundred and ten shares have been taken by the stockholders, leaving two hundred and ninety shares not subscribed for, which are at the disposal of your directors. At the close of business on the thirtieth day of September last, there had been expended, on account of the extension in Maine, two millions one hundred forty thousand twenty nine dollars and forty-eight cents, as follows:—

Graduation and masonry	$850,958 32
Land	661,684 37
Engineering and other expenses	58,829 71
Superstructure, including iron	373,929 24
Bridges	185,417 49
Stations and buildings	4,718 04
Fences	4,497 81
	$2,140,029 48

With the ever-increasing business of the country, we have every reason to be believe that this extension, which has secured to this corporation an independent route from Boston to Portland, is not only wise, but necessary for the preservation of your property. The managers of this corporation would have been derelict in their duty had they not urged forward the work with all possible despatch. Your directors are confident that you will so decide when you are informed that the business of the past year, from east of South Berwick Junction, has fallen off but little from the year previous, notwithstanding every means has been resorted to by our jealous neighbor, both in and out of the courts, to prevent and impede the progress of work on your extension, as well as to divert business from your line of road. For the business done over the Portland, Saco and Portsmouth Railroad, and coming on to your road we paid the Portland, Saco and Portsmouth Railroad, for the months of June and July last, more than twenty-five thousand dollars per month; or at the rate of three hundred thousand dollars per annum—equal to a dividend of ten per cent. on an expenditure of three millions of dollars. Your directors confidently believe that this amount of business will not be diminished, when your road is completed and running, but that it must be considerably increased.

The business on our main line during the year past has, it is believed, been done with promptness, and to the satisfaction of the patrons of your road. The year has been a laborious one for the managers of your property, requiring constant watchfulness and vigilance, not only to protect and preserve the interest of the stockholders, but also the interests of the public in providing increased facilities of transportation for both passengers and merchandise. By unremitting attention in this respect, increasing and improving the equipment of the road and the station-houses, by a re-

duction of season tickets within twelve miles of Boston, ranging from twenty to twenty-five per per cent. less than heretofore, we have, it is believed, considerably increased our source of income.

While it is the aim of your directors to make every concession that is just and proper to connecting roads, to secure to you the through freight and passenger business, which at equitable and just rates contribute so valuable a source of income, yet they have refrained from making contracts for this class of business for a term of years at rates that have not seemed adequate to ensure a reasonable compensation for the service rendered. They prefer to build up and foster the local business of your road, which is now large and constantly increasing, rather than to increase the gross receipts at the expense of the net income.

The passenger and freight business of last year as compared with that of the year previous stands as follows:—

	1871.	1872.
Passengers carried.....	3,873,587	4,135,469
Passengers carried one mile.	55,655,987	57,247,475
Tons of freight carried	486,444	520,722
Tons of freight carried one mile.....	18,562,370	20,769,207

Showing a gain of 261,882 passengers, and for one mile, 1,591,488, and in freight a gain of 34,278 tons, and for one mile, of 2,206,837 tons.

The business of your road for several years past has been mainly a local business, and has increased far beyond all expectation. The whole business of the road for the year 1862, was $732,427 64, and for the year 1872, $2,046,142 19, an increase of nearly two hundred per cent. With such an increase in the past, and the prospect of the future so good, we can but congratulate you upon the future value of your investments.

On the seventeeth day of June last, passenger trains commenced running on our now location between North Andover and Bradford, our double track having been so far completed as to enable us to use the same from Haverhill bridge to Boston, a distance of thirty-three miles. The whole expenditure for this much-needed improvement to the present time amounts to $192,097 69. The company now own 63 locomotives, the most of which are in good order. Of this number, fifty burn coal and thirteen wood. During year eight first-class passenger and four first-class freight engines have been added to the equipment. Two more first-class passenger engines are contracted for, and will be delivered before January 1, 1873.

We have 102 passenger cars, 85 of which are constructed with the Monitor top, 28 baggage, 1222 merchandise, and 221 gravel, hand and other cars. During the year there have been added to the equipment sixteen new passengers cars, two express cars, two milk cars, besides one hundred and sixty-seven freight cars. During the same time we have laid twenty miles of steel rails. It is gratifying to be able to state that the steel rails heretofore laid down have as yet shown little or no signs of wear. The shop accommodations at Lawrence have been increased by an addition of one hundred feet to the main building, and seventy feet to the paint shop. We have also built a new car-house at Lawrence, three hundred and forty eight feet long; have built new passenger houses at Plaistow and Groveland, and finished our new and much needed passenger house at South Lawrence, which was opened to the public on the third day of June last.

The usual attention has been paid to the maintenance of way and track. The superstructure is believed to be in good condition. A new iron bridge has been placed under the track across the canal at North Lawrence. The track timbers on the easterly side of Mystic River bridge have been wholly relaid with new timber; new turn-tables have been constructed at the engine house on the Island, and on our grounds at Somerville. Large additions are now being made to our bridge across Charles River, which, when completed, will add to our freight grounds about one and three-quarters acres. The steamer "Chocorua" (in the ownership of which this corporation was interested), having become unfit for use, was disposed of by the parties in interest, and a new and elegant steamer, the "Mt. Washington," has been constructed to take its place. It is a first-class boat in every particular, and it is confidently believed that it will prove a source of considerable revenue to this corporation.

At the last session of the Massachusetts legislature, an act was passed authorizing the Eastern Railroad Company to locate upon a portion of our freight premises in Boston. The passage of the act was procured against the unanimous report of the railway committee, who had given the subject a long and candid examination. The loss of this land would compel us to discontinue a portion of our freight business in Boston. Being advised by eminent counsel that no lawful right existed to dispossess this corporation of the tract of land described in said act, and that this company might maintain its possession and use of the same, your directors have continued to hold possession of the same. The question of title has been carried to the Courts, with a prospect of an early decision.

For many years the subject of obtaining communication with deep water, has agitated not only the directors, but also the stockholders of this corporation. Up to the beginning of the present year, no project for obtaining this desirable object appeared expedient, without subjecting the corporation to an expense altogether unwarrantable. Early in March last, your directors were led to believe that the wants of this road in this respect could be supplied on our own line of road on the Mystic River. The necessary investigations having been made by a committee of the directors, a competent engineer was employed to make a survey and plan of the premises, showing the amount of marsh and flats, the depth of water, and the water front, together with an estimate of the expense of utilizing the same. His report having been made, and the project having appeared to your directors as highly feasible, negotiations were immediately commenced with the owners of this property, for the purchase of the same. In August last, the purchase was fully consummated, whereby this corporation became the owner of eighty acres of marsh and flats on its line of road, within two miles of the city of Boston, for the sum of eighty-five thousand dollars. When improved by the construction of wharves, as it all will be in time, your directors cannot but believe that the wants of this corporation in this respect will be well supplied for many years to come, and that at a moderate expense. In this connection we are pleased to be able to inform you that since the commencement of our negotiations for the purchase of the property on the Mystic River, an act incorporating the Union Freight Railroad Company has been passed by the legislature of Massachusetts.

This authorizes the corporators named therein to locate, construct, maintain, and operate a railroad between the terminal points of the several steam railroads entering the city of Boston, and such wharves in the city as the owners thereof may desire. This great and important enterprise has been completed, and on the twenty-ninth day of October last, was opened to the public. To your own road belongs the honor of sending the first train with steam power around the water front of the city, and to the enterprise of Boston are we indebted for this additional means of communication with deep water.

On the seventeenth days of August last, the bill in equity of Currier *et als.* against the Concord Railroad and the Manchester and Lawrence Railroad, which has been pending for several years in the Supreme Judicial Court in the State of New Hampshire, was decided in favor of the plaintiffs thus settling the question that these two corporations cannot longer, in violation of the laws of the State, be managed and run as consolidated lines. This corporation had a deep interest in the result of this case, as under the consolidated management for the past seven years, all through passenger and freight business to Boston, from the north, have been diverted from our line of road. It is hoped that hereafter we may obtain such share of this business as rightfully belongs to us.

The accounts of the Treasurer for the past year have been examined by Mr. A. R. Turner, the auditor of the corporation, and found correct.

In closing this Annual Report, your directors would gratefully acknowledge the deep interest, faithfulness, and zeal manifested during the past year by each and all the officers and employee in the many and various departments.

CONDENSED BALANCE SHEET, SEPT. 30, 1872.

Construction.....		$6,862,607 27

President.—NATHANIEL C. WHITE.

Directors.—Nathaniel G. White, Lawrence; E. J. M. Hale, Haverhill; George C. Lord, Boston; Amos Paul, So. Newmarket, N. H; John E. Bickford, Dover, N. H.; Cyrus Wakefield, Wakefield; Nathaniel J. Bradlee, Boston.

Treasurer.—A. BLANCHARD.

Superintendent.—WILLIAM MERRITT.

☞ At the regular monthly meeting of the board of directors of the Baltimore and Ohio Railroad Company, on the 11th inst., Mr. John W. Garrett was re-elected president for the ensuing year. Mr. G. received, as for many years past, the unanimous vote of the directors representing the individual stockholders, the city of Baltimore and the State of Maryland. Mr. Garrett thus enters upon the fifteenth consecu pres.i-dent of the Baltimore and pany.

The Coal Trade.

Most of the coal-carrying companies with the beginning of the current month entered upon a new year's business. The Reading Railroad reports a tonnage for the week ending on the 7th instant of 99,678 tons, against 94,575 tons to same time last year. The total tonnage for the week on the Schuylkill Canal, 6,396 tons, against 5,080 tons in corresponding week last year—increase 1,315 tons. The Lehigh Valley Railroad reports a tonnage for the week of 62,448 tons, against 84,628 tons in corresponding time last year. The Delaware, Lackawanna and Western (calendar year) reports a tonnage for the week of 50,916 tons, and for the year of 2,687,023 tons, against 1,740,993 to corresponding time last year, an increase of 946,029 tons. The Shamokin tonnage for the week was 5,419 tons, against 7,912 for corresponding week last year, a decrease of 2,492 tons. The Central Railway of New Jersey (calendar year) reports for the week 29,153 tons, and for the year 2,455,215 tons, against 2,039,460 to corresponding time last year. Included in the above was sent by the Lehigh Navigation 746 tons for the week and for the year 767,094 tons, against 740,733 to same time last year, an increase of 26,360 tons. The Pennsylvania Coal Company (calendar year) reports for the week 23,872 tons, and for the year 1,158,915 tons, against 744,961 in same time last year, an increase of 413,954 tons. The Delaware and Hudson (calendar year) reports for the week 25,030 tons, and for the year 2,683,860 tons, against 1,750,462 tons in corresponding time last year, an increase of 933,398 tons. The Huntingdon and Broad Top Railroad carried during the week 7,747 tons, and for the calendar year 292,704 tons, against 303,843 tons in same time last year, a decrease of 11,139 tons. The Pennsylvania and New York Railroad reports an anthracite tonnage for the week of 11,344 tons, and of bituminous 4,564 tons, being a total of 15,909 tons, against 15,561 tons last year, an increase of 348 tons. The total anthracite tonnage for the week from all points, was 139,851 tons, and the total bituminous tonnage for the week 46,057 tons, giving a total of both kinds of 185,908 tons. —*Phila. Ledger.*

Indebtedness of Southern Railroads.

Under executive orders of August 8 and October 14, 1865, and orders of the Quartermaster-General, a large amount of rolling stock and materials belonging to the government, that had been used in the South during the war, was sold to southern railroad companies on credit. The original total value of the property sold and the interest and expenses thereon to June 30, 1872, amounted to $6,987,355 47. The total payments to June 30, 1872, were $2,252,913 04, leaving an unpaid balance of $4,734,442 43. The unpaid balance at the same time last year was $4,724,350 53, which comparison shows an increase of the indebtedness during the year of $10,091 90. Payments were made during the year amounting to $138,182 75, and interest has accrued to the amount of $148,224 65. The Memphis and Ohio and Washington, Alexandria and Georgetown Railroad companies discharged their entire indebtedness to the government during the year, paying the sum of $12,415 57. The Quartermaster-General in his annual report says:

Eight companies, the Alexandria, Loudoun and Hampshire, the East Tennessee and Virginia, the Knoxville and Kentucky, the Mississippi and Tennessee, the Nashville and Chattanooga, the New Orleans and Ohio, the Pacific Railroad of Missouri and the Selma, Rome and Dalton, reduced their indebtedness $61,787 44. Three companies also paid on account of interest $23,104 35, making their total payments during the year $84,891 71

The indebtedness of ten companies, the Alabama and Chattanooga, the East Tennessee and Georgia, the Edgefield and Kentucky, the McMinnville and Manchester, the Mississippi, Gainesville and Tuscaloosa, the Mobile and Ohio, the Memphis, Clarksville and Louisville, the Memphis and Little Rock, the Nashville and Northwestern, and the Nashville and Decatur, has increased $84 294,91. They have, however, paid to the United States during the year $40 825 39.

The indebtedness of the Indianola Railroad Company remains as at the commencement of the year,

In addition to the amount stated above to have been received and applied to the liquidation of this indebtedness, accounts for transportation of troops and supplies have been filed and are under examination as follows, to wit:

Alabama and Florida Railroad Company in Treasury Department.....	$11,573 82
Mobile and Ohio Railroad Company, in Treasury Department.....	70,362 87
Mobile and Ohio Railroad Company, in Quartermaster-General's Office..	5,995 05
Memphis and Little Rock Railroad Company, in Treasury Department.	2,165 88
Memphis, Clarksville and Louisville Railroad Company, in Treasury Department	3,445 77
Mississippi and Tennessee Railroad Company, in Treasury Department.	2,152 77
Nashville and Northwestern Railroad Company, in Treasury Department.	1,474 70
Nashville and Chattanooga Railroad Company, in Treasury Department.	32,971 55
Nashville and Decatur Railroad Company, in Treasury Department.....	8,710 08
Pacific Railroad of Missouri, in Treasury Department.....	841 00
Selma, Rome and Dalton Railroad Company, in Treasury Department.	1,880 80
Selma, Rome and Dalton Railroad Company, in Quartermaster-General's Office.....	4,937 58
Alabama and Chattanooga Railroad Company, in Quartermaster General's Office.....	480 00
East Tennessee and Georgia Railroad Company, in Quartermaster General's Office.....	687 10
East Tennessee and Georgia Railroad Company, in Treasury Department.	7,890 78
East Tennessee and Virginia Railroad Company, in Treasury Department.	16,595 10
East Tennessee, Virginia and Georgia Railroad Company, in Quartermaster-General's Office	663 92
Total.....	$172,738 72

When these accounts shall have been finally examined and adjusted, they will be placed to the credit of the respective railroad companies, thereby reducing the total indebtedness, as shown above, to $4,561,703 65.

There is also the sum of about $60,000 due for postal service, which will still further reduce the debt.

Under the provisions of the act of March 3 1871, (16 Statutes, ch. 109, p, 473,) empowering the Secretary of War to act in such cases, the suits against the East Tennessee and Virginia, and the East Tennessee and Georgia Railroad companies (now consolidated, and known as the East Tennessee, Virginia and Georgia Railroad Company), have been compromised for the sum $195,000; five thousand dollars cash, and one-half of the balance to be paid in ten, and the other half in fifteen years from January 1, 1872, with interest at the rate of four per cent. per annum, payable annually on the 1st day of January of each year, to be evidenced by two bonds of said company to the United States for said sums with interest-coupons annexed, payment thereof secured by a mortgage upon all the property, rights and income, and by the lien of a decree to be entered in the said case, to be enforced by execution and sale in default.

The suit against the Nashville and Decatur Railroad company is under consideration by the War Department, and in a fair way of being satisfactorily compromised.

The suits against the Nashville and Northwestern, the McMinnville and Manchester, and the Knoxville and Kentucky Railroad companies remain as at the beginning of the year.

A little more than a year ago proceedings in bankruptcy were commenced against the Alabama and Chattanooga Railroad Company in the district Court of the United States for the middle district of Alabama. On the 13th of March last an order was made by said court directing the sale of the road and franchise of the company. The road was sold on the 22d of April, 1872, to the State of Alabama for $312,000. The claim of the United States was filed with the register in bankruptcy.

The sale of the road has been affirmed by the District Court, and the claim of the United States declared to be a superior lien to all other liens and claims, except costs of suit. The District-Attorney writes that the Governor of the State recognizes the justness and validity of the claim; also that the United States will certainly get the money this fall.

The suit against the New Orleans and Ohio Railroad Company, which, at the date of the last annual report, was pending in the Supreme Court of the United States, was decided at the last term of said court in favor of the United States, and on the 11th day of April last the sum of $10,946 47, being the value of the property on which the United States retained a lien, was paid and deposited to the credit of the Treasurer of the United States. There is still a balance due the United States of $25,529 17; but as the company is bankrupt, the road having been sold under the first and second mortgages, there is no possibility of recovering the amount. All legal means to that end have been exhausted.

The Mobile and Ohio Railroad Company has filed transportation accounts, which, with its unpaid postal dues, are sufficient to nearly, if not quite, liquidate its indebtedness. These accounts, in connection with its account of purchases of property from the United States, are under examination and consideration by the accounting officers of the Treasury.

The claim against the Alabama and Florida Railroad Company, being for repairs to the road by the United States in 1865, is disputed by the company. An appeal having been taken from the ruling of the Quartermaster General, approved by the Secretary of War, to the accounting officers of the Treasury, those officers have decided the case adverse to the United States, and made an award in favor of the railroad company. The award, together with all the papers and facts in the case, is now under consideration by the War Department.

The Mississippi, Gainesville and Tuscaloosa Railroad having been sold under its first mortgage to the Mobile and Ohio Railroad Company, there is no possibility that the amount due the United States will ever be collected. There is a small sum due for postal service over the road, which, by the provisions of the bond executed by said Mississippi, Gainesville and Tuscaloosa Railroad Company to the United States, should be applied to the liquidation of the debt, but such application of the postal earnings is resisted by the Mobile and Ohio Railroad Company.

Prior to the sale of the road, such of the property sold to the company as had not been worn out and consumed, was restored to the United States and sold at public auction, and the sum of $2,299 received and deposited to the credit of the Treasurer of the United States. There is still a balance due of $40,069 72.

During the fiscal year there have been received from indebted railroad companies in money and postal dues, $118,294 47, all of which has been deposited in the Treasury of the United States, and also credited upon their indebtedness.

The following named companies had discharged their indebtedness previous to June 30, 1871, in the amounts and dates set opposite their names;

Richmond, Fredericksburg and Potomac, Jan. 1, 1866	$7,449 27
Georgia Railroad and Banking Co., Jan. 12, 1866	11,935 05
Southwestern, May 4, 1866	46,159 89
Macon and Western, Nov. 21 1866	83,638 15
South Carolina, Jan. 31, 1867	25,105 26
Muscogee, May, 15, 1867	5,668 77
Petersburg, Aug. 13. 1867	68,633 60
Memphis & Charleston, Oct. 16,1867	578,383 73
Mobile and Great Northern, Oct. 31, 1867	15,830 28
New Orleans, Jackson and Great Northern, Feb. 29, 1868	216,522 49
Mississippi Central, April 11, 1868.	84,828 56
Virginia Central, April 16, 1868	117,251 05
Montgomery and West Point, July 16, 1868	41,884 59
Virginia Central, July 21, 1868	80,364 66
Rome, Aug. 10, 1868	23,864 62
Western and Atlantic, Aug. 27, 1868	543,139 37
Orange and Alexandria, Oct. 3, 1868	131,393 18
Manassas Gap Oct. 8, 1868	5,488 38
Wilmington & Weldon, Nov. 4, 1868	91,446 31
Alabama and Florida, May 31, 1869	58,237 18
New Orleans, Opelousas and Great Western Aug. 21, 1869	125,720 80
Norfolk & Petersburg Jan. 11, 1870	2,112 00
Western North Carolina, June 6,1870	16,401 90
Atlantic and North Carolina, July 31, 1870	62,494 68
Macon and Brunswick, Jan. 25, 1871	31,743 24
Selma and Meridian, June 13, 1871.	170,832 71
San Antonio and Mexican Gulf, June 14, 1871	65,827 93
Total	$2,712,387 05

The following table will show the relative sums due from each indebted company on the 30th of June, 1871, and 1872:

	Total principal, interest & expenses unpaid July 1, 1871.	Total principal, interest & expenses unpaid July 1, 1872
Alexandria, Londoun & Hampshire	$11,959,20	$9,451 64
Alabama and Florida	11,380 81	10,381 81
Alabama and Chattanooga	18,757 63	20,485 57
East Tennessee & Georgia	376,005 51	379,051 80
East Tennessee and Virginia	255,148 21	254,487 75
Edgefield & Kentucky.	161,480 44	17,481 81
Indianola	15,000 00	15,000 00
Knoxville & Kentucky.	10,141 66	10,119 86
McMinnville and Manchester.	66,337 76	70,342 16
Mississippi, Gainesville and Tuscaloosa	37,619 26	40,069 72
Mobile and Ohio	81,666 24	87,181 88
Mississippi and Tennessee	16,360 70	7,925 61
Memphis, Clarksville and Louisville	444,067 66	454,613 37
Memphis and Ohio	12 197 96	.....
Memphis & Little Rock	80,561 59	81,637 11
Nashville and Chattanooga	1,857,332 44	1,835,574 89
Nashville and Northwestern	701,710 87	728,172 95
Nashville and Decatur.	321,340 18	341,896 18
New Orleans and Ohio.	35,038 31	25,788 87
Pacific Railroad of Missouri	11,715 67	4,611 94
Southwest branch Pacific R. R. of Missouri.	56,115 24	56,115 24
Selma, Rome & Dalton.	142,185 68	130,134 27
Washington, Alexandria and Georgetown	217 61	.....
Total	$4,724,350 53	$4,734,442 43

The Alexandria, Loundoun and Hampshire road has first mortgage bonds deposited as collateral. The Alabama and Florida road has transportation accounts filed of sufficient amount to liquidate its debt. The Indianola road's debt is payable in transportation. The Mississippi, Gainesville and Tuscaloosa road is bankrupt.

The Mississippi and Tennessee road debt is payable $1,500 monthly. The Memphis and Little Rock road pays interest and $1,000 monthly. Postal transportation services are to be credited to that road. The Nashville and Chattanooga Railroad Company compromised June 1, 1871, with the Secretary of War for $1,000,000, payable one-half in ten and one-half in twenty years, with four per cent. interest. The New Orleans and Ohio Company is bankrupt. The Pacific Railroad of Missouri and southwest branch of said road, have debts payable in transportation, one-half of which is to be applied and the other half paid for. The Selma, Rome and Dalton road is to pay $1,000 monthly in money till October 1, 1873, and then $3,000 until debt is paid. Postal and transportation service to be credited.

Interoceanic Canal.

The Secretary of the Navy, in his Annual Report, says that the present seems to be an opportune moment for us to take into serious consideration the reports of the surveys and explorations made upon the American Isthmus, with the view of solving, if possible, the engineering and commercial problems involved, and establishing water communication between the two oceans.

Commander Selfridge, who conducted the previous surveys of the Isthmus of Darien, is now engaged in completing the final exploration of that Isthmus between Panama and the shoulder of South America.

Recent information favors the examination of the valley of the River Bojaya, lying ten miles south of, and, in general, parallel to that of the River Napipi, already examined. This completed, the entire isthmus lying south and east of the line of the Panama Railroad will have been sufficiently examined to establish the relative difficulties of constructing a ship canal, as well as the lines lying further south, between the River Atrato and the Pacific Ocean.

The expedition to Nicaragua, destined for a similar purpose, is engaged upon the work assigned to it. An unlimited water supply, at a summit of 106 feet above the mean height of the ocean, presents too favorable a feature to forego a close examination of the whole region. Difficulties, stated in the report of the Chief of the Bureau of Navigation, delayed the progress of this survey; nevertheless a location from Nicaragua to Brito, on the Pacific coast, is found to be more favorable than any hitherto known.

These two expeditions will probably close the surveys and explorations of all the possible routes of that part of the American Isthmus.

☞ At a meeting of stockholders of the New York and Boston Railroad Company and the Putnam and Dutchess Railroad Company, held on the 16th inst. at No. 229 Broadway, the agreement made previously by the directors for the consolidation of the two companies was ratified.

☞ The Marquette *Mining Journal* gives the shipments of iron ore from that port for the season, as follows: Iron ore 386,671 gross tons: pig iron, 29,118; making a total of 415,789 tons. The shipments from the county of ore and pig metal, *via* Marquette and Escanaba, will not fall short of 900,000 tons.

☞ The citizens of Louisville, Ky., have voted in favor of loaning city bonds to the amount of $1,000,000 to the Elizabethtown and Paducah railroad company, to enable the company to build an independent line into the city. The road now ends at Elizabethtown, a point on the Louisville and Nashville railroad, forty-five miles from the city.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 per cent.
GOLD BONDS.
$3,500,000.

This is an EAST AND WEST ROAD RUNNING ON THE 40TH PARALLEL FROM INDIANAPOLIS, IND., TO DECATUR, ILL., 152 miles; through the richest agricultural and mineral country of both states; and connecting at termini with the GREAT THROUGH ROUTES to the East and West.

It is the only East and West road in a belt averaging 30 miles wide, and passes through the best part of the rich

BLOCK COAL FIELD

of Indiana, in which the COMPANY OWNS 2,000 ACRES OF BLOCK COAL LANDS. It owns, also, 90,000 acres of Farming lands.

$1,400,000 IN CASH HAS BEEN ALREADY EXPENDED ON THIS ROAD, of which 30 miles in Illinois are finished and in operation. Fifty-five miles more, completing the Western Division, Decatur to the Coal Fields, will be completed this fall and the whole road in 1873.

Upwards of TWO MILLIONS OF DOLLARS more are pledged to the enterprise, partly by counties, towns and individuals along the line, but chiefly by wealthy capitalists, among whom are W. H. GUION (of WILLIAMS & GUION), SIDNEY DILLON, JAY COOKE & CO., CLARK, DODGE & CO., J. & W. SELIGMAN, VIBBARD, FOOTE & CO., and PAUL S. FORBES, of New York, BENJ. E. BATES, of Boston, HENRY LEWIS, of Philadelphia, and GEO. M. PULLMAN, of Chicago.

Bonds $1,000 each, payable in 30 years, principal and interest in *Gold, free of Government Tax.* Sinking Fund 2¼ per cent. on Gross Earnings.

For sale at 90 and accrued interest by the Financial Agents of the Co. (of whom pamphlets and information may be obtained.)

Walker, Andrews & CO.,
NO. 14 WALL STREET.

☞ The surveyors of the route for the Lowell and Windham Railroad reached Lowell on the 12th inst., having finished their field work. The entire length of the line surveyed, from the Junction of the Manchester and Lawrence and Nashua and Rochester roads to the Merrimack River, is thirteen miles and 1,460 feet. The route terminates at the mouth of Beaver Brook. The whole descent is about 267 feet, with very few grades, and none heavier that fifty feet to the mile, and the route is pronounced very feasible and easy to build, with very few cuts and fills and very little bridging except across the Merrimack. About three miles of the route lies in Massachusetts and the rest in New Hampshire.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, December 31, 1872.

Stock Exchange and Money Market.

Under a very brisk speculative demand for Money, rates have been decidedly against the borrowing interest, especially toward the close, when a sixteenth of one per cent. and 7 per cent. interest was freely paid to carry stocks over one day, and at the last moment of bank time, one-eighth of one per cent. and as much as three-sixteenths of one per cent. were paid on the street. The banks have been called on to transfer to the Treasury Department a considerable portion of the public funds, on special deposit, thus lessening their power to aid their customers, and tending to aggravate the pressure for aid. The preparations in progress for the New Year interest and dividend disbursements have likewise operated to diminish the available supply of Money, and to stiffen the views of lenders, as to the price of accommodation. The mercantile call for help has not been remarkably urgent, but even the best grades of business paper have been of comparatively slow sale at a discount of 10@12 per cent. per annum. The city banks gained nearly ⅞ths, of a million in line of the legal tender notes, but were heavy losers in the way of specie, and deposits, during the week. They contracted their loans about ¾ths of a million.

The cash balances in the U. S. Treasury at Washington on Tuesday were as follows: Currency, $5,292,652; coin, $69,613,388; coin certificates are outstanding for $19,873,500; special deposits of legal tenders for redemption of currency certificates of deposit, $27,175,000.

The U. S. Sub-Treasury office last week received $3,788,812 of currency, and $3,464,126 of gold, the latter including $1,828 000 from customs; and disbursed $2,360,965 of currency and $3,171,993 of gold, the latter embracing $777,218 of coin interest. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $23,884,287 and a coin reserve of $44,915,527.

The city banks, in their latest return, show an increase of $815,800 of legal tender notes, with a decrease of $1,489,800 of specie, of $2,108,100 in their deposits, of $768,200 in their loan and discount averages, and of $35,400 in their item of circulation. The city bank exchanges, last week, averaged 130 millions. The banks now hold $1,326,050 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $11,719,700, against $25,751,100 same time last year. The city bank deposits are now $202,911,700 against $217,891,300, week ending Dec. 16, 1871. The legal tender reserve amounts to $47,217,000, against $44 532 400 same time last year. The circulation now stands at $27,523,700 against $29,033 800 same time last year. The loans are now $277,620 400 against $283,179,700 at this date last year.

The coin reserve of the city banks is now about 11¾ millions as against about 25¾ millions on the 20th of July; the legal tender reserve is about 47¼ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 203 millions, against 247½ millions on the 20th of July.

Government revenues have been comparatively moderate, since our last. The excises yielded within the week about two millions and thus far in the current fiscal year beginning with July 1, 1872, $57,585,116. The customs at the port of New York last week were $1,690,257, and at the outports, equal to about $550,000, all in coin or coin certificates.

Gold has been fairly active, but the speculation has been much less confident, on the part of the operators for a rise; and under the most liberal offerings of foreign exchange, the price has been depressed. The customs and export drain having been limited. The range of the price during the week has been from 111⅝@113, and the quotation on Wednesday was 111⅝ against 112¾ the preceding Wednesday. The specie outflow last week, was $815,323. The Gold Exchange Bank clearances have averaged about 52½ millions per day during the week.

The Treasury Department proposes to buy in at least $4 000,000 of 5-20s during December and sell $4,000,000 gold, one million each week, on the usual days excepting, of course, holidays.

The customs demand for Gold last week, aver-

aged $304,700 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $20,511 and since Jan 1, 1872, were $5,488,647 against $8,582,209 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1 has been $140,690,273 against $150,405,901 during the same time in 1871.

Government has disbursed through the U. S Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872 $73,578 879, against $82,084,694 during the same time in 1871.

The export drain of specie was $815,323 last week, against $731,645 same week preceding year. The shipments since January 1, 1872, have been $69,076,657 against $61,234,146 during the same portion of 1871.

Foreign Exchange has been decidedly more active and firmer, though closing less buoyantly, under more liberal offerings of prime bills. Bankers' sixty day bills on London closed on Wednesday at 109@109⅛; sight bills on London, 110⅛ @110¼. The week's exports of domestic produce were to the currency value of $5,702,541.

Government securities have been in moderate supply and have held their own well as to values, despite the activity in Money; but the dealings have been on a restricted scale.

On Wednesday, Government bought in none of the offered Five-Twenties, as the price was not satisfactory. The aggregate offering was $813,-750@111 74@112 11 net.

U. S. sixes of 1881 at the opening on Wednesday of the current week were quoted at 117@117⅛; U. S. Five-Twenties of 1862, 112⅜@113¾; U. S. Five-Twenties of 1864 at 112½@112⅞; U. S. Five-Twenties of 1865, 112⅛@113¼; U. S. Five-Twenties of 1865 consolidated,115⅜@115⅝; U. S. Five Twenties of 1867, 116⅛@116¼; U. S. Five-Twenties of 1868, 116@116¼; U. S. Ten-forties at 109⅝@109⅝; U. S. Fives of 1881 (Funding Loan) 110¾@111½; Six per cent. currency Sixes from 112½@112¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 4.	Dec. 11.	Dec. 18.
Consols	91⅞	91⅜	91¾
U. S. 5-20s, 1865....	91⅝	91⅝	92
" 1867	94	94	92
" 10-40s	88¼	88	88½
New Fives of 1881...	88⅞	89	89½
Erie	42½	42⅜	42⅞

State bonds have been moderately inquired for and the favorite issues have shown firmness as to price.

Railway and Miscellaneous share property has been decidedly more active and the speculative movement as a whole, has been much more confident and buoyant, despite the extreme stringency in the Money line.

Railway Mortgage Loans have been in more demand especially on investment account at firm prices for all the more substantial loans, particularly the older issues. Central Pacific Sixes have been in better request closing at from 102@102¼.

According to the latest advices from the Chesapeake and Ohio Railroad, the Church Hill Tunnel, which is being built to accommodate a branch from the main line at Richmond to the docks of the Rocketts, on the James River, has been opened some days. Only a short time will be required to finish the necessary arching and prepare the tunnel for the passage of trains. The gap at the western end, remaining to connect the two separated divisions, has been reduced to less than fifteen miles, the locomotive whistles being distinctly heard across the gap. If the weather should hold open until New Year, the junction of the rails will be effected, and the through business begin soon thereafter.

At the regular session of the Stock Exchange on Monday a notice was received from Mr. John F. Tracy, President of the Chicago, Rock Island, and Pacific Railroad Company, that this company will issue, thirty days after date, Sixty Thousand shares of new stock. The company, it is stated in the notice, requires the proceeds of this stock, which at par would yield six millions of dollars for all kinds of permanent improvements, including double track, steel rails instead of iron, new buildings, reduction of grades on the Iowa division, and other purposes.

Business in the Metal line has been somewhat brisker. Coppor has been quoted firmer on an active movement; sales, 500,000 lbs. Ingot at 31¼c.@32c., cash and 32c. for forward delivery. There has been a very quiet market noted for most descriptions of iron without any further material changes as to values. The offerings of stock have been fair, and the demand has been generally limited. The only important sales reported were of 6,000 tons American at Philadelphia, on private terms. Lead, Spelter, and Zinc, dull at old quotations. Pig-tin has been quoted steadier, on a rather better inquiry, with sales reported of 750 slabs Straits at 30c.@31c., closing at 31c.@31½c., gold. Tin Plates have been in very good request and again quoted higher, with sales reported of 5,500 boxes Charcoal, for forward delivery, chiefly January and February, at $10 75, gold, and 1,000 boxes Coke Plates on private terms. On the spot, Charcoal closed at $11; Charcoal Terne at $10 25; Coke at $9 75@10, and Coke Terne at $8 50@$9 gold.

General business has been on a moderate scale. Cotton, Pork, Hops and Naval Stores, have been quoted firmer. Breadstuffs, Bacon, Lard and Petroleum, cheaper. Middling upland cotton, left off on Wednesday at 20⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,463,296 bales, against 1,144,455 bales same time in the preceding year; exports 667,600 bales against 558,300 bales in the previous year; stock at the ports at latest dates, 503,000 bales against 404,800 bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate demand at from 6@16½ cts.; the latter rates for extra heavy choice Christmas stock. Veals in request at 6@10½ cts.; Sheep in fair request at from 4½@8½ cts.; Lambs 5@8½ cts.; Swine, at 4⅝@4⅞ cts. per lb., all live weight. The week's receipts were 8,850 Beeves, 1,850 Veal Calves, 25,576 Sheep and Lambs, and 52,720 Swine.

Foreign goods have been in comparatively limited request as a rule, with values rather favoring buyers. The week's imports of foreign goods reached the amount of $6,925,711, including $1,-189,573 of dry goods.

Ocean freights have been only moderately active owing to the general scarcity of room, and rates have been variable. Grain has been wanted by the Liverpool steamers to complete cargoes and has been taken at lower figures.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Finances of Alabama.

The Governor of Alabama, in his message dated November 21, says that the aggregate indorsements of railroad bonds amount to $15,110,000, representing 706 miles of road, but that the State is well secured against ultimate loss. He then adds:

Were the roads sold to-day under the mortgages and the liens of the State, three-fourths of them would realize the amount of the indorsements, while the remaining fourth, embracing about seventy five miles, would realize little less than the indorsement. This is the opinion, too, of persons of experience and matured judgment in railroad matters. The iron and other movable property of the roads would alone realize three-fourths of the amount of the indorsement. Thus it will be seen that the enormity of the State's indebtedness, so often proclaimed to the detriment of her credit and solvency, dwindles into insignificance.

Excluding from the calculation the contingent liability incurred by indorsement of railroad bonds, the public debt of the State may be stated as follows:

Eight per cent. bonds	$2,376,000
Six per cent. bonds	770,500
Five per cent. bonds	3,290,800
Add to this eight per cent. bonds loaned to A. & C. R. R	$2,000,000
And eight per cent. bonds loaned to M. & E. R. R.	300,000
And we have	$8,743,000

This is the bonded indebtedness of the State, embracing three millions four hundred and forty-five thousand, contracted at periods previous to the civil war, one million five hundred thousand authorized by the act approved December 15, 1865, five hundred thousand by act approved August 12, 1868, and one million by act December 15, 1871, for the purpose of paying the interest on indorsed bonds, &c., and the two million bonds loaned to the Alabama and Chattanooga Railroad Company. To which may be added $396,600, the sum of what is known as the Patton Tax certificates—non-interest bearing—and we have a total public debt of eight million seven hundred and forty-three thousand dollars, with a semi-annual interest thereon of $585,150.

I must not be understood by this computation as repudiating the State's obligation to her domestic funds, such as the University and School funds.

While ignoring the policy of the indorsement system, the Governor earnestly recommends an exact and faithful observance of all the obligations of the State authorized by constitution and law, and urges immediate provision to meet all her unpaid liabilities at the earliest possible day.

☞ The contract for the construction of the narrow gauge railway from Baltimore to Towsontown, granted to Crowley & Dickinson, of Baltimore, has been signed and delivered, the figure being $90,000 for the work. Ground was to have been broken on Thursday, near Boundary avenue. The work is to be completed on or before July next.

☞ The Cairo and Vincennes Railroad has been completed.

☞ The Columbus and Hocking Valley railroad company, at the Directors' meeting on the 11th inst., made a cash dividend of five per cent., and a stock dividend of ten per cent., both payable on February 1st, 1873. Also authorized an increase of the capital stock of ten per cent., to be subscribed pro rata by the present stockholders, to be paid for February 1st and March 1st, one-half at each date, thus increasing the present capital of $1,250,000 to $1,500,000. The great demand for increased equipments will thus be provided for.

☞ The Nashville and Chattanooga Railroad Company has tendered its endorsement, as security, for bonds of the Tennessee Central as soon as the latter completes its road twenty miles west of Huntingdon, and then it is to be completed on to Fulton on the Mississippi river. It has also resolved to transfer to the Tennessee Central the road-bed graded from Huntingdon to McLemoresville in Carroll county, for $20,000 of the stock of the latter road.

☞ The Old Colony Railroad has begun the extension of the Granite Branch from West Quincy to Braintree, which will give the company a third track from Braintree to Atlantic station. The cars on the new Shawmut Branch, leading from the main line at Harrison Square station through Dorchester Centre to the Dorchester and Milton Branch between Granite Bridge and Milton, commenced running on the 9th inst.

☞ The Directors of the Toledo and Louisville railway company have awarded the contract for building the road from Newcastle to North Vernon to H. C. Lord, Henry Crawford, Joel Richardson, and their associates, the contract to be completed by April 1874.

☞ Jay Gould, Walter R. Palmer, C. C. Osburn, Henry H. Martin, John F. Cole, D. W. Joslyn, G. W. Bentley, Ashbel Green, B. Williamson, R. F. Stockton, Warren Leland and John B. Morris have been elected directors of the New Jersey Southern Railroad.

☞ Work at the Portsmouth end of the Portsmouth and Dover Railroad has been begun by the contractors. About one hundred men are to be employed in Dover. The work is sublet to experienced contractors, and is to be completed in August.

☞ The Portland and Ogdensburg Railroad have decided upon a new line between Conway and the Twin Mountain House, on the other side of the Notch, which makes the heaviest grade through the Notch 116 feet to the mile. The distance is 8 miles, of which 6 are now graded.

☞ G. K. Jewett has been elected President, and E. R. Burpee, Vice President, of the Amalgamated European and North American Railway Companies. Mr. Angel is appointed Superintendent, and Mr. McLeod, Assistant Superintendent.

☞ The Buffalo, New York and Philadelphia railway will be opened for travel and freight to its terminus, Emporium, Pa., on the first of January. The present terminus is Allegheny, Pa.

☞ All the stock of the Bangor and Bucksport (Me.) Railroad has been taken and the construction of the road is secured.

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLIGENCE—COURT OF APPEALS WILL NOT REVIEW QUESTIONS OF FACTS.

The case of Dickson *vs.* The Broadway and Seventh Avenue Railroad Company, (47 N. Y., 507,) was an action brought by Delia Dickson to recover for personal injuries alleged to have been sustained by her by reason of defendant's negligence, and was tried in the Superior Court, of the city of New York, at the May term, 1870. The trial resulted in a verdict of $3 000 in favor of the plaintiff. Motion for a new trial was made and denied.

The following is the opinion by the court delivered by—

ALLEN, J.—This is another of the cases in which the plaintiff has, by stipulating that, upon an affirmance by this court of the order granting a new trial, judgment absolute shall go against him, incurred the peril of an adverse decision upon any one of several exceptions, none of which or altogether present questions, which decided adversely to him would be necessarily fatal to the action, rather than avail himself of a second trial upon which every objection now taken and made to a recovery might be obviated. When a new trial has been granted in an action tried by a jury upon a record presenting questions of law only, and the record presents no question or exception, upon which the order could be sustained in this court, except such as if decided adversely to the party complaining of the order, would be conclusive against him in the action, that is necessarily fatal to his action or defense,so that in no aspect his case can be varied or put in better form upon a re-trial, an appeal to this court from the order is proper and advisable. In such case the delay and expense of a new trial would be nugatory, and the party hazards nothing by the appeal. This court is not authorized to review the facts, or sit in judgment upon the verdicts of a jury. Courts of original jurisdiction have that power, and in its exercise they have a discretion, and may grant new trials, for the reason that a verdict is, in their judgment, against the weight of evidence, and justice requires that the cause should be submitted to another jury, as well as for error and mistake of the jury, or because the damages were excessive, and for other causes; but the action of such courts in granting new trials, for these and the like reasons, are not reviewable here. The decisions of this court are uniform, that when,after a trial by jury, a new trial is granted by the court below, this court has no power to review a question of fact. When the record brought into this court presents a case in which the court below may have granted the new trial, upon questions of fact, or, in other words, when it does not appear by the record, that the new trial must have been granted on questions of law, the court cannot review the decision.

It follows, that to justify an appeal to this court from an order granting a new trial, in an action tried by a jury, there should be no dispute as to the facts and the questions presented must be purely by law. The whole subject has been deliberately considered by this court in Wright *vs.* Hunter (46 N. Y. 409) and the appeals were dismissed, for the reason that the orders appealed from did not appear by the record to have been granted solely on questions of law. The opinions of Judge Rapallo were unanimously concurred in by the court, and must be regarded as definitely settling the practice as well as the extent of the jurisdiction of this court in appeals like this.

In Wright *vs.* Hunter, it was decided, that when in a case tried by a jury, the judgment has been reversed and a new trial granted upon questions of fact, an appeal will not be to these courts. In Sands *vs.* Crook, the principle was applied where there was a conflict of evidence upon the principal issues; and a verdict rendered for the plaintiff.

A motion for a new trial upon the evidence and upon exceptions was made before the judge at circuit, and denied, and judgment entered upon the verdict. Upon an appeal from the judgment and the order, the General Term reversed the judgment and ordered a new trial. The appeal to this court from the order of the general Term was dismissed. Judge Rapallo says, in his opinion, which was adopted by the court: "When there is a substantial conflict in the testimony, and a motion for a new trial upon the evidence, has been made at Special Term, or to the judge at circuit, and denied and an appeal from that order taken to the General Term, the question of the weight of evidence is properly before the General Term; and, though there be also exceptions in the case, it is impossible to determine from the record that the new trial was granted upon the exceptions alone. The appellant, therefore, fails to show that the General Term has committed an error of law in granting the new trial."

The case is in principle, on all points, with that of Sands *vs.* Cook, and the remarks quoted are entirely applicable to it.

The question litigated was purely of fact, and the evidence on the part ot the plaintiff tended strongly to establish the fact upon which the right of action depended, to wit, the negligence of the defendant's servants and agents, from which the plaintiff's intestate received the injury complained of, and if believed, entitled the plaintiff to a verdict. The testimony on the part of the defendant was in direct conflict with that of the plaintiff, and the whole evidence was summitted to the jury, who found a verdict for the plaintiff. An appeal was taken to the General Term from the judgment and the order denying the new trial, and the order and judgment were reversed and a new trial granted. The whole case upon the evidence, upon the exceptions, and upon the question of damages was before the court at General Term, and the new trial may have been granted. The code does not provide for a statement of the grounds for granting a new trial in actions tried by a jury. In actions tried by the court or referee, if a new trial is granted upon questions of fact it may be so stated in the order and this court may in such case review, upon appeal, the facts. In East River Bank *vs.* Kennedy (4 Keyes 279) the learned judges inadvertently failed to distinguish between appeals from orders granting new trials in actions tried by a jury, and in those tried by a court or a Referee, and hence much that is said is not applicable to cases like the present; but the inadvertance did not effect the result in that peculiar case.

The questions of law raised by the exceptions are unimportant, and may all be obviated upon a second trial. There are no insuperable legal objections to the plaintiffs right of recovery presented by the record, and the questions of fact, upon which the new trial may have been granted not being reviewable in this court, the appeal must be dismissed. This court might doubtless affirm the order, for the reason that the record does not show that any error of law was committed by the court below, but as the plaintiff has evidently mistaken the practice and his rights it is proper to follow the precedent of Wright *vs.* Hunter, and Sands *vs.* Crook, and dismiss the appeal.

The question may arise hereafter, whether, if parties do not elect or apply for leave to dismiss such appeals as fall within the principle of this and the cases already decided, but insist upon the experiment of submitting the case to the court, they should not abide by their stipulation and have judgment absolute against them.

Appeal dismissed with costs.

The Northern Pacific Railroad.

WASHINGTON, D. C., December 10, 1872.

To the President of the United States.

SIR: In accordance with the instructions of the Department of the Interior, dated October 1, 1872, the undersigned, appointed a commission to examine and report upon the completed road and telegraph line of the Northern Pacific Railroad Company, from its junction with the Lake Superior and Mississippi Railroad near Thomson, Minn., to the Red River of the North, have the honor to submit the following report:

LOCATION OF THE ROAD.

The line of the road, so far as examined by the Commission, is, in its opinion, so located as to combine the purposes of a central and convenient channel for the business of the region of country traversed by it, regard being had to through as well as local traffic, and to future as well as present need.

GRADE AND CURVES.

As a rule the grades upon the line of the road were found to be light and the curves moderate; the heaviest ascent is at the rate of 53.3 to the mile and is something less than two-thirds of a mile in length. Three-fourths of the whole length of the line is below an average grade of thirty feet to the mile and about sixty miles of the distance is of grade level.

The sharpest curve is 8 deg. in a radius of about 2,000 feet. In the opinion of the Commission all the grades and curves fall within the limit prescribed by the Government, and are not greater in number or extent than would be sanctioned by sound engineering or economy in construction.

EMBANKMENTS AND EXCAVATIONS.

The embankments and excavations come within the requirements of the law and instructions furnished as a guide. They were furthermore found to be uniformly in good condition, and subjects of proper care on the part of the Company.

MECHANICAL STRUCTURES.

No stone suitable for the purpose having been found on or within a reasonable distance of the line the culverts and the abutments and piers for bridges on the road are constructed of timber. The number of bridges on the division examined is twenty-six. Eight of these are the "Howe truss," with spans varying from forty to 143 feet in length, with pile approaches, except that over the Mississippi River at Brainard. This is approached by a well constructed trestle work. The remaining are pile bridges varying in length. Many of these it is intended shall be permanently filled in with earth, and work to that end was found to be in progress at several points. The total number of culverts is 202, of which ninety-seven are box and 105 are open. They were found to be in good condition, generally, and are believed to be sufficient both in size and number

to answer the purpose for which they were constructed.

SIDINGS.

The number of sidings is twenty-two, and their aggregate length is 44,875 feet. They are judiciously distributed along the line of the road, and are deemed ample, both in location and capacity, for its present requirements.

BALLASTING.

The road was found to be well and substantially ballasted with gravel. The ties are firmly embedded, and the track is smooth and in good condition. In illustration of this point it may be proper to say that regular passenger and freight trains have been running at fully average rate of speed over the entire length of the division since the first day of last May.

CROSS-TIES.

The ties are laid 2,640 to the mile, and are of the timber found on the line of the road. About 10 per cent are of oak. 45 per cent. of Tamarack, and 45 per cent. of Norway pine. As the "fish joint" has been adopted by the Company, and as experience has shown that this joint is best broken between ties, no difference in the choice of timber for these points has been deemed necessary. The ties are hewn, and in points of dimension and bearing surface fully conform to the prescribed standard.

RAILS.

The rails are of American manufacture, and weigh fifty-six pounds to the yard. In quality and manner of laying they meet, in the judgment of the Commission, all the requirments of the Government on the subject.

ROLLING STOCK.

The rolling stock of the Company is constituted as follows:

Locomotive engines..	68	Platform cars..	1,000
Passenger cars.....	18	Caboose cars...	6
Baggage cars.....	5	Wrecking cars.	1
Pay cars.....	1	Hand cars.....	52
Observation cars.....	2	Rubber cars....	36
Box cars.....	350	Pile driver.....	1

This stock is believed to be ample for the present and near future requirements of the road, and the Commission takes pleasure in bearing testimony to its uniformly excellent qualities and good condition. In addition to the list given above twenty-eight locomotive engines and four passenger cars are now in process of construction, under contract to be delivered at an early day.

ENGINE-HOUSES AND REPAIR SHOPS.

At Brainard the Company has erected extensive and well-equipped engine-houses and repair shops, furnished with steam-power and all the machinery necessary for probable contingencies, with a large stock of iron and other supplies on hand. In addition to these, engine-houses and repair shops were found at Duluth, and also at Fargo, on the west bank of the Red River of the North. Up to the time of inspection the buildings used for this purpose were constructed of wood, but at Duluth and Fargo extensive engine-houses were being built of brick, with the work upon them so far advanced as to justify the expectation of the Company that they would be fully completed before the commencement of the winter months.

PASSENGER AND FREIGHT STATIONS.

There are fifteen passenger and nine freight stations on the divisions examined. These buildings are constructed of wood, and vary in size from 16 by 24 feet, to 80 by 50 feet, the majority being 20 by 40 feet. They are located judiciously, with due regard to the passenger and freight business of the road, and are deemed adequate to its wants. They are substantially built, tasteful in appearance, supplied with conveniences usually found in such establishments, and in every respect will compare favorably with those upon the majority of roads in the country.

RECEPTION HOUSE.

In addition to the ordinary station-houses the Company has constructed at Brainard and also at Glyndor, the crossing of the St. Paul and Pacific Railroad, a spacious and comfortable house intended for the accommodation of emigrants and others seeking homes near the line of the road. These houses will accommodate about 300 persons each, and are provided with plain and substantial furniture and necessary cooking utensils for the use of the occupants. It is intended that they shall be occupied, free of charge, by all pessons in search of homes, either upon the Government or Company's lands lying within the limits of the land agent of the road. A similar building is also located at Duluth.

WATER STATIONS.

The water stations are twenty in number, with an aggregate tankage capacity of 200,000 gallons, exclusive of one at Pillager Station supplied from a running stream by steam-power syphon, the capacity of which is practically unlimited. They are of an approved plan, and are substantially constructed and provided with such protection against freezing as is believed to be adequate.

SNOW FENCES.

To guard against obstruction from snow the Company has already built snow-fences along the side of such deep excavations as are not protected from the force of winds by growing timber. The minor excavations are protected by a single line of fence on either side; the deeper cuts by a double line on either side. These fences are located about 100 feet from the track, with a space of 100 between the two lines. The managers of the Company express the confident opinion that these fences will afford adequate protectioe against more than the ordinary snow-fall of that region.

TELEGRAPH LINE.

The telegraph line of the Company is well constructed and equipped, and its facilities are ample for the use of the road and the probable wants of the public.

CONCLUSION.

Having found that portion of the road lying between Thompson Junction and the Red River of the North 228 4118-5280 miles in length, to be judiciously located, well constructed, and adequately equipped, and believing that it substantially meets the requirements both of the letter and spirit of the law and department regulations bearing on the subject, the Commission respectfully recommends its acceptance by the Government. We have the honor to be, with great respect, your obedient servants.

S. H. KAUFFMANN.
A. C. SANDS.
THOMAS UNDERWOOD,
Commissions.

To Railroad Contractors.

OFFICE SOUTH BRANCH RAILWAY CO.,
ROMNEY, W. VA., December 12th, 1872.

SEALED PROPOSALS for the GRADING and MASONRY, in whole or in part, to be done on the SOUTH BRANCH RAILWAY, between Romney and Green Spring Run, B. and O. R. R., distance 16 miles, will be received from THIS DAY until WEDNESDAY, December 25th, 1872.

For specifications and further information inquire at this office, or by application at Engineer's Office Camden Station, Baltimore.

P. P. DANDRIDGE,
Chief Engineer.

LOCOMOTIVES FOR SALE.

SEVERAL SECOND HAND LOCOMOTIVES for sale by the Philadelphia and Reading Railroad Co. Weights ranging from twelve to twenty-nine tons. Further information can be obtained upon application to

W. S. WILSON, Purchasing Agent,
227 South Fourth Street.
Philadelphia, Pa.

FOR SALE.

1,500 Tons Foreign Steel Rail, approved Brands, in Yard.
Dec. 18, 1872.

GEO. T. M. DAVIS,
47 Exchange Place,
NEW YORK.

STREET RAILROAD CARS FOR SALE.

THE undersigned offers for sale ten Two-horse cars which have been in use a few months on a street road. They are nearly as good as new cars, and will be sold cheap for cash.

JOHN R. CONNOR,
Greenpoint, N. Y.

Locomotives and Cars for Sale.

New Locomotives of best build.
Second hand Do., various gauge, 10@40 Tons, now running, in good order.
New and Second hand Passenger and Freight Cars.
Also Steel and Iron Rails, Fastenings, &c.

DAVIDGE & WHEELER,
General Railway Business.

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

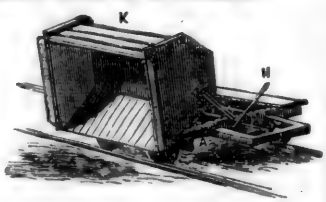

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,

PACIFIC MAIL Steamship Company's

LINE TO

California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
ASPINWALL, PANAMA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILL

Steamers leave 10th 20th and 30th each month, except when those days fall on Sunday, then the day previous.

Dec. —, Steamer ——— ———, CAPT. ———, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall direct, connecting at Panama with steamer MONTANA, Capt. Nolan, touching at Acapulco, Manzanillo and Mazatlan, San Diego, also connecting for all Central American and South Pacific ports. Departures of 10th and 20th each month connect with the Company's steamer, touching at San Benito, Tonata, Salina Cruz and Port Angel.

Freight for all way ports received until 4 P. M. of Dec. —.

Steamer GREAT REPUBLIC will leave San Francisco, Jan. 1, 1872, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

F. R. BABY, Agent.

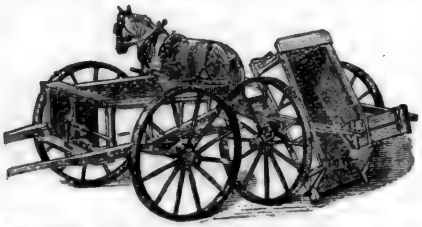
MATHEMATICAL & ENGINEERING

Instrument Manufacturers,



AT THEIR OLD LOCATION

43 NORTH SEVENTH STREET,

PHILADELPHIA,

Have so increased their facilities as to believe they can in future keep a full supply of instruments on hand.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**
PLAINFIELD, N. J.

STATE AND COUNTY RIGHTS FOR SALE.

Safe Car Lamp,
MINERAL SPERM OIL.
NO KEROSENE.

Williams, Page & Co.,
BOSTON,

Manufacturers of their well known Car Lamps and of Superior Car Candle Lamps, are making

Mineral Sperm Oil Lamps

now used by Boston and Albany, Providence, Eastern, Fitchburg, Lowell, and many other Roads, and by Pullman Palace Cars in place of Kerosene or Candles. Circulars, Lithograph and Price List sent when requested.

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

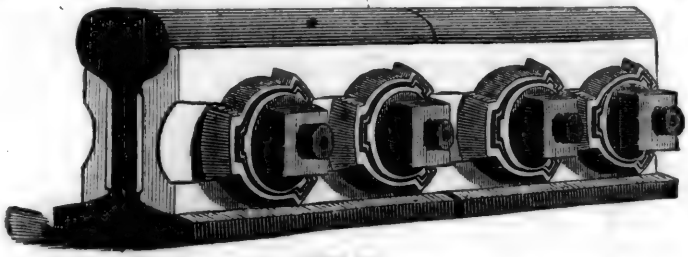
CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Railroads of Ohio.

The Ohio Commissioner of Railroads gives the following statistics for the year ending June 30 1872: The total capital stock of the entire lines of railroads running through or into Ohio is $219,161,127. The capital stock of the part of the roads which are in Ohio is $122,721,526. The total funded debt of the entire lines is $217,171,755; the proportion for Ohio is $120,222,072. The floating debt of the entire lines is $10,738,179; the proportion for Ohio is $5,945,700. The total length of the lines and branches is 7,408 miles. Of this amount 3,787 miles are in Ohio. The total cost of all the roads for construction and equipment was $338,113,494; that portion of the lines in Ohio cost $206,352,805. The gross earnings of all the lines for the past year was $65,603,078; proportion of earnings in Ohio, $34,257,799. Operating expenses for the entire lines, $45,034,708; Ohio's proportion, $23,502,789. Net earnings, $20,568,369; proportion for Ohio, $10,755,060. Passengers carried in the year, 12,068,832; freight carried, 20,983,068 tons; interest paid on bonds, $9,726,259; dividends paid, $7,554,032. The total number of persons employed on the railroads in Ohio is 25,893. During the past year 375 miles of road, including sidings, were built.

INVESTMENT BONDS.

The Northern Pacific Railroad Company now has in full operation, with regular daily trains, 321 miles of road. A distance of nearly 200 miles more is constructed. The Minnesota Section, immediately on its completion, entered upon a satisfactory business, including local traffic and the large carrying-trade of the Northwestern British Settlements and the Hudson's Bay Company. The recently completed section of sixty-five miles, on the Pacific Coast, at once commands a profitable business between Puget Sound and the Columbia River, heretofore done by coastwise steamers. On the opening of spring, with more than **500** miles of Road in regular operation, the Company will control the extensive and productive trade of the Upper Missouri, much of Montana and the Northwest. The earnings of the Road for 1873 will be large.

Arrangements for pushing construction vigorously the coming year are progressing satisfactorily.

Of the nearly Ten Million acres of land accruing to the Company in connection with the portion of Road now virtually constructed, some Two Million acres, of excellent average quality, are in market, and their sale and settlement progressing. The average price thus far realized is **$5 66** per acre—which is at the rate of **$100,000** per mile of road for the whole grant.

The Company has already begun the process of redeeming and cancelling its First Mortgage Gold Bonds, as they are now being received at **1.10** in payment and exchange for the Company's Lands.

With these accomplished results and most favorable prospects, the Company is now selling its First Mortgage 7-30 Bonds for the purpose of completing its line of road. We recommend them as a well secured and unusually profitable investment. They have the following elements of strength and safety: They are the obligation of a strong corporation; they are a First Mortgage on the Road, its Right of way, Telegraph line, Equipments and Franchises, and a first lien on its Net Earnings. In addition to this usually sufficient security there is pledged for the payment of principal and interest a Land Grant of **12,800** acres per mile of road through the States and **25,600** through the Territories. The rate of interest (seven and three-tenths per cent. gold) is equal now to about 8¼ currency. *Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the Post Office address of the owner.*

All marketable securities are received in exchange on most favorable terms. For sale by Banks and Bankers generally.

JAY COOKE & CO.

Financial Agents N. P. R. R. Co.

☞ The last rail on the Buffalo, New York and Philadelphia Railway was laid on the 23d inst. near Emporium, Pa.

☞ The last rail on the Shore Line, connecting the West Wisconsin and Chicago and Northwestern railways, was laid on the 28d inst.

Old Colony Railroad.

The earnings of this road for the years ending September 30, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$1,020,573 16	$1,141,832 43
" freight	525,812 57	644,167 90
" express	74,783 86	62,960 41
" rents	26,443 13	26,385 86
" mails	16,361 42	15,827 01
" miscellaneous	5,488 02	4,895 69
" extra baggage	2,016 35	1,868 79
	$1,671,478 51	$1,897,438 09
Expenses, viz:		
Passenger department	$142,487 67	$186,907 23

Add balance of income per last report ($486,956 33, less U. S. taxon surplus $1,916 70)		485,039 63
Total amount of net income		$910,001 73
Deduct dividend Jan. 1, 1872, $3 per share	$150,000 00	
U. S. tax	3,846 15	
Deduct dividend July 1, 1872, $3 50 per share	175,000 00	
		328,846 15
Balance of income account September 30, 1872		$581,155 58

The dividend of January 1, 1873, is to be taken in part from this balance.

The dividend on 9,481 shares issued to stockholders of the Cape Cod Railroad Company was paid on July 1st, from the earnings of that Company.

The gross receipts of the road were, for the year ending Sept. 30, 1872	$1,897,438 09
For the year ending Sept. 30, 1871	1,671,478 51
Increase in receipts	$225,959 58
The working expenses for the year ending Sept. 30, 1872	1,202,743 32
For the year ending Sept. 30, 1871	995,841 90
Increase in working expenses	$206,901 42
The amount paid for interest & taxes, not including tax on dividends, was, for the year ending Sept. 30, 1872	$269,732 67
For the year ending Sept. 30, 1871	267,224 09
Increase	$2,508 58
The net earnings, after paying interest and taxes, were, for the year ending Sept. 30, 1872	424,962 10
For the year ending Sept. 30, 1871	408,412 52
Increase	$16,549 58

The increase from passengers was $121,259 27; the increase in number of passengers carried was 578,595.

The increase of receipts from freight was $118,355 33; the increase of tons carried was $115,277.

Of this increase $98,416 33 was from local passengers, and $86,440 84 from local freight receipts. The express and miscellaneous receipts are $13,655 72 less than last year.

Three new locomotives, six passenger cars, one baggage car, forty-three freight cars, and thirty coal cars have been added to the rolling stock.

Three locomotives, two passenger cars, thirty-three freight cars, and ten gravel cars have been rebuilt.

About 751 tons of new iron, and 581 tons of steel rails, and 31,820 new sleepers have been used in repairing the track, and 1,350 tons of rail have been taken up, repaired and relaid.

All the above additions, renewals and repairs have been charged to expense account, and paid for out of our earnings the past year.

The road, equipment and property has been kept up, and is in as good condition as at any previous time.

In addition to the above new rolling-stock, there have been added to the equipment 2 new locomotives, 8 passenger-cars, 1 smoking-car, forty-three freight-cars and thirty coal-cars, at an expenditure of $100,200, which has been carried to construction account, making in all 5 new locomotives, 146 freight cars and 16 passenger and baggage-cars added to the equipment the past year.

The Westinghouse brake is now used on 9 locomotives and 44 cars, chiefly applied in the past year. We have also added largely to our telegraph lines, which now connect the central office in Boston with all parts of the road and its branches.

The foregoing statement shows the business of the company to be in a prosperous condition.

There appears to be an increase of $206,901 42 in the expenditures of the company during the year, over the year ending September 30, 1871, caused in part by an increase of 120,013 miles in the mileage of trains. This increase is further accounted for in the following items:

Increase in expenditure on equipment charged to expense	$13,773 56
Addition to side-tracks	27,800 00
" to lands, depots and fixtures	25,435 00
" to telegraph lines and fixtures	5,000 00
Paving about depots	9,504 27
	$81,512 83

In August last 1000 shares of new stock were sold by auction, as required by law, to provide means in part for the construction of the Shawmut Branch. This branch will be completed so as to be opened for public travel on December 1st next. The cost has exceeded the estimate by about $50,000, caused in part by the excess of rock excavation, exceeding the engineer's estimate by about 12,000 yards, and in part by the additional expense of raising the bridges at Ashmont and Adams streets, so as to give a clear space of 18 feet above the rails, as required by a recent law, which has largely increased the masonry and excavation beyond the estimate.

We are now extending the Granite Branch to the gravel pits owned by the company, and ultimately to a connection with the main line at Braintree.

We have use for considerable gravel in filling the flats and low lands owned by the company, and the demand by other parties for similar purposes will afford us some profit from the transportation. This extension is estimated to cost about $80,000.

There are large tracks of low land which need filling upon the line of our road in Boston, and favorable contracts have been offered for transporting gravel for this purpose. If we should engage in this business to any considerable extent, it may be desirable to construct a third track, as far as the connection with the Granite Branch in Quincy, about 5.35 miles. The movement of our numerous trains between Boston and Braintree would be greatly facilitated by such a track.

The business in connection with the Duxbury and Cohasset Railroad has about equalled our anticipations. The future prospects of this road must depend upon the development of the towns upon its line. The increase of buildings and of summer visitors in these towns during the past year warrants the expectation of a fair increase in the business in the future, as the attractions of the country as a place of seaside resort become known.

Our arrangements with the New Bedford and Taunton Railroad Company and its connections, and with the Narragansett Steamship Company, continue to work satisfactorily.

The passenger business with New York has been somewhat less than the last year, caused, it is supposed, by the serious accident to another line on the Sound. It is worthy of remark, that since the establishment of the Fall River line to New York in 1846, while many millions of passengers have been carried upon the boats composing this line, no boat has been lost, and only one accident has occurred upon the boats, attended with loss of life or serious injury to any passenger.

We have added to the equipment 146 freight cars, being about one fourth the number before owned by the company. Also 5 locomotives and 16 passenger and baggage cars. This large addition has scarcely kept pace with the requirements of the business of the company, with its new branches and connections.

To meet the demands of our patrons, we should add during the coming year at least 5 locomotives, 10 passenger and smoking cars, and 200 freight and coal cars, costing about $200,000.

The increase in the number of passengers and tonnage of freight carried (that is, in work done) has been greater than the increase in income as compared with the last year.

This is caused by a reduction in our tariffs made since January 1, 1872.

This reduction was estimated to amount to $25,000 on passengers, and $30 000 on freight, upon the business of 1871. The same rate of reduction applied to our business of this year would be equal to about $60,000, which, added to the increase in receipts, would show a gain of $285,989 58.

The reduction has been greatest on freight, and the relative increase is there the largest.

The coal traffic of the company, stimulated by a reduction of rates, has increased from 46,960 tons in 1871, to 83,284 tons in 1872. To provide for future increase in this business, additional wharves and coal pockets are needed at Fall River or Somerset. The rapid growth of Fall River calls for additional depot accommodations there, and it may be advisable for us to construct a wharf for our business at that place.

The depot grounds and buildings at North Bridgewater and Campello are insufficient for the business of these places, and it is the purpose of the Directors to proceed immediately to the construction of new stations in this thriving town.

The question of filling a portion of the cove lands belonging to the company in Newport, and constructing a new depot there, is under consideration. These and other improvements contemplated will cost about $120,000.

The balance of our land account now stands at $298,953. The lands included in this account are not now needed for the use of the road, and may be sold whenever a satifactory price is offered. It is hoped that the funds derived from this source may be sufficient to meet the cost of equipment, (above what may be fairly charged to expense,) which the increase in our business may demand in future.

The cost per train mile run for the year ending September 30, 1871, was about $1.08; while for the past year it has increased to about $1.14. This increase is accounted for by a general rise in the cost of labor and materials, particularly in iron and other metals, which enter largely into the cost of working the road. For common bar iron we paid, in 1871, $74 per ton, and in 1872, $110 per ton, an increase of 50 per cent.

At the last session of the Legislature an act was passed authorizing this company, in connection with the County of Bristol, and the Fall River, Warren and Bristol Railroad Company, to build a bridge across Taunton Great River at Fall River. The Directors believe it is for the interest of the company to join in the construction of this bridge, and therefore recommend the acceptance of the

act by the stockholders. An act was also passed authorizing the construction of connecting tracks with the New Bedford and Taunton Railroad, at Taunton, which will greatly faciliate our business at this place. The acceptance of this act by the stockholders is also recommended.

The name of the corporation has been changed to Old Colony Railroad Company, on October 1, 1872, as authorized by acts of Massachusetts and Rhode Island, and the vote of the stockholders at a special meeting, April 12, 1872.

The Directors recommend a change in the By-laws, making the seal of the Corporation and certificate of stock conform to the present name of the company.

The union of the Cape Cod Railroad seems to make it necessary to take one or more Directors from the line of that road; and in view of the present extent of our lines, having various local interests to be cared for, we would submit to the Stockholders the expediency of increasing the number of Directors.

The earnings and expenses of the Cape Cod Railroad were not brought into our accounts until October 1, when the union was completed. The following is a statement of the earnings and expenses of this road for the year ending September 30, 1872:

Earnings for the year ending Sept. 30, 1872	$321,798 38
Earnings for the year ending Sept. 30, 1871	290,954 93
Increase of earnings	$30,843 45
Expenses for the year ending Sept. 30, 1872	$235,160 83
Expenses for the year ending Sept. 30, 1871	231,958 47
Increase in expenses	$3,202 36
Showing an increase in net earnings of	$27,641 09

The Woods' Hole Branch was opened for travel on July 17, 1872, and the earnings of this branch for 2 1-3 months only are included in the receipts for the year.

The cost of the Cape Cod Railroad to this Company is as follows:

Stock issued and to be issued to stockholders of the Cape Cod Railroad Co.	$1,007,280
Cost of Woods' Hole Branch in stock of this company	190,620
Funded and floating debt	434,000
	$1,631,900

To this is to be added the cost of completing the Woods' Hole Branch and the extension from Wellfleet to Provincetown.

The length of the united roads is as follows:

Boston to Newport via Taunton	67.79 miles.
So. Braintree to Somerset Junction via Bridgewater	37.60 "
So. Braintree to Plymouth	25.94 "
Dorchester and Milton Branch	8 30 "
Granite Branch	5.00 "
Shawmut Branch	2.40 "
Bridgewater Branch	5 99 "
Easton	1.69 "
	150.71 miles.
Cape Division, Middleboro' to Wellfleet	71.62
Woods' Hole Branch	17.54
Hyannis Branch	4.90
Wellfleet to Provincetown, under construction	13.90
	107.96 "
Total length of road	258.67 miles.
Length of double track	11.28 miles.
Sidings Old Colony Division	39.20 "
Sidings Cape Division	7.80 "

The Boat connection between Woods' Hole and Martha's Vineyard has not been satisfactory, and it may be advisable for us to aid in some way in the establishment of a new Boat Line.

Out of the 3,711,845 passengers carried in our cars in the past year, only two have been injured, and in these cases the injuries were not serious, and were caused by the carelessness of the passengers.

But little damage has been done to property of any kind during the year.

The policy of previous years has been steadily pursued in the reduction of rates and increase of accommodations. By the increase of trains and equipment, and addition of express trains, we have endeavored to keep the facilities given somewhat in advance of the public demand. The large increase in our local earnings is a sufficient proof of the effect of this policy in developing the country upon our line. It has fairly repaid us in the past, and justifies the expectation of a greater return in the future.

The equipment of the road is as follows: 30 passenger, 11 freight, and 4 switching locomotives; 95 passenger, 16 baggage, 190 long box, 270 long platform, 14 cattle, 56 stone, 20 short platform and 169 coal and gravel cars. Number of miles run by passenger trains, 740,661; by freight trains, 326,959; by gravel trains, etc., 43,355—total miles run one year to September 30, 1872, 1,110,675, an increase over the year ending Sept. 30, 1871, of 120,013 miles. Number of passengers carried the past year, 3,711,345; do., carried one mile, 50,820,108. Tons of merchandise carried the past year, 510,434: do., carried one mile, 13,934,137.

President.—ONSLOW STEARNS.

Directors.—Onslow Stearns, Uriel Crocker, Benjamin Finch, Charles F. Choate, Oliver Ames, Samuel L. Crocker, Jacob H. Loud, Richard Borden and Royal W. Turner.

Treasurer.—JOHN M. WASHBURN.

Superintendent.—W. H. BULLOCK.

☞ The contract for the grading, masonry and bridging of the first and sixth divisions of the Baltimore and Drum Point Railroad has been given to Messrs Crowley, Dickinson & Co., of Baltimore, they being the lowest responsible bidders. These two divisions are twenty-two miles in length, the first division being from Camp Parole, near Annapolis, to Butler's Tavern, a distance of ten miles, and the sixth from Drum Point to St. Leonard, a distance of twelve miles. The contracts will be at once completed and the work begun and pushed forward. The successful bidders for this work also have the building of the narrow gauge railway to Towsontown.

Railway Improvement.

A NEW ERA IN RAILROADING.

A history of the railroads of America, if properly compiled, would furnish a volume of remarkable interest. If we could bring from the debris of time the faces and history of those who first projected, and those who followed them in the work of perfecting the present system of rapid transit, what a field of study would here be presented. In the front rank, ever striking boldly forward, we would meet those who have persistently striven for the first principles, while in the rear guard would come the humanitarians, ever laboring to modify, systematize, perfect and render safe the conceited ideas and labors of their predecessors. While the former have been foremost in the fight, vigorously trampling down old theories in their zeal for the cause of improvement, the latter have been looking after the ambulance train and caring for the wounded. Among this latter class we would place all those who have labored to establish the present degree of safety in railway travel, the solidity of tracks and stability of bridges, the completeness of engines and cars in point of speed, safety and comfort, and the avoidance of fatal accidents. If our railway engines and cars would always stay on the track; if we never met with collisions and people would keep off the tracks, there would be no fatal accidents to record; but our railway system has not yet reached that degree of perfection, and our lenient state laws continue to permit people to expose themselves to the dangers of tracks and crossings.

There are certain mechanical laws, the violation of which greatly increases the dangers of derailment, and that violation is unavoidable where the old system prevails of making up trains with slack links and couplings, which create the dangerous zigzag motion of cars known among railroad men as oscillation, and from which many serious accidents have occurred.

Our tracks are built with a wider spread than the tread of the wheels, in order to allow of trending and rounding of curves. The bolster-hangers also swing longitudinally, and these add greatly to the swaying of the cars while in motion, thus augmenting the danger of what is known as "worming the rail," or, when from sudden rebound, caused by a slight depression or rise of the track, the lateral thrust of the wheel against the rail exceeds the vertical bearing, the wheel mounts the rail, thus producing what is termed "worming." Very many such cases have happened; the direct results of oscillation. This great and seeming necessary defect in our railway trains for many years engaged the attention of our best managers, and various experiments were tried by which to correct it, but for a time all were failures. The English rail-cars are not so affected for the reason that they are screwed together firmly instead of being coupled with slack links and draw-irons. The system of screwing cars together prevents oscillation, but cannot be adopted upon our roads, owing to the small radius of their curves; but there is a device, now being universally adopted here, which is a complete remedy for oscillation, and is at the same time

perfectly applicable to all American railroads. It is known among railroad men as the "Miller Platform," combining an Automatic self-coupler, a Compression Buffer and a combination of mechanical principles, so arranged as to give the platform a strength which withstands the heaviest blows, renders the coupler easy to operate, provides a safe walk from car to car, and is as enduring as the car itself. With these improvements there is no oscillation, no telescoping of cars, no falling between platforms nor any danger from making-up trains, as there is no going between the cars to couple them. They have now been in use nearly seven years, and though numerous accidents have occurred to trains of which the cars were equipped with these platforms, no serious results are known to have happened and in no instance has a platform been broken. The great passenger lines from this city to the West, even to California—with the exception of the Pennsylvania Central—are using these appliances, and cases of fatal accident have become almost entirely unknown upon them. All the Wagner cars are equipped with them and also the Pullman cars, with the exception of the Pennsylvania road, and this accounts for the recent case of telescoping Pullman cars for the first time, which recently occurred on that line.

The word telescoping, as used in this sense, is purely American, as only on American roads has this kind of accident been known. But we remark—and the monthly reports of accidents bear us out in the truth of the assertion—that this kind of accident is rapidly decreasing, and in time will become wholly unknown in the reports of railway accidents in this country: And why? Because we are making progress! We are approaching a better and safer system of making up passenger trains, a system that will entirely prevent the fore mentioned causes of accident—and they cover nine-tenths of all the fatal cases upon our roads—a system that will demand uniformity in cars, in tracks, in size of trains, in the protection of crossings, and the adoption of the Miller Platform and the best known brake on all passenger cars. With these cheering results of the labors of years spent in experimenting, may we not take courage and hail with joy the incoming era of the new birth which this picture presents.

The Coal Trade.

By an examination of the reports of the several coal-carrying companies we find that the Reading Railroad returns a tonnage for the week ending on the 14th instant of 199,141 tons, and for its financial year to same date, 223,984 tons against 199,141 tons in corresponding time last year—a decrease of 24,843 tons. The Lehigh Valley Railroad reports a tonnage for the week of 65,407 tons, and for the year 127,856 tons, against 150,323 tons to same time last year—a decrease of 22,467 tons. The Delaware, Lackawanna and Western reports a tonnage for the week of 53,734 tons, and for the year of 2,740,757 tons, against 1,803,273 to corresponding time last year—an increase of 937,484 tons. The tonnage from Shamokin for the week was 6,587 tons, and for the year 550,071 tons against 614 823 tons to corresponding time last year, showing a decrease of 64,752 tons. The shipments by the Central Railroad of New Jersey for the week were 36,123 tons—for the year 2,491,338 tons, against 2,075,928 tons to corresponding time last year an increase of 415,410 tons. Of the above tonnage there was sent by the Lehigh Canal 6,720 tons for the week, and for the season 865,508 tons, against 604,345 tons to same time last year—an increase of 261,163 tons. The Pennsylvania Coal Company reports a tonnage for the week of 23,560 tons, and for the year 1,182,475 tons, against 761,907 tons to corresponding date last year, an increase of 420,567 tons. The Delaware and Hudson Company reports a tonnage for the week of 27,994 tons, and for the year 2,711,855 tons, against 1,764,695 tons to same time last year, showing an increase of 947,160 tons. The Huntingdon and Broad Top Mountain Railroad Company reports a tonnage for the week of 9,269 tons, and for the year of 301,973 tons, against 310,814 tons to same date last year, showing a decrease of 8 841 tons. The Pennsylvania and New York Railroad reports an anthracite tonnage for the week of 11,224 tons, and for the year 22,569 tons, and a bituminous coal tonnage for the week of 5,168 tons, and for the year 9,733, being a total tonnage for the week of 16,393 tons, and for the year 32,302 tons, against 31,694 tons to same time last year, a decrease of 608 tons.—*Phila. Ledger.*

The Directors summit to the Stockholders the accompany accounts of the Treasurer, showing in detail the operations of the Road and the condition of the affairs of the Corporation for the year ending on the 30th day of September last.

They feel assured that these statements will repay a critical examination; exhibiting as they do, the complete record of a year of marked prosperity in every department of our operations. While furnishing the most satisfactory evidence of the substantial character of the property of the Corporation, they exhibit also, the solid basis of local and through traffic on which it rests, and which it has been their endeavor to foster in just proportions. The gratifying results of their policy in this respect, which has been as steadily pursued as it has been distinctly declared in their former reports, will be apparent to the Stockholders, in the proof these tables disclose of the sound condition of all the interests entrusted to their charge and management.

It will be seen that the gross earnings of the Road for the year have amounted to the unprecedentedly large sum of $1,716,399 42—an excess over those of the last year of $302,523,16. The total expenditures for the year, proportionately increased of course by the large increase of our business, and embracing, as will be seen, in addition to the ordinary operating expenses of Road, many items of extraordinary outlay, have been $1,251,052 59—leaving a net income of $465,346, 83, as against the net income of the preceding year of $430,461 19.

We have thus been enabled, after providing for the payment of our customary dividends, to meet from the surplus of our earnings, all the reasonable requirements of the public, in furnishing greater facilities comforts and safeguards, both in travel and transportation, and at the same time to secure essential improvements which the present and prospective wants of the Road have rendered necessary; many of which are of a permanent character, adding largely to the permanent value of the property of the Corporation. In this connection it is obvious to remark, that the large proportion which the expenditures of a Railroad Corporation bears to its gross receipts is in some degree a test of its real prosperity and of its proper management. The constantly recurring claims of the public for more facilities, both in the opening of new channels of traffic and in the increase in the number of trains, and of the best equipment for all of them, and in the adoption of new improvements and safeguards which the inventive faculty of our people is daily offering as indispensable to every well managed railway, constitutes a large and growing tax upon the earnings of the most prosperous roads. We have a striking illustration of this inevitable increase of expenses in the experience of the last year; during which we have transported 540,266 passengers more than in the year next preceding it, have carried 203 168 tons more of freight, and the greater distance run by our locomotives in the same period is, 115 117 miles.

Referring to the tables for the respective amounts expended for objects not coming within the range of ordinary operating expenses, a brief summary of them, taken in connection with the proportion exhibited between our gross earnings and our net income, will prove to the most exacting advocate of the rights of the public in these *quasi* public corporations, that the managers of this Corporation have not been wanting in the largest liberality towards those who have had occasion to use the road either as passengers or freighters;—and this policy, which has repeatedly received the sanction and approval of the Stockholders, it is to be hoped will be continued by those who have the direction of its affairs, until it fairly earns the title, which no railroad in this country has yet reached, of a "perfect road" in all its appointments and its management.

Among the most conspicuous of the expenditures of the character above stated, is the cost of erecting new Station Houses along the line of the road. Of these, there have been completed during the year, one at Pawtucket in connection with the Providence and Worcester Railroad Co., one at Dodgeville, one at Boylston Station, one at Hyde Park, and one at Heath Street in Boston. We have now in process of construction, one at the corner of Camden Street in Boston, one at Forest Hills, and one at Attleboro' in connection with the Taunton Branch Railroad Co.

In addition to these we are now diligently engaged in forwarding with all practicable despatch the erection of our principal passenger station house in Boston; rendered necessary by the sale to the City of Boston, of the principal portion of

the site of the present structure, of which the Stockholders were informed in the last annual report. It is premature to speak of the character or cost of this edifice. But it is proper to say, that the Directors have determined to carry out what they believe to be the wishes of the Stockholders, in making it in every respect a model structure, adapted to all the uses of the Corporation and the public in the future as well as the present, worthy of the commanding and eligible site on which it will stand, in harmony with its spacious and attractive surroundings, and an ornament to the City, whose wise and liberal policy in reference to this locality constrains us to meet them in a spirit of corresponding liberality. After its completion, and the erection of a new passenger station at Readville, which will be commenced in the Spring, the hope that was expressed in the report of the last year, "that before the close of the year 1873 we shall have rebuilt every station on the line of the road, thereby terminating all our extraordinary expenses in that department for years to come," will be fulfilled.

The purchase of considerable parcels of land adjoining our premises in Boston and in other localities, which the exigencies of our business or the prospect of a near future rendered important to us, constitutes another item of the expenditures before referred to. In regard to all these purchases we have been extremely fortunate, both in the circumstances surrounding them and in the prices paid for them.

The removal of the old car house in Boston from the site of the new passenger station, required the erection of another without delay. We have accordingly built on the land of the Corporation, near Ruggles street and in convenient proximity to our machine shops, at a very moderate cost, by utilizing the roof of the old freight house which was found to be in excellent condition, a commodious brick structure with a capacity for housing twenty-four long passenger cars.

Beside keeping up our equipment to a better condition than it has ever been in before, substituting new freight cars for all that have been destroyed or become unserviceable, in addition to those hereafter specified—thus more than covering depreciation in this rapidly depreciating class of railroad equipment, without including any of the new ones mentioned. We have added to our stock four new first class locomotives, eleven new passenger cars, and one hundred and five new freight cars.

Among the items of increased expenditure in the operation of the road, the running of an increased number of trains before adverted to, is one to which the Directors desire to call the more particular attention both of the Stockholders and the public, as it does not appear in the Treasurer's accounts as a separate item, but is necessarily included in the general charges for freight and passenger business. Since the last annual report, the Third Track, to which reference was then made as approaching completion, has been put in operation; and notwithstanding the increased facilities given by it to our suburban travel in the large number of trains run over it daily, for nearly the whole year, we have, in addition to all these, established six new trains for the convenience of the general travelling public. When the large expense attending the running of every new train is considered, the proportion before alluded to, in which the public shares with the Stockholders every fresh access of prosperity to the road is seen in a striking manner, and should make the former disposed to promote that prosperity at least equally with the latter, even on selfish grounds.

An opportunity having arisen during the year to place the relations of this Corporation with the Stoughton Branch Railroad upon a more satisfactory basis, the Directors promptly availed themselves of it, and took such steps to secure it as will leave the Stockholders at liberty to adopt their action or otherwise, as they may elect. This will be made the subject of a special communication to the Stockholders, for them to take such course in reference to it as they may deem expedient.

In concluding this Report, the Directors deem it but just to a most exemplary efficient and trustworthy body of men, many of whom have been reared from boyhood in the service of this Corporation, to bear their testimony to the fidelity with which the interests of the Stockholders have been served by their employes in every department of our operations, and to express their conviction, that whoever may be entrusted with the administration of its affairs, they can have no more reliable assurance for the continuance of its prosperity, than the zealous co-operation of those who have contributed so largely to it in the past.

Atlantic, Mississippi and Ohio Railroad.

The Petersburg *Index* extracts the following figures from the annual report of the Atlantic, Mississippi and Ohio Railroad Company:

During the past year the floating debt of the various companies merged in the Atlantic, Mississippi and Ohio Railroad has been met and extinguished with a portion of the proceeds of the loan effected upon the bonds of the company.

In the road department there has been expended: on the Norfolk and Petersburg division, $67,698 09; on the Southside division, $387,761 57; on the Virginia and Tennessee division, $508,791 09—total, $909,250 75.

In the transportation department the receipts have been: from passenger trains, $569,042 91; from tonnage trains, $1,385,278 89—total, $1,954,278 89. The transportation of passengers has increased during the year $19,415, or 4½ per cent., while the freight transportation has increased $48,668, or 4 per cent., this latter derived mainly from local business. The cost per mile of running the trains was this year 48.77 cents, against 58.61 cents the year before, a decrease of nearly 17 per cent., by which the improved condition of the road is fully shown. The gross revenue of the line has been $1,969,053 06; its current expenses, $1,284,725 14; balance, $734,327 92—an increase of net revenue of over 15 per cent.

☞ The Frankfort *Yeoman* says that the Frankfort, Paris and Big Sandy Railroad is to be seventy-five miles, long, uniting with the Chesapeake and Ohio in Bath County, and extending to Frankfort. Towards its construction the county of Bath has subscribed $150,000, Bourbon $400,000, Scott $350 000 already, and that it is now proposed that the city of Louisville shall subscribe $500,000 and the county of Franklin $100,000, to make a total of $1,500,000, which is deemed sufficient to guarantee the construction of the line.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 per cent.
GOLD BONDS.
$3,500,000.

This is an EAST AND WEST ROAD RUNNING ON THE 40TH PARALLEL FROM INDIANAPOLIS, IND., TO DECATUR, ILL., 152 miles; through the richest agricultural and mineral country of both states; and connecting at termini with the GREAT THROUGH ROUTES to the East and West.

It is the only East and West road in a belt averaging 30 miles wide, and passes through the best part of the rich

BLOCK COAL FIELD

of Indiana, in which the COMPANY OWNS 2,000 ACRES OF BLOCK COAL LANDS. It owns, also, 90,000 acres of Farming lands.

$1,400,000 IN CASH HAS BEEN ALREADY EXPENDED ON THIS ROAD, of which 30 miles in Illinois are finished and in operation. Fifty-five miles more, completing the Western Division, Decatur to the Coal Fields, will be completed this fall and the whole road in 1873.

Upwards of TWO MILLIONS OF DOLLARS more are pledged to the enterprise, partly by counties, towns and individuals along the line, but chiefly by wealthy capitalists, among whom are W. H. GUION (of WILLIAMS & GUION), SIDNEY DILLON, JAY COOKE & CO., CLARK, DODGE & CO., J. & W. SELIGMAN, VIBBARD, FOOTE & CO., and PAUL S. FORBES, of New York, BENJ. E. BATES, of Boston, HENRY LEWIS, of Philadelphia, and GEO. M. PULLMAN, of Chicago.

Bonds $1,000 each, payable in 30 years, principal and interest in *Gold, free of Government Tax.* Sinking Fund 2½ per cent. on Gross Earnings.

For sale at 90 and accrued interest by the Financial Agents of the Co. (of whom pamphlets and information may be obtained.)

Walker, Andrews & CO.,
NO. 14 WALL STREET.

☞ The Denver and Rio Grande Railroad has recently opened its Arkansas Valley Branch, 38 miles long, to reach coal fields. The company has now 155¼ miles of road in operation, all completed in 18 months.

☞ The first train over the Warren and Venango Railroad arrived at Titusville on the 15th inst. from Dunkirk, N. Y. The distance over the road from that point is eighty-five miles, and the run was made in five hours.

☞ The Massachusetts Central Railroad Company will at once commence surveys from its terminus in Weston to the Lexington and Arlington Branch of the Lowell Railroad.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, December 28, 1872.

Stock Exchange and Money Market.

Money has been in quick request all through the week, especially for speculative purposes, and rates on call loans have been maintained at high figures, the minimum having been the legal quotation of 7 per cent. with, however, a fractional commission added for the use of funds from day to day, in the majority of instances in which aid was extended to needy borrowers. The city banks had to contract their loan and discount averages, having lost heavily in the lines of legal tender reserve, and of undrawn deposits, though reporting a gain of over a million in their specie hoard. The clearances of the banks averaged through the week 134⅝ millions a day, and amounted in the aggregate, for the whole week, to $807,602,654 as against $779,957,293 the preceding week. The call for help from the interior was more urgent. In the way of mercantile credits, there was not much activity, and on the best grades of commercial paper, rates ranged from 10@12 per cent. per annum. The U. S. Sub-Treasury at this point added nearly ¾ths of a million to its currency, and over 1¼ millions to its coin balances, as the result of the week's business.

The U. S. Sub-Treasury office last week received $4,916,108 of currency, and $3,891,470 of gold, the latter including $1,114,900 from customs; and disbursed $4,090,367 of currency and $2,625,347 of gold, the latter embracing $334,315 of coin interest.

The city banks, in their latest return, show a reduction of $2,590,300 of legal tender notes, with an increase of $1,054,400 of specie, and a falling off of $3,487,900 in their deposits, with a contraction of $1,809,000 in their loan and discount averages, and of $11,000 in their item of circulation. The city bank exchanges, last week, averaged 134⅝ millions. The banks now hold $662,875 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $12,778,400, against $22,764,700 same time last year. The city bank deposits are now $199,423,800 against $199,346,700, week ending Dec. 23, 1871. The legal tender reserve amounts to $44,624,400, against $41,217,800 same time last year. The circulation now stands at $27,522,700 against $28,575,600 same time last year. The loans are now $275,811,400 against $271,363,500 at this date last year.

The coin reserve of the city banks is now about 12¾ millions as against about 25¾ millions on the 20th of July; the legal tender reserve is about 44⅝ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now about 199⅛ millions, against 247¼ millions on the 20th of July.

Government revenues continued to yield moderately. The excises yielded less than two millions, making the total, since July 1, $56,380,604. The customs at the port of New York, for the week, reached only $1,848,497, and at the outports, about $450,000, more, in coin or coin certificates.

Gold has been quite active, and despite the extreme Money pressure, the price has been remarkably well maintained, by the comparatively confident speculative movements. The customs call has been on a restricted scale, and the export drain light, the latter having fallen short of half a million dollars. The range of the price during the week has been from 111⅝@112¼, and the quotation on Tuesday was 111⅞ against 112⅝ the preceding Wednesday. The specie outflow last week, was $488,393. The Gold Exchange Bank clearances have averaged about 55¾ millions per day during the week.

The customs demand for Gold last week, averaged $235,700 a day. The arrivals of specie from Europe, Havana and other foreign ports since Jan. 1, 1872, were $5,488,647 against $8,582,209 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $142,107,313 against $152,030,901 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $76,743,194, against $82,084,694 during the same time in 1871.

The export drain of specie was $438,292 last

week, against $297,882 same week preceding year. The shipments since January 1, 1872, have been $70,343,576 against $63,540,867 during the same portion of 1871.

Foreign Exchange has been in fair demand and quoted firmer. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109½; sight bills on London, 110⅜@110⅝.

Government securities have been in comparatively limited supply, and generally good request for investment account, closing more firmly with an upward tendency.

U. S. sixes of 1881 closed at 117⅝@117⅞; U. S. Five-Twenties of 1862, 112¼@112½; U. S. Five-Twenties of 1864 at 112¼@112½; U. S. Five-Twenties of 1865, 112⅝@112⅞; U. S. Five-Twenties of 1865 consolidated 115⅝@115⅞; U. S. Five Twenties of 1867, 116¾@117; U. S. Five-Twenties of 1868, 116⅝@116⅞; U. S. Tenforties at 109⅝@109¾; U. S. Fives of 1881 (Funding Loan) 101¼@112; Six per cent. currency Sixes from 112¾@112⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 11.	Dec. 18.	Dec. 24.
Consols	91⅜	91¾	92
U. S. 5-20s, 1865	91⅝	92	92⅛
" 1867	94	92	92
" 10-40s	88	88½	88¾
New Fives of 1881	89	89½	89⅝
Erie	42⅜	42⅞	49¾

State bonds have been generally quoted about steady on a moderate investment demand, for the favorite loans, which have not been offered with much freedom, despite the stringency in Money.

Railroad bonds have been in rather better request, and the more substantial loans have been held with increasing confidence. Central Pacific Sixes closed firmly at from 102@102¼.

Railway and Miscellaneous share property has been decidedly active and generally buoyant as to price, although the fluctuations have been frequent, notably so in the more prominent speculative favorites. The adjustment of the Erie litigation with Mr. Jay Gould, by a most unexpected compromise proposed by Mr. Gould himself, greatly stimulated speculation in Erie shares.

General business has been on a restricted scale, in most lines since our last. Domestic produce has been quite tame as a rule, though Flour and Wheat, Rosin, Spirits Turpentine, Petroleum and Hops attracted more attention, especially toward toward the close. Middling upland cotton, left off on Wednesday at 20¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,555,472 bales, against 1,270,669 bales same time in the preceding year; exports 748,038 bales against 626,000 bales in the previous year; stock at the ports at latest dates, 519,176 bales against 429,178 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair demand at from 8@16½ cts.; the latter rates for extra heavy choice Christmas stock. Veals at 6@10½ cts.; Sheep at from 5@8½ cts.; Lambs 5@8½ cts.; Swine, at 4¼@4½ cts. per lb. all live weight. The week's receipts were 6,664 Beeves, 1,780 Veal Calves, 14,354 Sheep and Lambs, and 51,486 Swine.

Foreign goods have been quiet and irregular. The week's imports of foreign goods reached the amount of $6,912,075 including $1,909,748 of dry goods.

Ocean freights have been more active and rather steadier as to rates.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Bids have been let at Lexington, Ky., for grading the Lexington and Big Sandy Railroad from Mount Sterling to the Licking River.

Ware River Railroad.

The Springfield *Union* announces that the New York owners of stock in the Ware River Railroad have transferred their interest to Chester W. Chapin and others, and resigned their positions in the Board of Directors, their places being filled by Chester W. Chapin, James A. Rumrill, E. B. Gillett of Westfield, Franklin Morgan of Palmer, and William Richie. The lease of the Vermont Central expired November 30, but the road is still run by this corporation, which stands ready to give it up on thirty days' notice. There will probably be no change in the management till after the stockholders' meeting, January 11, although the road will eventually come under the direction of the Boston and Albany. The whole distance between Palmer and Winchendon is 49¼ miles, and the 33 miles above Gilbertville is still incomplete. Work has been suspended for some time for lack of funds, but it will be recommenced next spring, and can be finished in three months. When the gap of 16 miles between Hillsboro' bridge and Peterboro', N. H., is completed, as it is to be soon, there will be an unbroken line between Palmer and Concord, N. H.

The Virginia Funding Bill.

In announcing the refusal of the Virginia Court of Appeals to re-open the question of the constitutionality of the act, Judge Christian made the following statement:

"In disposing of this motion, we have only to say that the cases have been elaborately argued, and have been the subject of the most deliberate and anxious consideration of the court. Every possible view of the important questions to be considered were presented in argument or suggested by members of the court in the careful examination, which the large interests involved, and the high responsibilities of our position demanded. Under a deep and painful sense of these responsibilities our opinions were deliberately formed after the most careful investigation.

As to the correctness of these opinions there is not one of us (of the majority) who has the shadow of a doubt. A re-argument cannot possibly change our settled and conscientious convictions; and we have thought it proper to dispose of this motion at the earliest practicable moment, in order to remove any doubt or uncertainty in the public mind as to the final action of this court. The credit of the commonwealth and the public welfare alike requires that the important questions arising out of these cases should be put at rest, so far at least, as the action of this court can have that effect."

Chicago and Canada Southern R. R.

One hundred miles of this road are now graded and ready for the iron, from the west line of the State of Ohio to the Detroit river. Twenty-five miles from Blissfield, the crossing of the Lake Shore road, to Fayette, Ohio, are completed and in operation. The whole line will be completed to Chicago in 1873. The road runs from Trenton, fourteen miles south of Detroit, 255 miles to Chicago, and will be a steel rail low grade, and a direct line for through transportation. Grading with steam shovels will be prosecuted at three points in Indiana during the winter, the nearest of which is 40 miles from this city. This road will run in connection with the Canada Southern, which extends from Malden, opposite Trenton 229 miles to the Canada end of the international bridge at Buffalo, and which is nearly completed. The Canada Southern is building a branch from St. Clair to St. Thomas, a distance of sixty miles of which forty are completed, from St Clair to the Great Western crossing. They are also laying iron between Toledo and Trenton, on the old line of the Toledo, Canada Southern and Detroit Road, whose franchise they purchased. This system of railways is controlled by the same parties as the Toledo, Wabash and Western.—*Chicago Inter-Ocean.*

Port Huron and Lake Michigan Railroad.

The line of this road has been changed west of Flint. Instead of striking the Milwaukee road at Corunna, it will tap it at Gaines, and there connect with the road to Lansing. Its managers intend to have this link completed next Summer.

At the stockholders' meeting, held recently, the following directors and officers were chosen: W. L. Bancroft, Edgar White, of Port Huron; Artemus Thayer, of Flint; Isaac Gale, of Corunna; W. K. Muir, Joseph Price, of Hamilton, Ont.; Townsend Cox, of New York. President, W. L. Bancroft; Vice-President, Townsend Cox; Treasurer, Edgar White; Secretary, E. B. Taylor.

The financial report shows that the traffic of the road during the past year has been large, and that its affairs generally are in a very satisfactory condition.

☞ The Columbus, Mt. Vernon and Delaware Railroad company have filed a supplementary certificate of incorporation with the Secretary of State of Ohio, to enable them to construct a branch from the main line near Oxford, in Holmes county, through Holmes, Coshocton and Muskingum counties, to connect with the Pittsburg, Cincinnati and St. Louis railway and the Cincinnati and Muskingum Valley railroad, near Dresden. Accompanying this certificate was one increasing the capital stock of the company $1,000,000, making the total capital stock $3,000,000.

☞ In the suit of Thomas St. John vs. the Erie Railway Company for dividends on preferred stock of the company held by him, on the ground that this stock was entitled to a 7 per cent. dividend before interest was paid on the £1,000,000 sterling bonds issued in 1865, and before rent was paid on any leases taken since January 1, 1862, Judge Blatchford decided that the preferred stock is not to be entitled to priority over anything but the common stock. He accordingly dismissed the suit with costs.

☞ The *Mining Gazette* gives the statistics of the copper production of the Lake Superior mines in 1872, with a comparison with last years' yield. The three counties from which the returns are given are Houghton, Keweenaw and Ontonagon. The product in 1871 was 16,076 tons 743 lbs; in 1872, 15,174 tons 213 lbs; showing a decrease of 902 tons 530 lbs. In spite of this decrease in the quanity of copper produced, the profits this year have exceeded those of 1871, owing to the greater demand for copper which has prevailed throughout the season.

☞ The Dallas (Texas) *Herald* says that the grading and bridging on the Texas and Pacific Railroad is all let, and work is progressing from Dallas east to Long View, and from Dallas west to Fort Worth. All contracts to the east are to be completed by March 1, 1873.

☞ The Lake Ontario Shore Railroad Company (from Oswego to Lewiston) have, it is said, determined to cross the Niagara river at the site of the Lewiston Suspension bridge, now erecting, but which is located at the most available point for crossing.

BANKING OFFICE OF FISK & HATCH.
NEW-YORK, Dec. 28, 1872.

The CHESAPEAKE AND OHIO RAILROAD is about completed. Its immediate promise of business is very large; its earnings on the disconnected portions will reach this year nearly $1,000,000, without mineral or through business, from which its revenues as a completed road will be largely derived. Coal mining, iron furnaces, rolling-mills and manufactories of all kinds will soon crowd its whole line; while the producing West and manufacturing East are eagerly awaiting the opening of this new Trunk Line, which is destined to have so important an influence upon the transportation of their products.

The FIRST MORTGAGE SIX PER CENT. GOLD BONDS of the Company, the total amount of which is only $15,000,000, are secured upon a property worth $35,000,000 to $40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS. They are issued in denominations of $100, $500, and $1,000, coupon or registered, and at their present market price, 86 and accrued interest, are very desirable.

The CENTRAL PACIFIC SIX PER CENT. GOLD BONDS are too well known to require description or commendation. Their total amount is $25,885,000; they have for a long time ranged in market price near or above par—the price today being 102 to 102¼, with coupon on due Jan. 1, of 3 per cent, gold.

The WESTERN PACIFIC SIX PER CENT. GOLD Bonds amount to $2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by them. Their market price to-day is 92 to 92¼, also with a three per cent. gold coupon on, due January 1. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value.

The CHESAPEAKE and OHIO, the CENTRAL and WESTERN PACIFIC BONDS, all of which have been negotiated by us, we believe to be among the best and most desirable Investment Securities in the market, which in time must become very scarce; especially as the Government will probably, during the coming year, pay off in gold another large lot of FIVE-TWENTIES, and issue in their place FIVE PER CENT. BONDS.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

☞ The coupons of the following Railroad Loans, due Jan. 1, are announced to be paid at the Banking House of Messrs Fisk & Hatch, 5 Nassau St.

Central Pacific six per cent. Gold Bonds	$25,885,000
Western Pacific six per cent. Gold Bonds	2,735,000
California and Oregon six per cent. Gold Bonds	6,000,000
Chesapeake and Ohio Debenture seven per cent. Bonds	5,000,000
Total	$39,620,000

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLIGENCE—WHAT IS *per se* NEGLIGENCE ON PART OF PARENT.

The facts in the late case of Downs *vs.* The New York Central Railroad Company, (47 N. Y., 83,) are fully and clearly stated in the following opinion by—

ALLEN, J.—There was a conflict of evidence as to the circumstances under which the plaintiff received the injury complained of, and bearing upon the question of negligence on the part of the defendant, and whether the plaintiff was chargeable with contributory fault. That the verdict is supported by evidence and cannot be disturbed by this court as wholly without proof, is not controverted by the counsel for the appellant. The question of fact litigated upon the trial, and submitted to the jury, was whether the plaintiff attempted to get off the cars while they were in motion, and in making the attempt was thrown by a sudden and unexpected starting of the train; and there is no complaint that the question was not fairly submitted to the jury with proper instructions. The jury have found upon the evidence warranting the verdict, if believed, that the train had stopped and was not in motion when the plaintiff opened the door, and was in the act of going out and down upon the ground in the usual and ordinary manner, and was thrown from the platform by the sudden jerking of the car, and that the injury was the result of negligence on the part of the defendant's servants and agents. The jury have also by their verdict necessarily found that the plaintiff was free from any negligence or fault contributing to the injury. Under the instructions they could not have rendered a verdict for the plaintiff without finding that fact. The plaintiff at the time of the accident, was twelve years of age; and being unable to find a seat in the car with his mother, by her permission went to the smoking car, and finding a seat there, remained in it until the train reached Rome, when, in the effort to leave the car to return to his mother, he received the injury in the manner described by the witnesses. It was not *per se* a negligent act on the part of the mother to permit a lad of that age, of ordinary capacity, to go from one car to another under the circumstances and for the purpose stated. It was submitted to the jury to determine whether there was anything in the youth, the inexperience or the want of ability of the plaintiff to take proper care of himself, which in the absence of the protection and guidance of his mother produced the injury, or contributed to produce it; and if there was, they were instructed to find for the defendant. This was as favorable a submission of the question as the defendant could have asked, and the jury have found adversely to the defendant upon it. Upon the trial the defendant was only held to the degree of care which the law exacts from carriers of persons in respect to all, and the plaintiff was held to the exercise of the same circumspection and care of his own person, and the degree of responsibility for his own acts as is required of adults under the same circumstances. The jury have exonerated the plaintiff from all fault and negligence, and have charged the injury wholly to the negligence of the defendant. The verdict is well supported by the evidence and the motion to dismiss the complaint at the close of the evidence was properly denied. The newspaper account of the transaction as published in the "Seneca County *Courier*" a day or two thereafter, prepared by the publisher of the paper from accounts he received at Rome on the day of the accident, was properly excluded. The author of the article was examined as a witness, but had no distinct recollection of anything that was said to him at Rome, and could not tell from whom principally he received his information; he talked with them all, the plaintiff, his father and mother. He talked with the plaintiff about it, and supposed he learned from him, but could not remember anything distinctly that he said, and in the course of his testimony said "I can only say what I published then; these are the facts that I got at Rome. I cannot state distinctly whom I got them from. I talked with different persons. I was there all the evening at the Hotel. Of course there was a great deal of excitement and talk about it." The witness after his recollection had been refreshed by reading the article, was unable to testify that he received the statement sought to be given in evidence from the plaintiff or from whom he did receive it. The article did not purport to be, and was not, in truth, a statement of a conversation with, or declaration made by, the plaintiff, and was not a memorandum made by the witness of a particular conversation at or near the time it was had, and which the witness could state under oath was a correct memorandum of such conversation. It was not, therefore, competent as evidence of a statement made by the plaintiff material to the issue or inconsistent with his testimony on the trial. The printed paper was not the original memorandum made by the witness; neither did he, or could he testify that the article, or a copy from which it was printed, was a correct memorandum or reproduction of the statement of the plaintiff, and it is not within the principle of any of the cases relied upon by the defendant. In all the cases the original memoranda have been produced, and the persons by whom they were made have vouched for their correctness. The article was but a summary of the facts collected by the writer from all sources, or rather of his understanding of the facts. After the defendant had given in evidence, declarations of the plaintiff and of his mother in his presence, made in the presence of Dr. Pope and others which it was supposed might be claimed to be inconsistent with the statements of the plaintiff as a witness, the plaintiff recalled J. W. Hurlbert who had taken the plaintiff from under the cars, and had testified that he thought he had his hands on him from that time until the amputation, and examined him as to his recollection of conversation and declarations of and in the presence of the plaintiff during that time, and then propounded this question. "Did he state on that occasion (immediately on carrying him in) that the way the accident happened was, that he was standing on the threshold of the car and that the cars were jerked up and threw him under the train and that they ran over him, or in substance that?" To which the answer was: "That was the substance of his reply" The question was objected to as leading, and that it was incompetent to prove the plaintiff's declarations. The evidence was not inconsistent with the declarations proved by the defendant, but it did tend to corroborate testimony of the plaintiff by the fact that his statements had been consistent. This was not allowable. The conversation was not proved to have been a part of the same given in evidence by the defendant. Had it been so, the evidence would have been competent. The plaintiff could have proved the whole of a conversation, a part of which the defendant had given in evidence, if it was connected and all related to the same subject. But the case shows no connection between the declarations and conversations proved by the defendant and those proved by a witness, Hurlbert, or that they were simultaneous. The admission of this evidence was error. It was within the discretion of the judge at the trial to suffer a question, leading in form, to be put, and the judgment will not be reversed for an error in that respect.

The evidence of negotiations for a settlement of the claim with officers of the defendant for several years after the injury, was competent in explanation of the delay in bringing the action which had been brought out by the defendant; and which but for the explanation, might have prejudiced the plaintiff.

The judgment for the error in the admission of the statements of the plaintiff to Hurlbert, must be reversed and a new trial granted.

Judgment reversed.

Pacific Railroads.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

The subscriptions to the stock of the Union Pacific Railroad Company amount to $26,783,000 of which $36,762,300 has been paid. The receipts for the year ending June 30, 1872, from the transportation of passengers, were $3,067,808 17; of freight, $4,122,651 20; and from miscellaneous sources, $771,711 41; total, $7,962,170 78. The entire cost of the road and fixtures to said date (unadjusted balances with contractors not included), was $114,258,535 97. The indebtedness of the company at the same date amounted to $75,894 512, of which $27,236,512 is due to the United States.

The Central Pacific Railroad Company, by consolidation, now embraces, besides the original company of that name, also the Western Pacific, the San Francisco and Oakland, the San Francisco and Alameda, and the California and Oregon companies. Stock to the amount of $59,644,000 has been subscribed, and $54,283,190 paid. The receipts for the year ending June 30, 1872, from transportation of passengers, were $3,620 519 33, and of freight, $5,753,246; total, $9,373,765 33. The expenses were $4,317,332 32, leaving net earnings to the amount of $5,056,433 01. At the close of said year the indebtedness of the company amounted to $8,900,135 37, of which $27,855,680 was to the United States. The stock subscription of the Central Branch Union Pacific Railroad company is $1,000,000 of which $980,600 has been paid. The receipts for transportation of passengers for the year ending June 10, 1872, were $60,807,65, and for freight, $83,662 03; total, $144,469 68. The expenses of the road and fixtures have been $3,723,700. The company's indebtedness (exclusive of first mortgage bonds, $1,600,000, and the Government loan, $1,600,000), is $94,896 34.

The amount of stock of the Kansas Pacific Railway Company subscribed is $9,992,500, and the amount paid in is $9,621,950. Receipts for the year ended June 30, 1872, from transportation of passengers, were $1,351,837 51; of freight, $2,156,190 21; and from miscellaneous sources, $79,600 75; total $3,551,628 47. The construction and equipment of the road have cost $29,602,974 28. The total funded debt of the company is $26,044,600, and the amount of other liabilities and indebtedness is $2,081,102 16, making

a total of $28,125,702 16, of which $6,303,000 is due to the United States. On the 19th of October, 1872, you accepted the western part of this road, extending from the 393.9425 mile, and terminating in Denver, Colorado territory, 638.6 miles from the initial point.

The amount of stock of the Denver Pacific Railway and Telegraph Company, subscribed and paid in, is $4,000,000. This road, running in a nearly north course, 106.33 miles from Denver, Colorado territory, to Cheyenne, Wyoming territory where it connects with the Union Pacific road, was completed in the summer of 1870. The receipts for the year ended June 30, 1872, for transportation of passengers, were $176,312 46; of freight, $170,709 83; and from miscellaneous sources, $8,066 40; total, $355,088 69. The cost of construction and equipment of the road and telegraph to the date last above stated was $6,493,800, and the indebtedness of the company to that date was $2,519,076 25. The road and telegraph line were, on re-examination, accepted by you on the 3d day of May last.

The amount of stock of the Sioux City and Pacific Railroad Company subscribed is $1,478,500, of which $1,791,400 has been paid in. The receipts for the year ending June 30, 1872, from the transportation of passengers, were $63,548 71; of freight, $85,803 24; of mails, $7,549 40; from express, $1,735 80; and from miscellaneous sources, $3,768 56; total, $162,405 71. The expenses during that period were $152,062 98. The indebtedness of the company is $5,361,977 86, of which $1,628,320 is due to the United States.

At the close of the last fiscal year (June 30, 1872), the amount of subscribed stock of the Southern Pacific Railroad Company was $9,384,000, and the amount actually paid in, $8,404,000. The company reports that surveys have been made from the end of the completed road, a point one hundred and three-tenth miles from San Francisco, to Fort Mohave, on the Colorado river, via Tehachapi Pass, and from said pass to Fort Yuma, on the Colorado, via Los Angelos and San Bernardino. The cost of these surveys has been $66,894 84. The amount received during said year for transportation of passengers was $383,563 93. The expenses on account of the road and fixtures for said period were $376,278 11 The indebtedness of the company is $5,750,000. Seventy and twenty-six hundredths miles of this road have been completed in a first-class manner, and have been accepted. The road commences at San Jose, California. The entire cost of the road and fixtures, together with the lands for stations, &c., since the organization of the company, is estimated at about $12,000,000.

The amount of stock of the Texas and Pacific Railway Company subscribed is $2,000,000, of which $200,000 has been paid in. The company has neither bonded or floating debt. It is progressing rapidly with its surveys, having a number of corps in the field, but as the final reports have not been received, no definite description can be given of the line of road surveyed and fixed upon for construction. The receipts of the company from the 15th of April, 1871—the date of its organization—to the 1st of July, 1872, have been $204,392 05, and the disbursements amount to $125,056 87, leaving a balance in hand of $79,335 18.

The report of the Atlantic and Pacific Railroad Company for the year ended June 30, 1872, shows that $16,400,000 of stock has been subscribed, and that $16,375,000 has been paid in. The company has completed, since the date of its last annual report, the road from Prairie City, in the Indian Territory, to Vinita, in same Territory, a distance of 21¼ miles. The road and telegraph from Pacific, Mo., to Vinita, a distance of 327¼ miles, has been completed. Parties have during the last year, surveying for the road in Texas, New Mexico, Arizona and California. The total cost of surveys to June 30, 1872, was $162,173, and the amount received during the year ending on that date, from passengers, was $325,607 87, and for freight $790,030 43. The cost of railroad and fixtures up to the same time was $31,608,044 54. The total indebtedness to that date (including assumed debt of $7,161,050 of South Pacific Company, whose road from Pacific, Mo., to Springfield, it has obtained by purchase) was $15,013,999 53. The mortgages of the company were received and recorded by the department as required by law, in November and December, 1871. One hundred and twenty-five miles of this road and its telegraph line have been accepted, of which fifty were accepted by you on the 6th of December last.

Stock of the Northern Pacific Railroad Company has been subscribed to the amount of $100,000,000, and certificates for 165,336 shares, of $100 each, have been issued. The cost of surveys up to July 1, 1872 (so far as reports have been received by the company), was 454,689 70. The accounts, &c., are not yet in a condition to render an accurate report of the amounts received from passengers and freight during the year. The expenses of the road and fixtures have been $11,481,467 70. The indebtedness of the company is reported to be $20,442,245 49. On the 20th of February last a map of preliminary route from the crossing of the Red River of the North, at Fargo, in Dakota, to a point opposite the mouth of Walla Walla river, Washington Territory, a distance of about 1,143 miles, was received by the department. On the 1st inst., commissioners were ordered to examine and report upon the completed portion "from the junction with the Lake Superior and Mississippi Railroad near Thomson, Minnesota, to the Red River of the North," a distance of about 228 miles. Their report has not yet been received. The company report that on the 30th ultimo cars passed over the track for a distance of 113 miles west of the Red River. Track has recently been laid at the rate of 2½ miles a day. The report states that, at the present rate of construction, the road would be completed to the Missouri River by the 3d of December. The character of the soil in Dakota, through which the road passes, is reported very good, adapted to grain and grazing, of an average excellence, equal to Illinois lands. Water is abundant. Timber is scarce. The construction of buildings for depots, engine houses, and water stations is progressing rapidly. The work of the company in establishing and preparing for construction the line of route to the Yellowstone River and up that stream was resumed during the year. The location of the line of route has been greatly retarded at various points by hostile Indians. The company has this year surveyed and examined the Missouri River above the Great Falls, and determined that it is practicable for steamboat navigation up to Gallatin Forks, a distance of 220 miles. They have also found that a short railroad is practicable around those falls, at small expense. Thus the whole course of the Missouri River can be made available to commence and to the settlement of the vast region it drains. Surveys have been in progress on the Salmon River line in Montana, making a connection therewith of the survey in progress on the Wisdom River line. The survey of the route from Columbia River to Lake Pend d'Oreille is reported complete. It is also reported that 75 miles of the road from the Columbia River to Puget Sound will be in operation at the close of the season.

Virginia and Truckee Railroad.

The Virginia and Truckee Railroad is now completed from Virginia City via Carson City to Reno in Washoe county, connecting at that point with the Central Pacific Railroad. This road is 51 miles in length, over which 22 trains run daily, transporting about 200 ton of merchandise per day, besides carrying about 600 tons of quartz from the mines of Story County to the various mills located on Carson River. The company have now in use 11 locomotives and will add from 3 to 5 more first-class engines to this number by the 1st of January next—the car capacity of the road being about 160 cars, embracing all kinds. There is now within the borders of the county about 17 miles in length of railroad track belonging to this road.

☞ The Canada Central Railway has been completed between Sand Point and Renfrew, and successfully opened.

1,000 Tons 56-lb. Rails,

Section Cambria No. 35.

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

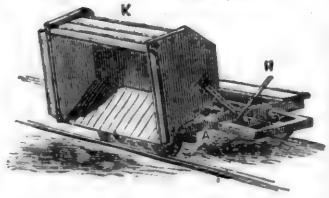

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,
Care N. C. MILLER, 61 Broadway, New York City;
or HAWKINS, WILLARD & CO., 28 Market St., Chicago.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

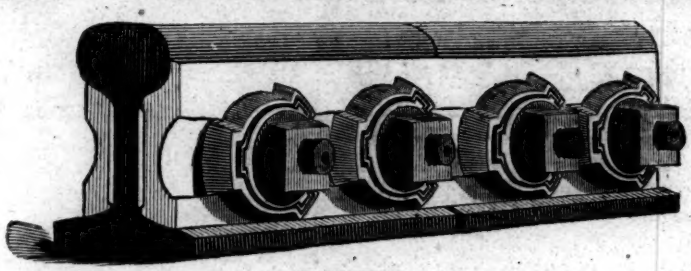
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.
